THE WORK OF A REAL SCHOOL

Good Teachers Are as Essential as Buildings.

INTEREST THE COMMUNITY.

The Wonderful Work of Pupils and Instructors at the Thorn Hill School. Children Take a Real Interest in Their Studies.

Perched upon a hill which overlooks a number of houses that appear to be playing leapfrog in their endeavor to get into the valley is Thorn Hill school. In these homes there are no rich people, and many of the girls and mothers are forced to go into the bottling works to help swell the Saturday pay roll.

The exterior of the school is rather shabby. Some pallings are missing from the fence, there is no walk, and the doors are scuffed. Inside the desks and furniture are mostly old, but there are decorations, and they are child made throughout. The white

curtains that temper the sunlight are plain, but have been neatly stenciled in bright, pleasing colors. The big ugly doorway between the two rooms is fringed with a unique portiere, which would puzzle the ordinary mortal as to its manufacture.

A line of nails in the door frame showed a brave display of baskets of all shapes and sizes. There was no effort at any slavish pattern, for each child had made a basket the size and shape he or she wished. That the work has proved fascinating is shown by the fact that half of recess time is usually voluntarily given to this work.

seen that the children would be helped by more finger work and a better perception of form and color. As there was no money beyond the bare conduct of the school the teachers and the parents gave a social and box party. The proceeds of the entertainment have been used to engage the services of an art teacher, who comes out from Frankfort twice a week.

A school garden is being planned for the coming spring, but for fear they may be disappointed at the last moment the children have arranged to cultivate small plots at home. These are to be entered in the contest, which is carried on under the auspices of the Franklin County Fair association.

A WINTER COAT

not only keeps cold out, but conserves body-warmth; body-fat serves the same purpose, it enables us to resist unsettled elements and serves as the great source of our body-heat. Greater body-warmth means richer blood, more fat, not obesity but fat which the body consumes for warmth, vitality, resistance-power—as a furnace consumes coal for heat—Scott's Emulsion does this. A teaspoonful after each meal makes body-warmth—healthy, active blood—sharpens the appetite and makes all good food do good. It drives out and keeps out cold by raising endurance-power and creating strength. Reject substitutes for SCOTT'S. Scott & Bower, Bloomfield, N. J., 13-51
