Prayer meeting every Wednesday night, everybody invited to attend. Wishing unlimited success, prosperity and hapiness to the dear old Record-Press and its readers.

### T. C. STONE

AGENT FOR THE NATIONAL MONTHLY, NORMAN E. MACK, EDITOR. OFFICE WITH RECORD-PRESS.

### THE ONE MEANS OF RELIEF.

October 27th, the car shortage amounted to 36,000 cars, an increase in the short space of two weeks from a shortage of 23,000 reported on October 7th, with the certainty of further decrease in the number of freight cars, a fact which shipper and receiver must face and for the added cost of which the entire country must pay. The fact that the great railway systems are placing orders for more cars gives no sign of present relief, nor does the fact argue for relief in the future. It is always to be remembered that the growth of trade and commerce far outstrips the efforts of the railways to keep pace with it. To believe otherwise would be to deny the patent facts of past growth, so enormous and so continuous, as to call from President Hill the statement that it would cost the railways of the country the expenditure of \$1,000,000,000 annually for five years to come up to the demands of trade and commerce.

It is a frank confession. But it was a confession which carries its own refutation with it. While the railways were engaged in their expenditure of \$1,000,000,000 annually, the country would be developing at a rate even greater, and the catching up of the railways could be accomplished only on the impossible condition that the trade and commerce of all sections of the United States should remain at a standstill.

There is but one method through which relief from car shortages can be had. That method is in the improvement of the inland waterways of the country. With the inland waterways improved, the additional facilities demanded by shippers by rail could be afforded. The fact of enormous development, and the fact that with each year the car shortages grow more serious and more costly and disastrous, are the surest guarantee that there are freight offering amply sufficient in volume to tax the capacity of both means of transportation, and that the relief which shipper and receiver demand, would come to the relief of the railway.

There cannot, in the nature of thing, be hostility in competition between the river and the rail. Last year the upper Ohio held in leash for

more than six months 15,000,000 bushels of coal which the manufacturing interests of the middle and lower Ohio needed and could not have, because of the continued low water in the Ohio. At Ogden, in Utah, there are now 75,000 tons of sugar beets awaiting the time when the railroads can handle them. Because of low water in the Ohio the 15,000,000 bushels of coal were valueless. So are the 75,000 tons of sugar beets, with the lack of value extending to the labor that would have employed in the factories if the coal had been received or if the sugar beets could be moved.

Without means of transportation, production is a waste of time and money. With improvement of the waterways production would be stimulated because of the certainty of reaching a market. The proposition is self evident, but it cannot be brought to accomplishment without the adoption of a settled policy on the part of the Federal Government, such as the National Rivers and Harbors Congress advances, and such as much, eventually, be adopted by the Congress of the United States. The coming session of the Congress at Washington on December 8th, 9th and 10th, will outstrip its predecessors in the fact that it will assemble with the knowledge that its platform:—"A policy; not a Project"—meets with the cordial approval of all interests, with only persistence needed to produce the desired result.

### Money Comes in Bunches

to A. A. Chisholm, of Treadwell, N. Y., now. His reason is well worth reading: "For a long time I suffered from indigestion, torpid liver, constipation, nervousness and general debility," he writes "I couldn't sleep had no appetite, nor ambition, grew weaker every day in spite of all medical treatment. Then used Electric Bitters. Twelve bottles restored all my old-time health and vigor. Now I can attend to business every day. Its a medicine." Infallible for Stomach, Liver, Kidneys, Blood and Nerves. 50c. at Jas. H. Orme's and Haynes & Taylor.

### Honor Roll For Crayne School.

Jessie Carlton, 85; Ray Bradford, 86; Erma Brown, 93; Gaele Jones, 89; Roy Cook, 94; Ray Deboe, 92; Eugene Dorroh, 90; Robert Dorroh, 93; Amill Rushings, 88; Autie Ordway, 95; Ellis Ordway, 90. A good interest and a splendid attendance. J. C. HARDIN, Teacher.
