

## PHILADELPHIA FINDS GREATEST THING ON EARTH

Important Discovery Is Yours at Any Time—Cures Sores and Skin Diseases.

Read what this man says. After using only two cakes of Resinol Soap and one-half jar of Resinol Ointment he cured sores and eruptions of long standing.

"I had a very sore face, and after trying most everything I thought I would try your Soap and Ointment. After using two cakes of Soap and part of a jar of Ointment I found them to be the greatest thing on earth. I advise all those who suffer from any skin disease to use Resinol Soap and Resinol Ointment. I am glad to say that my skin is nice and clear and I intend to use Resinol Soap as long as I can get it.

"T. K. MATHEU, Philadelphia, Pa." It is evident that common sense requires everybody everywhere to have on hand, ready for immediate use, the one standard remedy for all skin troubles. It is Resinol Ointment, put up in screw-top oint containers and selling at fifty cents or a dollar, according to size. This ointment should occupy a prominent place in every bathroom, on every medicine shelf and in every traveling bag, that it may be ready for immediate use. Resinol Ointment does not contain a particle of lead or mercury or other poison. It is absolutely non-irritant, and cannot injure the most delicate skin. It is highly recommended by physicians and nurses. For years Resinol Ointment has remained the standard remedy, noted for its effectiveness and complete harmlessness. It is sold by druggists everywhere. Resinol Chemical Co., Baltimore, Md.

### THE LONG BOW.

Sharpe—Wilson says he stayed under water one day last summer for fifteen minutes.

Wise—Why, he must be amphibious.

Sharpe—No; he's a—well, I wouldn't like to say.

### Dying by Organs.

It has been discovered that if a human being dies after an ordinary illness and not a violent death he does not die all over and all at once.

He may have a disease of the heart or lungs, and this may be the cause of his death; but it has been found that if the diseased organ could have been replaced by a healthy one life might have been maintained indefinitely. This is no imagination or speculation. It has been confirmed by the most careful experiments by the ablest medical scientists in the country.—Leslie's Weekly.

### Unexpected.

Suddenly the umpire called time. "Aw, what's the matter?" demanded the catcher.

"Somebody in the grand stand applauded me," he said, wiping the blinding tears from his eyes, "and I wasn't prepared for that. . . . Play ball!"

### An Intangible Legacy.

"I dun heah, Liza, dat yo' Aunt Jerusha dun meek yo' her hair by de law. Dun yo' dun get?"

"Des 'zactly what I dun et up an' wore out."—Success Magazine.

### Her Method.

Mistress—Have you a reference? Bridget—Folne; oi held the pokes over her till I got 't.—Harper's Bazar.

### Consolation.

Knecker—My wife is always praising the men she rejected for me. Bocker—Never mind; she will praise you to her second husband.

"That's Good"

Is often said of

Post Toasties

when eaten with cream or rich milk and a sprinkle of sugar if desired.

That's the cue for housekeepers who want to please the whole family.

Post Toasties are ready to serve direct from the package—

## DAIRY

### CLEANLINESS IN THE DAIRY

Sanitary Condition of the Cows Has Much to Do With Bacterial Content of the Milk.

The cows as well as the dairy barn must be kept clean. Experience has shown that the sanitary condition of the cows has as much to do with the bacterial content of the milk as any other factor. The method used in certified milk dairies is first to place

Cow-Tail Holder.

the cows in a stall according to their size, to have sufficient bedding to keep them clean and comfortable to keep their hair short in the region of the udder, groom the cows every day, to wash them before every milking with clean, warm water and a brush, and just before milking each cow to clean the udder again with a clean, wet towel.

During fly time the tails of the cows to be milked are fastened with cow-tail holders, such as the one shown in the illustration. The pliers snap around the cow's tail and the rubber band is passed around the leg on the chain.

After the cows are washed, a small chain is fastened across the stanchions under the cow's necks to prevent them from lying down; after they are milked, the chains are unfastened and the cows are allowed to lie down.

The cow's ears are not removed immediately before milking, and nothing is done which will raise a dust, as dust is one of the most prolific sources of milk contamination.

### HANDY TRUCK FOR MILK CANS

Illustration Shows How Wheelbarrow May Be Converted Into Useful Low-Wheeled Vehicle.

The illustration shows how a wheelbarrow may easily be converted into a low-wheeled vehicle or truck for carrying milk cans of large size. The body of the wheelbarrow is removed and pieces put in to hold the can.

Handy Milk Truck.

One man can handle a 100-pound can with this truck much easier than two men in the usual way.

### MILK FROM DEVON WAS BEST

Celebrated Chemist, After Examination, Gives His Opinion as to Which Is Best for Babies.

Some years ago a celebrated chemist, after examining the milk of different cows, made the following report as to which was the best milk to raise babies on: The Jersey had too much oil in it, the Holstein too much cream, and the milk from the Devons was the best, as it had more sugar in it and nearer the milk of the baby's mother, says the American Cultivator. Just then a young mother died leaving a baby twelve days old, and it so happened that the father read this report, so he rented a fresh Devon milk cow and fed the babe on the milk of that cow for more than two years. She grew up to be a fine, large, healthy young lady, and at fifteen years of age was two inches taller than her father, and in her class at school with girls much older than she was.

### Silo Has Advantage.

The man with the silo is the man who has the advantage at this time of year when the dry spell strikes. Milk flow that is once decreased by dried up pastures can never be restored until the next freshening. Don't let the milk flow decrease.

### Attend Short Course.

If you are constantly having trouble with your churning, if your milk does not sour properly, if your butter is not sweet and firm, attend the short course in dairying at the state institute this fall.

### The Largest Apple Orchard.

One of the largest orchards in the east will be that just now under way by the Onondaga Orchard company, near Syracuse, N. Y. The capital is \$200,000 and about two hundred acres will be set to apple trees.

## DAIRY COW IN THE SUMMER

Fly Pests and Drought-Stricken Pastures Are Discouraging—Keep Animals Comfortable.

(By R. G. WEATHERSTONE.)

The late summer months are the most critical time of the year for the dairy cows and the most trying time for their owner. Fly pests and drought-stricken pastures are discouraging to a dairyman. Everything possible should be done to reduce the loss and suffering of the cattle during this period. I find that it pays to keep the cows inside during the heat of the day and feed supplemental forage crops and a little grain feed.

The sight of a herd of cattle stamping flies in a drought-stricken pasture does not speak favorably of profits and comfort. I have never been in favor of growing acres of forage crops and catch crops for selling purposes, for on the average farm it is not necessary.

However, it does pay to hold over an abundance of ensilage and cut either alfalfa, clover or corn to feed the cows when the pastures are failing. No catch crop exceeds these regular crops in the amount of quality of forage yielded per acre and when they are harvested in the ordinary way they will furnish the best feed for the herd during the winter.

In trying to save tons of hay and bushels of grain for winter feeding many men allow dollars of immediate profit to slip through their fingers, by holding back these crops for winter feeding when their animals are suffering and falling away in flesh condition.

It is far more sensible to cut and feed a portion of the green feed than it is to take the land out of the regular rotation and grow supplemental crops that are less desirable for selling purposes. It seems difficult to impress it upon the average man's mind that the best winter feeding crops are the best selling crops.

### MORE MILK FROM HOLSTEIN

Breed Does Not Always Indicate Good Milkers—Selection Should Be Made From Individual.

The breed does not always indicate good milkers. There are poor cows in all breeds and the selection should be made on the merits of the individual cow. However, the average Holstein cow will probably produce more milk than other breeds, but with a lower fat content than the Jersey or Guernsey.

Excellent Type of Holstein.

A few days after school opened in the spring a teacher in a Brooklyn school was testing the members of one of her old classes on what they had remembered of the definitions she had taught them during the preceding term. Finally she asked the bright boy of the class this question:

"Now, Robert, tell me what a hypocrite is?"

"A hypocrite," replied Robert without hesitation, "is a k' w'at comes to school wit' a smile on his mug."

### Went Up Twenty Points.

During the recent hot spell a broker in the commodity market was a friend of the dull trading. "Business," he said, "What can one do in the way of business with the mercury standing at 100?"

"Do!" replied his friend. "Great Scott, man; it's the chance of a lifetime to sell mercury."—Boston Evening Transcript.

### In the Sink.

My! Aren't they detestable!—those sneaky little roaches that creep and crawl all over everything. You know how they get there. But they can't dodge Hewitt's Easy Task Soap, and they can't abide it, so they clear right out. Hewitt's Easy Task Laundry Soap is white and pure; keeps stinks, bathrooms and pantry shelves clean and sweet and free from mustiness.

### Immortality.

"Speaking of immortality, what's the matter with the hen?"

"Go on."

"Her son never sets."

### Happiness, at least, is not solitary;

it joys to communicate; it loves others, for it depends on them for its existence.—Stevenson.

### Girl Manages Frog Farm.

A young woman twenty years old manages a frog farm in Alameda county, California. It consists of two acres of swampy land, but produces a fine profit, as she sells all the frogs she can raise at from two to three dollars per dozen.

### Mottled butter is generally due to improper working.

Udder troubles are frequently the result of bad feeding. More sunshine for the big producers, more fresh air for the whole herd. Sunlight and pleasant surroundings are great factors in stimulating large milk yields.

Dairy work is no longer guess work, but science. Simple, it is true, but all the same science. When the cream runs off the spoon like oil and has a slight acid taste it is usually ripe for churning. Salt on the casein in butter forms lighter spots and the remedy is thorough washing before salting.

### The cow should have a capacity to produce more milk than she is called upon to produce in ordinary dairy work.

The cow should be fed so that she will produce a full flow of milk and maintain practically the same flesh condition. From twelve to twenty-four hours before churning you should commence to ripen the cream, according to the time of the year. Dairying need not imply abandoning wheat, but more wheat on less acres. Both bread and butter should be produced on the farm. Grading of cream is receiving more attention by the dairy press and history than it possibly has in the dairy of the dairy business. Ever notice how the dairy business booms when the owner is interested in this work? There is too much lack of interest among dairymen.

The farmer who remembers the past winter and how he longed for silage to help out his high-priced feed, will be a silo builder this year.

## HOW IT HAPPENED.

"Poor man! How did you become a tramp?"

"I was a war correspondent in Manchuria, mum. I got so used ter doing outthin' dat I hadn't been no good since."

### PIMPLES COVERED HIS BACK

"My troubles began along in the summer in the hottest weather and took the form of small eruptions and itching and a kind of smarting pain. It took me mostly all over my back and kept getting worse until finally my back was covered with a mass of pimples which would burn and itch at night so that I could hardly stand it. This condition kept getting worse and worse until my back was a solid mass of big sores which would break open and run. My underclothing would be a clot of blood.

"I tried various remedies and salves for nearly three years and I was not getting any benefit. It seemed I was in eternal misery and could not sleep on my back or lean on a chair. I was finally given a set of the Cuticura Remedies and inside of two weeks I could see and feel a great relief. I kept on using Cuticura Soap, Ointment and also the Resolvent, and in about three or four months' time my back was nearly cured and I felt like a new being. Now I am in good health and no sign of any skin disease and I am fully satisfied that Cuticura Remedies are the best ever made for skin diseases. I would not be without them." (Signed) W. A. Armstrong, Corbin, Kan., May 26, 1911. Although Cuticura Soap and Ointment are sold by druggists and dealers everywhere, a sample of each, with 32-page book, will be mailed free on application to "Cuticura," Dept. 27 K, Boston.

### An Undefinable Definition.

A few days after school opened in the spring a teacher in a Brooklyn school was testing the members of one of her old classes on what they had remembered of the definitions she had taught them during the preceding term. Finally she asked the bright boy of the class this question:

"Now, Robert, tell me what a hypocrite is?"

"A hypocrite," replied Robert without hesitation, "is a k' w'at comes to school wit' a smile on his mug."

## FIGHT IN A COURT ROOM

Prisoner Is Killed After Fatally Wounding Officers and Shooting the Judge.

Christopher, Ill.—Attempting to escape an order sending him to jail, Martin Shadowen shot the judge who had ordered him held, the marshal and deputies who had arrested him, and, while trying to fight his way out of the crowded courtroom was shot to death.

His brother, Charles Shadowen, arrested with him, was thrown from a second-story window and probably fatally injured.

### Heat Hurts Cotton.

Dallas, Tex.—Damage to cotton is reported from a number of points as a result of the intense heat prevailing over Texas and Oklahoma during the past few days. Temperatures of from 104 to 115 degrees are recorded in reports of wide range over the cotton region of the two states, with no recent rainfall or any in prospect to relieve the conditions.

### In His Own Trap.

St. Louis.—Caught and killed in the trap he set for others proved to have been the fate of a black hander who exploded a bomb in a building occupied by many sleeping families on "Dago Hill." One man and a woman were killed and 14 were seriously hurt.

THOMAS J. O'BRIEN. Former Minister to Japan, who in the Diplomatic Shift Was Transferred to Italy.

### More Velvet Gone.

Washington.—Upsetting a practice of more than 30 years, the senate and house conferees agreed to eliminate an appropriation of an extra month's salary to all employees of the capital. This saves the government about \$140,000.

### May Enter Ministry.

Washington.—William Jennings Bryan, it is reported, is soon to enter the ministry and give up politics. He is scheduled to deliver a sermon from the pulpit of the Methodist Episcopal church at Salem, Ill., his birthplace.

### Short Pea Crop.

Chicago.—With the gradual rise in price of nearly all food products it was learned that the wholesale grocers of Chicago have lost thousands of dollars as a result of the short crop in peas.

### Dip \$1,000,000 Damage.

Antwerp.—Fire on the Queensland docks where much cotton is stored, did damage amounting to \$1,000,000. Immense quantities of snipeter were destroyed.

### \$42,395.69 in Legal Fees.

Washington.—It cost the Standard Oil Co. \$42,395.69 in court fees alone to resist the government's long fight to have it dissolved.

## THE MARKETS

### Cincinnati Grain Market.

More Than That? "Did they water the stock?" "They fairly turned the hose on it."

USE ALLEN'S FOOT-POWDER

Allen's Foot-Powder is the shoe for aching feet. It takes the sting out of corns and bunions and makes walking a delight. Sold everywhere. See the Allen's Foot-Powder tin package, address A. S. Gimsted, Le Roy, N.Y.

Wanted to Know. Ella—She has a rosebud mouth. Stella—Does that explain her making so many flowery speeches?

Important to Mothers

Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of **Dr. J. C. Fletchler** in Use For Over 30 Years. Children Cry for Fletchler's Castoria

He'd Get It. Howell—I want to get all that's coming to me. Powell—Well, stand right where you are; there'll be an automobile along in a minute or two.

The Age of Development.

We don't have to be gray-haired to remember the time when mother made soft soap with the fat savings, combined with potash, which were mixed with the same accuracy as when she put a pinch of salt into the stew. We call this "soap" by courtesy, but it wasn't a good soap to use. Hewitt's Easy Task soap is a scientific product—no guesswork, no excess of fat or alkali, which are both injurious, but real soap, which is absolutely effective. It is pure and white, made exactly the same for a quarter of a century—there are many imitations—insist on getting Easy Task.

Tit for Tat.

A young man, who had not been married long, remarked at the dinner table the other day: "My dear, I wish you could make bread such as mother used to make." The bride smiled and answered in a voice that did not tremble: "Well, dear, I wish you could make the dough that father used to make."

The Ground of Their L.

"Let us have peace," said Iliad invader. "Can you not the white strangers love the it?" "Ah, yes," replied the itellan, "they love the very green walk upon."—Sacred Heart Rev.

The Honest Man.

Diogenes was searching for a man who will advertise that his resort has mosquitoes," explained sage.

Hold fast to the highest ideals flash upon your vision in hours of exaltation.—Frances E. Willard.

Mrs. Winslow's Soothing Syrup for Children, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle.

A wise man may forgive, but no fool will forget.

## 50,000 Men Wanted in Western Canada

200 Million Bushels Wheat to be Harvested

Harvest Help in Great Demand

Reports from the Provinces of Manitoba, Saskatchewan and Alberta (Western Canada) indicate one of the best crops ever raised on the continent. To harvest this crop will require at least 50,000 harvesters.

Low Rates Will be Given on All Canadian Roads

Excursions are run daily and full particulars will be given on application to the following authorized Canadian Government Agent. The rates are made to apply to all who wish to take advantage of them for the purpose of inspecting the grain fields of Western Canada, and the wonderful opportunities there offered for those who wish to invest, and also those who wish to take up actual farm life.
