The Weather.

FOR KENTUCKY—Saturday fair and colder.

The January number of the Smart Set is issued by the publishers as a special-Holiday Number, and it is one of the most attractive magazines shown on the newsstands at this season—both inside and out—for it has not only an all-star list of contributors but presents an innovation as well in a very artistic new holiday cover of white and gold.

HOW TO KILL WHITE PLAGUE.

In your own neighborhood, Mr. Average Citizen, especially if you live in a large city, are innumerable Houses of Death!

According to statistics, the chances are one in seven that it was some body with tuberculosis. Can you afford to take that chance?

We average Americans are a moving race, particularly in the larger cities. Considering the semi annual changes of May and October, is it any wonder that, under existing conditions, the number of white plague victims is largely on the increase, despite all our campaigning against it?

The reason for failure is plain. Taking as another instance the mere roomer—lodger, if you will—struggling for a bare livelihood all day, going home—he must call it home—at night—to what? To a room, be it ever so cozy or humble, that may have been rented a dozen times to as many consumptives during the past twelve months.

Imagine a child living under any of the conditions mentioned; inhaling an atmosphere laden with disease; crawling on all fours midst unseen filth and death. Its lungs may be attacked, or its spinal column, causing "hunch-back" later, if it lives; or it develops hip joint disease, making then and there a life-long cripple.

Prevention, radical prevention, is our one salvation. Of what avail are expensive, special tuberculosis
