The Herschede Hall Clock as a timepiece, a tubular chime, and an article of furniture for home, office, or institution, appeals alike to utility, refinement, and musical taste. The perfect movement insures correctness of time; the solid oak or mahogany case, with classic lines, conforms to good taste; and the melodious tubular chimes, sounding the hours and quarters after the peals of Whittington or estminster, serve as a pleasing reminder of passing hour. The fifty styles give ample loice in design, size, and price, all showing the moon's phases in the dial arch.
