A Western Trip.

Tolu, Ky., July 8, 1907.

EDITOR RECORD-PRESS:—In our former letter we had reached our destination, Winnoueca, Nevada. This little city about the size of Crittenden county's capital is in the heart of the Great Basin and is touched by the Union Pacific R. R. Having looked after affairs here, one day only being taken, we continued our journey toward the Golden Gate on the Pacific. We touched at Sacramento, the capital of California.

After leaving the capital we pierced the great wheat growing and hay raising belt where harvesting was being done, the hay being principally alfalfa and barley. The land in this section is said to be worth from \$300 to \$1500 per acre. Owing to so much rain the land for many miles was inundated by the Sacramento river, said to be about six feet higher than it had ever been known to be.

We entered the suburbs of San Francisco about 3 o'clock p. m. making our change of cars at Golden Gate depot where we went aboard a vessel in which we crossed the San Francisco Bay. We were on the bay about forty-five minutes. Here we entered the main part of the city and here we beheld the awful work of the great earthquake. While waiting for our train we proceeded to take in the sights. Great chasms

still yawn in the very streets and wrenched, wrecked and demolished buildings stand yet as monuments of the great catastrophe. The city electric light building now in ruins was the largest building I ever saw, the two power wheels being 40 feet in diameter.

The demand for laborers in carpentry and brick masonry was very great. Common labor was \$3 per day. Carpenters \$4 to \$8 and masons and brick layers from \$8 to \$12 per day.

Leaving this city we took a sleeper, getting a much needed rest, and proceeded southward. Traveling all night, shortly after breakfast we came in sight of the Pacific ocean and kept close to the shore line for a distance of 400 miles. A great curiosity we saw was a great number of oil wells out in the ocean, they being connected with the shore by trestled tramway. Along this ocean view route we saw many United States war vessels, which from our view point were things of beauty. Some we saw were at the docks, some were riding the waves while others were at anchor. Leaving the ocean shore line we went into the fruit and flowering section. We saw one orange orchard of 300 acres. Acres and acres of strawberries came to view and many hands were gathering the fruit, for you must understand that Southern California is a land of perpetual summer.

Los Angeles is the most beauti-

ful city I ever saw. It is fast, sanitary and cultured, the twentieth century hustle being in full sway. We looked here for some of our Tolu boys, but not knowing their business we could not find them. We learned, however, afterwards that they all have honorable, lucrative positions.

Our destination being Southward we went through the mineral belt of Arizona, making our next stop at El Paso, Texas. In Arizona we crossed the Grand Canyon on a bridge 1883 feet long and 321 feet high. Crossing the states of Texas and Louisiana our next stop was at New Orleans. The state of Louisiana is a great rice growing state and numberless rice mills dotted along our route. Sugar cane is a great staple of this state and cane mills and cane fields were as numerous in certain sections as were the rice fields and mills. New Orleans is a quaint, ancient city, being English, Spanish, French and many other nations represented in its makeup.

Our route from this city home is a familiar one and needs no description as we rounded in via Memphis, Paducah and Princeton.

Very truly,
J. A. WHEELER.

A Remedy Without an Equal.

Try Yucatan Chili Tonic, is a sure cure for Colds, La Grippe and Rheumatism; will cure you, acceptable to the most delicate person, results are positive and you feel better after taking one dose. Guaranteed under the Pure Food and Drugs Act. Price 50c. For sale by all druggists.

The First Successful Automobile.

The first successful automobile in the world was invented by a Des Moines, Iowa, man, manufactured in Des Moines and run in Des Moines streets. Today there are nearly a million horseless carriages, all told, in the world. About one-fourth of this number are owned in the United States. William Morrison, the inventor, is still alive and a resident of Des Moines. When Morrison's electric horseless carriage first appeared it was as great a curiosity as an air ship was a year ago. The latest invention in connection with the electric automobile is the mercury arc rectifier developed by Dr. Charles P. Steinmetz of the General Electric Company to change alternating current to direct current for changing the batteries of the electric vehicles.

COMMISSIONER'S SALE.

J. F. Son, Plff. vs. Equity. Mary E. Vinson etc. Dft.

By virtue of a Judgement and order of Sale of the Crittenden Circuit Court, rendered at the June term thereof, 1907, in the above cause for the sum of \$370.00 with interest at the rate of 8 per cent, per annum from the 21 day of Nov. 1899 on \$245.00 until paid, and \$100.00 costs herein, I shall proceed to offer for sale at the court house door in Marion at the highest bidder, at PUBLIC AUCTION, on Monday the 12 day of August 1907, at 1 o'clock p. m., or thereabout (being Court day) upon a credit of six months, the following described property, to wit:

The lease now held by J. H. and Gilie Thomson for the years 1907-1908 together with the growing crop of all descriptions now growing on the following lands situated in Crittenden Co., Ky., and consist of 50 acres off of the South end of a tract of land upon which W. B. Travis lived and died, and for a full description of same reference is made and platt filed in the suit of Mary E. Travis etc. vs. Ellen J. Travis etc. filed in the Crittenden Circuit Court at the Nov. term of 1899 the afore said described 50 acres of land being the same land, that was recovered by suit Mary E. Travis etc. in said suit.

I will then sell the life interest of Mary E. Travis, now, Vinson in and to said 50 acres of land, subject herein to the land for the years 1907-1908.

Or sufficient thereof to produce the sums of money so ordered to be made. Use Kennedy's Laxative Cough Syrup. Contains no opiates. It drives the cold out of the system by gently moving the bowels. Contains Honey and Tar and tastes nearly as good as maple syrup. Children like it. Sold by J. H. Orme.

Great Relief

During that trying period in which women so often suffer from nervousness, backache, sick headache, or other pains, there is nothing that can equal Dr. Miles' Anti-Pain Pills. They stop the pains, soothe the nerves, and give to

Women

the relief so much desired. If taken on first indication of pain or misery, they will allay the irritable condition of the nerves, and save you further suffering. Those who use them at regular intervals have ceased to dread these periods. They contain no harmful drugs, and leave no effect upon the heart or stomach if taken as directed. They give prompt relief.

"I have been an invalid for 9 years. I have neuralgia, rheumatism and pains around the heart. By using Dr. Miles' Anti-Pain Pills I am relieved of the pain, and get sleep and rest. I think had I known of the Pain Pills when I was first taken sick, they would have cured me. I recommend them for periodic pains."

MRS. HENRY FUNK, R. AMBO, O.

Dr. Miles' Anti-Pain Pills are sold by your druggist, who will guarantee that the first package will benefit. If it fails, he will return your money. 25 doses, 25 cents. Never sold in bulk. Miles Medical Co., Elkhart, Ind.

ROBUST DOUGH ROLLERS.

Work in a Pie Factory is on the Scale of Athletics.

To properly describe the processes of baking pumpkin pies would require one skilled in the technicalities of the art. This is the way it looks to a mere man: First, the coarse yellow rind is removed, and then the pumpkin is cut open and the seeds taken out, after which the two halves are thoroughly washed. Then a husky lad takes a sort of cleaver and cuts the pumpkin into large pieces, which are fed into a steam chopping machine and reduced to small fragments. These are placed in a huge copper boiler capable of holding perhaps twenty-five gallons. After the boiling has been completed a pasty mixture of eggs, milk, sugar, cinnamon and other spices and condiments is added and well stirred in, and then the yellow mass is ready to be filled into the skeleton pies. The crust is prepared in another department, where the dough is mixed, rolled and placed in the pans ready to receive the filling. If any one thinks that pie-making is an easy and effeminate employment he should visit a pie bakery and inspect the muscles developed on the arms of expert pie crust mixers and rollers. They would be creditable to a trained athlete and would put many a mill worker and blacksmith to the blush. Finally the pies are placed on racks and shoved into huge ovens that resemble nothing else so much as the kilns used for burning brick. These kilns are constructed in any size desired, with a capacity of anywhere from fifty up to several hundred at a time, while they can be refilled every half hour or less.—Pacific Monthly.

PECULIAR EYES.

The Organs of Sight of the Spider and the Snail.

The next time you catch a spider try to find the eight shiny little eyes at the anterior end, some above and some put under the edge of what we may imagine to be its forehead. To examine these parts to the best advantage hold the spider in tweezers, or it may be better to use a spider killed by being dropped into a bottle of diluted alcohol. These eight eyes vary in arrangement and in relative size in various species of spiders—in some they may be arranged in two rows, in other in three, some may be very small and others large and prominent, and so on—but there they are, rather poor eyes, near-sighted, looking in several directions at once, and the spider, which can never shut any of them, is sure to see everything that approaches unless it is asleep, in which case the sight is dead. For some purposes it may be convenient to have eyes that roll up and disappear at the approach of danger. And these are exactly what the snail has, situated at the end of two long and sensitive palpi, or feelers. When all is quiet their owner extends these organs, and you can see at their tips small round knobs upon which the eyes are placed. But if you touch one of the palpi or even jar the snail a little the eyes begin to back into these feelers as the tip of a glove finger may be turned in, and they no longer see any danger that may be lurking at hand.

Dangers of the Revenue Service.

The officers of the internal revenue service make little fuss over their accomplishments. The world scarcely hears of them unless they have had a desperate hand to hand fight with mountain desperadoes which has resulted in the death of several of their number. But day after day and night after night they go about their work calmly, quietly, in constant danger of death from a shot from some ambush of moonshiner or blockader. Yet these men are an absolute necessity for the safeguarding of the country's interests, and they deserve much credit for their hard task, scarcely appreciated by the great mass of the people.—David A. Gates in Metropolitan Magazine.

When the Wire Tires.

"Messages," said a telegraph operator, "always slide over the wires better on Monday than on any other day. The wires, you see, have profited by their Sunday rest. It is a fact that inanimate as well as animate things get tired and need a vacation occasionally. You know how true this is of razors, of automobiles, of locomotives, and it is just as true of telegraph wires. A wire after its Sunday rest gives a quicker, a fuller and a more delicate transmission. It is like a piano that has just been tuned."

The Thumb.

The radical difference between the hand of man and of the monkey lies in the thumb. In the human hand the thumb has the "opposing power," which means that the thumb can be made to touch the tip of each or any of the other fingers on the same hand. The monkey's thumb is nonopposable.—Pittsburg Dispatch.

Needed the Money.

"Say," queried old Wedderly, "why don't you get married?"

"Because," replied young Singleton, "I'm too poor."

"Huh!" rejoined the old man. "When I was your age I was so poor I had to marry."—Chicago News.

They Must Like It.

"Does this powder really kill the cockroaches?" asked the housekeeper at the grocery.

"Why, certainly not!" replied the grocer. "If it did we wouldn't sell a third of the quantity."

The truth is always the strongest argument.—Sophocles.

Bourbon Poultry Cure.
