

L. & N.

Time Card

Effective Friday, Apr. 2, 1915

TRAINS GOING SOUTH.

No. 98—C. & N. O. Lim. 11:56 p. m.
 No. 51—St. L. Express 5:29 p. m.
 No. 95—Dixie Flyer 9:35 a. m.
 No. 65—Hopkinsville Ar. 7:00 a. m.
 No. 53—St. L. Fast Mail 5:24 a. m.

TRAINS GOING NORTH.

No. 92—C. & St. L. Lim. 5:29 a. m.
 No. 52—St. Louis Express 9:55 a. m.
 No. 94—Dixie Flyer, 7:08 p. m.
 No. 56—Hopkinsville Ac. 8:55 p. m.
 No. 54—St. L. Fast Mail 10:16 p. m.

No. 51 connects at Guthrie for Memphis as points as far south as Erie, and for Louisville, Cincinnati and the East.

No. 53 and 55 make direct connections at Guthrie for Louisville, Cincinnati and all points north and east thereof.

No. 56 carries through sleepers to Atlanta, Macon, Jacksonville, St. Augustine and Tampa, Fla. Also Pullman sleepers to New Orleans. Connect at Guthrie for points East and West. No. 53 and 55 carry local passengers for points north Nashville, Tenn.

J. C. HOGE, Agt.

COOK'S DRUG STORE

9th and Main Sts.
 W. 9th Corner.

Olive Trees Live Longest.
 Olives are declared to be the longest-lived fruit trees, some in Syria having borne abundant crops for more than four hundred years.

Sawed-Off German.
 Sometimes a girl makes a fool of herself over a man, and sometimes she marries the man and makes a fool of him.—Indianapolis News.

CARING FOR LATE POTATOES

Tubers Are Too Often Neglected After First Few Weeks of Growth—Use Light Cultivator.

On many farms the potatoes are well cared for during the first few weeks of their growth, but late in the season they are left to take care of themselves.

It is true that deep cultivation, after the plants are fairly well grown, will be harmful, but the occasional use of a light cultivator, with teeth not more than an inch and a quarter wide, may well be continued until the tubers are nearly ripe, or the vines have become so large as to prevent further work between the rows.

The destruction of injurious insects is another matter which usually receives fairly prompt and thorough attention during the first half of the growing season, but which, on many farms, does not receive sufficient attention later on. The fight against the enemies should be continued to the end of the growing season. This will allow the tubers to reach their full size and to become thoroughly ripe. It will also do much to prevent the appearance of large numbers of "bugs" next year.

Drive Out Granary Pests.

When the new grain goes into the granary, drive out the weevils and other pests. A few open dishes of bisulphide of carbon set around will do it. Then close the granary tightly and make yourself scarce while the stuff is evaporating, for the vapor goes downward and you may get a whiff of it, to your great harm. Keep lights and fire away.

Photographing a Mirage.

It is possible to photograph a mirage and obtain very good results. As we are told by a photographic expert, "the simplest way is to stop down the lens to, say, U. S. 64 (f. 32), and make a series of exposures ranging from one-one-hundredth to one-twenty-fifth of a second, depending upon the intensity of the light. The ray filter will give better color values, and can be used to better advantage, but this will mean lengthening the time of exposure accordingly."

Art Versus Commerce.

Poet's Wife—Ah, Gerald, if the publishers would only pay you as well for your poems as the tobacco men do for your testimonials, we would be on Easy street!—Puck.

Where Judge Draws the Line.

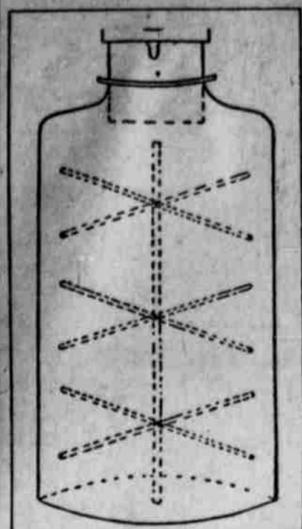

Judge Johnson—That I love publicly I never will deny, but I never walk from coast to coast to get it.—Atchison Globe.

SHIPPING BEES WITH SAFETY

Bottle May Be Used for Purpose by Arranging Frame Inside—Prevents Insects Smothering.

A bottle used for shipping bees can be made more suitable for the purpose by putting a light frame inside, as shown in the illustration, says Wisconsin Agriculturist.

The bees, when lightly smoked, can easily be shaken into the bottle

Jar With Frame Inside for Shipping Bees.

through a paper funnel. The glass is too smooth for them to cling to the sides, and some of them will smother in the bottom if too many are put into the bottle, unless a frame is made for them to cluster around.

The arms are fastened to the middle piece and turned straight until placed in the bottle or jar. Then the cross pieces can be turned into position.

Many physicians use the bee poison for certain purposes, and get bees to be used in this way. This hint will be of value to those who ship bees to them or to other apiarists.

French Ingenuity.

A hollow wooden ball, six feet in diameter, which is moved by the flow of the sewage, is used to remove obstructions from sewers in Paris.

Rye Grass.

Rye grass is believed to be the oldest grass specially raised for forage, having been thus cultivated in England more than two centuries ago.

SHEEP TRIM UP THE WEEDS

Also Clean Up Briars, Volunteer Grass and Grass Growth in Fence Rows and About Stock Lot.

The greatest advantage in keeping a few sheep on the farm—twenty-five to fifty head—is the cleaning up of weeds, briars, volunteer grain and grass growth in the fence rows and about stock lots, feed lots, barn yards and idle places generally, where such growth gets a start in the latter part of summer and early fall season. Weeds in such places should never be permitted to go to seed, and need not if the sheep are given a chance to

Southdown-Cheviot.

trim up these waste and idle places before the volunteer growths get too far advanced.

It is a good plan to bring the sheep from their pasture once or twice each week through the summer and fall and give them opportunity to trim up the weeds. It is very valuable for the health and thrift of the sheep.

"A change of pasture is good for sheep," and there is nothing better for the suppression of the extra growth of pasture and weeds than sheep.

Unwelcome Legacy From Rome.

The Egyptians were the first to divide the day and night into 24 equal parts. They numbered the hours one to twenty-four. The Romans began their day at sunrise, and numbering the hours to sunset one to twelve, and numbering them from sunset to sunrise also one to twelve. Our a. m. and p. m. is a part of the burdensome legacy inherited from them. The hours constituting their day and night were of unequal and constantly varying lengths. In the course of time they made a change to our present system, and had they adopted the Egyptian method they would have conferred incalculable benefit upon mankind.—Scientific American.

Lightning Rod Indorsed.

The United States government has vindicated the lightning rod by rigid tests.

POINTERS FOR PIG BREEDER

Feeding and Attention Are of Much Importance—Furnish Dry Quarters and Plenty of Sunlight.

Keep the following points in mind:

1. Feeding and care are as important as breeding in producing a good hog. Plenty of good feed and care may make a fairly good hog out of a runt, but lack of it will always make a runt out of a good pig.
2. Young pigs must have a dry bed and plenty of sunshine.
3. Begin feeding the pig as soon as he will eat, and keep him growing until he is mature.
4. Always keep plenty of clean, fresh water where the hogs may drink at any time.
5. The more milk a sow will give the faster her pigs will grow.
6. Lice prevent a hog from doing well.

"Tipping" Raspberry Canes.

The time for "tipping" black raspberry canes (if you want new plants to set or sell) is close at hand. When the new growth bends over near the ground, each tip should be buried a few inches in the soil and held in place with a stone, peg, or heap of dirt. Next spring nearly every tip will have taken root; the new plants can then be severed from the parent canes and moved wherever desired.

The Trouble With Art.

Men are without great dreams in these days, and art is elaborate and fussy and self-conscious. The technical part of the work is predominant. One sees the artist holding up a mirror to himself as he works. Pygmalion congratulates the statue upon the fact that he carved it, instead of being lost in the love of creating. It is as though a lover should sing of himself instead of singing of his lady. The subtle poison of self-advertisement has crept in and peers like a satyr from the picture and from the statue.

Remembering a Name.

Two women who were picking out the wall paper for an apartment had made some progress, but had not finished when it was time for luncheon. The salesman had been obliging and expeditious, and on the way out the customers asked the name of the manager, so they could call for his services later. His name was Sheridan, and they decided to clinch it by thinking of "Sheridan's Ride." Two hours later they returned and said they would like to see Paul Revere.

Many Names for Ladybird.

Other names for the ladybird, in various parts of England, are the fly-golding, Bishop Barnaby and God Almighty's cow.

MAY'S DEVOTION.

(TWO-STEP.) HENRY COHN.

Musical score for piano, featuring a two-step polka. The score includes a key signature of one flat (B-flat) and a 2/4 time signature. It consists of two systems of music, each with a treble and bass clef staff. The first system is marked 'POLKA' and includes a 'Ped.' (pedal) instruction. The second system includes a 'Fin.' (finis) instruction. The music is characterized by a rhythmic, dance-like melody with a steady accompaniment.

Musical score for piano, featuring a two-step polka. The score includes a key signature of one flat (B-flat) and a 2/4 time signature. It consists of two systems of music, each with a treble and bass clef staff. The first system is marked 'D.C. Polka' and includes a 'Ped.' (pedal) instruction. The second system includes a 'Fin.' (finis) instruction. The music is characterized by a rhythmic, dance-like melody with a steady accompaniment.
