James Bird.

Sons of freedom, listen to me, And ye daughters, too, give ear; You a sad and mournful story, As was ever told shall hear. Hail, you know, his troops surrendered And defenseless left the west; Then our force quick assembled, The invader to resist. Among the troops that marched to Erie, Were the Kingston volunteers; Captain Thomas their commander, To protect our west frontiers. Tender were the scenes of parting; Mothers wrung their hands and cried; Maidens wept their swans in secret; Fathers strove their tears to hide; O sweet kiss he snatched from Mary; Craved his mother's prayers once more; Pressed his father's hand and left them For Lake Erie's distant shore. Mary tried to say "Farewell James," Waved her hand, but nothing spoke; Good-by, bird, may heaven protect you, Where the scenes that parting brake. Soon he came to where noble Perry Had assembled all his fleet; There the gallant bird existed, Expecting soon the foe to meet. Where is Bird? The battle rages, Is he in the strife or no? Now the cannons roar tremendous; Dare he meet the hostile foe? Aye, behold him! See him Perry— In the selfsame ship the fight; Tho' his comrades fall around him, Nothing can his soul affright. But behold! a ball has struck him. See the crimson current flow; "Leave the deck!" exclaimed brave Perry. "N.!" cried Bird; I will not go! Here on deck I took my station, Ne'er will Bird his colors fly; I'll stand by you gallant captain Till we conquer or we die. Still he fought, though faint and bleeding, Till the stars and stripes arose; Victory having crowned our effort, All triumphant o'er our foes.

CAUSE AND EFFECT

Of Foot and Mouth Disease In Cattle.

Here's the cause and effect of foot and mouth disease, which is now prevalent in several northern states, and which threatens Kentucky cattle: It is an acute, highly contagious fever, accompanied by an eruption or blisters in the mouth, around the hoofs and between the toes. It affects cattle principally, but sheep, hogs and goats are subject to it. The mortality is small, but affected animals shrink perceptibly in weight, the milk yield of dairy cows is impaired and the animal is greatly weakened. It is estimated that an animal, after its recovery, is damaged to the extent of \$20. The source is a specific virus. Human beings may convey the germ from affected to healthy animals. The disease is prevalent in Europe, where it caused huge financial loss every year. It is believed it was imported to the United States this year in hides shipped here from Europe, and that tannery employes communicated germs to their herds. On every former appearance in this country the disease has been promptly eradicated by the government, which pays the owners of affected cattle one-half the beef value if it is found necessary to kill the animal's.

Great Naval Gun.

Washington, Nov. 9.—The largest and most powerful naval gun ever designed has just been completed for the United States navy. It is a 16-inch rifle and secretly constructed at the Washington navy yard. Its existence became known today, when tests were begun at the Indian Head proving grounds on the Potomac, below this city. If the new weapon proves to be successful its initial trial promise, the type probably will be adopted for the main battery of the three dreadnoughts authorized at the last session of congress. These vessels will be larger by several thousand tons than any ship now afloat, and experts declare they easily can carry the heavier guns. The largest weapons now used in the American navy are the 14-inch guns carried by the dreadnoughts of the Pennsylvania, Nevada and New York class. The newest battleships of the British navy carry eight 15 inch rifles. It is claimed the 16-inch guns will have a range of fifteen miles, and at least twice the penetrating power of the famous German howitzers, which have played such havoc with modern fortifications in Belgium and France, which were believed to be well high impregnable.
