The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh of the Bladder. It is the only positive cure now known to the medical profession. Catarrh being a constitutional disease, requires a constitutional treatment. The Catarrh Cure is taken internally, acting directly upon the blood and the mucous surfaces of the system. Thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that fails to cure. Send for list of testimonials.

### Stop Killing Young Calves.

Congressman Britton wants to stop the killing of young calves, and thus, add to the country's meat supply. He makes out his reason thus:

"When you see a little new born calf, staggering on its thin, weak legs in the field, you see in front of you the possibility of 1,400 pounds of good meat. But the calf is killed and in the place of 1,400 pounds of good meat two years from now, you have a few pounds of veal, scarcely fit for any one to eat.

"The number of calves slaughtered has increased 100 per cent in the last ten years. During 1911 there were slaughtered 8,000,000 calves weighing 560,000,000 pounds. If my bill had been a law at that time and these 8,000,000 calves had been allowed to live two more years and allowing 1,400 pounds as an average for a two-year old cow or steer, they would have produced 11,200,000,000 pounds of beef to supply the scarcity we now feel."
