

Notice.

Notice is hereby given to all whom it may concern that on the 7th day of July, 1905, the Mayor and Board of Council of the City of Hopkinsville, passed, adopted and approved an ordinance which is in words and figures as follows to-wit:

Ordinance.

WHEREAS, it is deemed desirable that certain territory lying on the South side of Hopkinsville, Kentucky, between the Palmyra road and the Clarksville Pike, be annexed to and included in the Corporate Limits of the City of Hopkinsville.

It is therefore ordained by the Board of Council of the City of Hopkinsville, Ky.

FIRST: That upon its own motion certain territory lying South of the Corporate Limits of the City of Hopkinsville, between the Palmyra Road and the Clarksville Pike, consisting of about 35 acres and bounded and described as follows: Beginning at the intersection of the Corporate line with Nelson's West line; thence S. 24-1/2, W. 1,200 feet to a stone in G. B. Underwood's orchard; thence N. 76-1/2, W. 1,129 feet to a Gate Post on the East side of the Palmyra Road or Virginia Street; thence N. 14-1/2 E. 1,079 1/2 feet to a Cedar post on the East side of Virginia Street, at a point where the Corporate line intersects Virginia Street; thence S. 50 E. 676-1/2 feet to a Stone corner; thence N. 17 E. 794 feet to the beginning, be annexed to and included in the Corporate Limits of the City of Hopkinsville.

SECOND: That the Clerk of the Board of Council is hereby ordered and directed in publishing and advertising this ordinance to give notice that proceedings will be instituted in the name of and on behalf of the City of Hopkinsville, in the Christian Circuit Court, for the purpose of annexing the territory described in the next preceding section to and including same within the corporate Limits of the City of Hopkinsville, Ky. This ordinance takes effect on and after its adoption and publication.

Adopted July, 7th, 1905.
JNO. C. DUFFY,
Clerk of the Board of Council of the City of Hopkinsville, Ky.
Approved, July 7th, 1905.
JOUETT HENRY, Mayor.

Notice.

In pursuance of the foregoing ordinance notice to all whom it may concern, is hereby given that within thirty (30) days after the adoption, publication and advertisement of said ordinance and this notice, a petition will be filed in the Christian Circuit Court in the name and on behalf of the City of Hopkinsville, the object of which will be to annex the territory described in the above ordinance to, and include same within the Corporate Limits of the City of Hopkinsville, and in said petition there will be set out the passage, publication and advertisement of said ordinance; the object and purpose thereof, together with the metes and bounds of the territory which is proposed to be annexed to the City of Hopkinsville; and said petition will contain a prayer asking for a Judgment of the Court authorizing said Board of Council to annex said territory aforesaid. This July 7th, 1905.

JNO. C. DUFFY,
Clerk of the Board of Council of the City of Hopkinsville, Ky.

The brother of the widow of Herr Krupp was found dead in bed last week.

An Insignificant Palace.

Of Cetinaje, the capital city of the prince of Montenegro, father-in-law of King Victor Emmanuel of Italy, Sir John Furley, who has recently published a book on his public career, has a poor opinion. He writes: "I have often since been amused when reading in the papers of the fetes, receptions and banquets held in this capital, but from my knowledge of the place I have always felt somewhat skeptical as to their style and grandeur. The palace is called Bigliardo and we have in England many farmhouses with which it could not compete in size and comfort."

His Preference.

Mrs. Hatterson—Is your husband fond of young women?
Mrs. Catterson—Is he fond of them? Why, his second wife isn't born yet!—Life.

EVER WATCHFUL.

A Little Care Will Save Many Hopkinsville Readers Future Trouble.

Watch the kidney secretions. See that they have the amber hue of health; The discharge not excessive or infrequent; Contain no "brick-dust like sediment. Doan's Kidney Pills will do this for you.

They watch the kidneys and cure them when they're sick. Hopkinsville testimony proves it. J. W. Tunks, of 312 W. Seventh St., who is employed at the M. C. Forbes planing mill, says: "The condition of my health was such as to cause me a great deal of worry about my future. I had almost constant aching across the small of my back and the kidney secretions were highly colored, excessive and irregular, in fact, the disorder was so pronounced that it had been said it bordered on diabetes. I also suffered at times with indigestion which caused me a great deal of distress. At one time I was scarcely able to do any work at all for nearly a year. I doctored and tried various remedies but nothing did me any permanent good until I used Doan's Kidney Pills which I procured at L. A. Johnson's drug store. I had them only a few days when I noticed a change for the better and by the time I had finished the box I found they had brought about so decided an improvement in my condition as to convince me of their real worth and I am more than thankful for the relief that I have received."

For sale by all dealers. Price 50c. Foster-Milburn Co., Buffalo, N. Y., sole agents for the United States. Remember the name—Doan's—and take no other.

The Christian Science Church and Its Founder

Annual Report Tells of Increasing Numbers—Church Architecture Sometimes Suggests Societ's Desire to Be Known as "Different."

At the recent annual business meeting of the "mother" church of Christian Scientists in Boston, reports were made concerning increase in numbers. The membership in 1893, when the first annual meeting was held, was 1,512; it is now 34,063. The 625 branches throughout the world have 38,316 members, making the total 72,279.

This "new religion" was "discovered" in 1866 by Mrs. Mary Baker Glover, a frail New England woman, whose restoration that year from invalidism was looked upon as remarkable. In 1875 appeared the book "Science and Health, with Key to the Scriptures." In 1876 the Christian Scientist association was formed, and three years later there came into existence a "mind-teaching church without creeds, called the Church of Christ." In 1877 Mrs. Glover married Dr. Eddy, whose name she was to make so widely known. Mrs. Eddy was ordained to the ministry in 1881, two years after the Church of

MRS. EDDY.

Christ was organized in Boston. The Massachusetts Metaphysical college (Boston), founded by Mrs. Eddy, was chartered in 1881, and in 1883 she founded the Christian Science Journal.

Since her retirement from the college in 1889, Mrs. Eddy has made her home in Concord, N. H., the town near which stands the place where she was born. Her father, Mark Baker, lived on a goodly farm three miles from Concord, in the village of Bow. Here his daughter Mary, the youngest of six, was born in 1827. She was educated at Ipswich academy, and later came under the teaching of her brother and Prof. Sanborn. She showed proficiency in natural philosophy, chemistry, astronomy, rhetoric, moral science and the Latin, Greek, Hebrew and French languages. Always of an inquiring mind, she evinced eager desire to enter into new lines of thought, investigating new schools. While she was still a very young woman she begun study of the homeopathic treatment of disease, and became a convert to this school of medicine. Because of aversion to the dissecting-room she lacked the surgeon's knowledge and never obtained a diploma; but experimented with homeopathic treatments, had some practice. When she made the "discovery" of Christian Science she was about 40 years old.

Part of her girlhood was spent in Tilton, N. H., and here, in 1843, she was married to Col. Glover, of Charleston, S. C. With her husband she left to take up residence in the south, but Col. Glover died only a year after his marriage, and his widow returned to her father's home in New Hampshire. At Tilton a child was born to her.

We presently hear of her in Lynn, Mass., where she dwelt several years. Here she wrote the book which was to become the text-book of the Christian Science church. Concerning the chapter Science and Man, which first appeared in pamphlet form, a reviewer said none but a woman or a fool would have written it, but added it was safe enough, as no one would ever read it. Which goes to show how dangerous it is for a review to prophesy—200,000 copies of the book have sold.

Mrs. Eddy joined the denomination to which her parents belonged, the Congregationalists, when she was 12 years of age, and remained a member 40 years, until 1879. In 1878 she occupied the pulpit of the Baptist tabernacle in Boston, and drew great crowds about her. The following year her own church was organized. Fifteen years later the Scientists erected a fine church as a testimonial to "Mrs. Eddy, Discoverer and Founder of Christian Science," and she was named pastor emerita. In this "mother" church is a room sacred to Mrs. Eddy's use, known as the "Mother's Room."

When Mrs. Eddy left Lynn for Boston her time was largely devoted to the Metaphysical college, during the several years of her direction of this work she taught something like 5,000 students. The annual income from the college was \$40,000.

When Mrs. Eddy removed to Concord, she set about building up a beautiful estate there on the edge of town; and now it well deserved its name, Pleasant View. Pleasant View has been the shrine for many thousands of pilgrims, come to look upon the home, and perchance the face, of the woman who founded a new religion, who started a movement so widespread. Not very often does Mrs. Eddy appear to the casual visitor. She lives in very strict seclusion; but as her recreation is a daily drive, a glimpse of her may be had in the carriage as she leaves the grounds of an afternoon.

She certainly has made a most charming place of Pleasant view, personally directing much of the work of improvement. Noble trees, lawns, rose gardens and shrubberies surround her house; trim orchards, substantial barns, cultivated fields attest to the thrift and orderliness ruling there. Mrs. Eddy may be a dreamer; she is also a worker. She is said to be a woman of fine presence, of the New England type.

She is now almost four-score years old, but sends forth messages to the church from her quiet home. She has led a very busy life, has been a methodical worker. There are accredited to her the following works—"Science and Health, with Key to the Scriptures;" "Retrospection and Introspection;" "Unity of God and Unreality of Evil;" "People's Idea of God;" "Christian Healing;" "Rudimental Divine Science;" "No and Yes;" "Christ and Christmas;" "Pulpit and Press;" "Church Manual of the First Church of Christ, Scientist;" "Miscellaneous Writings;" "Christian Science Versus Pantheism."

Statistics of 1903 give the number of Christian Science churches in the United States as 559—surely these figures are large for a denomination so recently founded. A writer in the New England Magazine, discussing Christian Science architecture, says: "A denomination only 25 years of age and neither large in numbers nor unusually wealthy, has been able with apparent ease to construct such a vast army of edifices at an expense ranging from \$30,000 to \$1,000,000. The magnificent and substantial buildings which have been erected by the Christian Science movement, and which have been dedicated free from debt, mark a vital interest in the undertaking which has perhaps not been paralleled by any other religious society of its age in the history of the world." That saying "perhaps" leads us to quote these words.

No one will deny that the church growth, in both senses of the word, of Christian Science is remarkable. The "mother" church, which was built in 1894, cost something like \$250,000. The First Church of Christ, Scientist, in New York, has an auditorium considered by architects one of the finest in the country. This structure, built of Concord granite, cost \$1,185,000, the whole cost paid before its dedication, in November, 1903. New York's Second church also cost a goodly sum, over \$500,000.

In Chicago the Scientist's First church has a seating capacity of 1,500, and in this city a Second and Third church have been built, a Fourth and a Fifth are in process of erection. Minneapolis, St. Louis, Kansas City, and Denver have magnificent Christian Science churches. Concerning the character of the numerous houses of worship built by the followers of Mrs. Eddy, this explanation is presented: "As to exteriors, some of the Christian Scientist churches have held to the Gothic and Romanesque styles of architecture, with the tall

THE "MOTHER" CHURCH IN BOSTON.

spires and towers which quite generally prevail in church buildings of other denominations; others have departed radically from these, and have adopted the Grecian style, as if intent upon getting as far away from the ordinary custom as possible in order to make the outward appearance of the structure as new as the religion to be taught therein."

Another writer says, in regard to the churches illustrating the strength of the movement: "Such an achievement as Mrs. Eddy's—the founding of a great religious movement by a woman—is a fact historically almost without precedent. It proves her qualifications as a born leader of advancing thought. The movement of which she is the origin and head is certainly one of the most noteworthy and interesting movements in New England or in America at the present time, and her life and personality command attention."

ELLEN THAYER.

Find Coal-Black Rat.

A coal-black rat was caught in a trap at a police station at Portland, Ore., the other morning. The rat was unusually large in size and its skin was very soft, like velvet. The animal was drowned along with several other rats which were caught in the same trap. Many people saw the animal and they all said that never before had they seen a black rat. It attracted a great deal of attention, even among the prisoners, in whose apartments it was caught.
