Illinois received the next highest number, 79,136; New Jersey, 68,921; Ohio, 51,050; Missouri, 15,286; Wisconsin, 15,878. Of the New England States Massachusetts found place for 48,091; Connecticut, 33,027; Rhode Island, 6,159; Maine, 1,642. Of the newcomers 22,673 went direct to California.

Since the year 1850 the population of foreigners in New York has increased from 515,000 to over 4,000,000, and I find of this number 600,000 are of foreign birth. Wonderful has been the increase in population of the United States within these 120 years of its national life. Stupendous has been its increase in wealth and rapid its rise to the position it now holds as a world power. The less than four millions of population at the time of the adoption of the constitution have grown to eighty-five millions, exclusive of our insular possessions, which add ten millions more to the total. That a very large part of this great increase in population has been the result of foreign immigration is beyond dispute.

Taking the census of 1900, the latest available figures, covering all points of the question, as a basis, out of a total population of 85,000,000 there were 65,843,302 native born, and 10,460,085 of foreign birth. True Americans have no prejudice against a man because he was born in a foreign land. They demand equal rights for him under the law, and accord equal privileges to him under their political system, if they can do so with safety to their country institutions. But with immigration so increasing and unrestricted, citizenship so easy and cheap, and a growing ignorance and lawlessness already holding the balance of power in three fourths of the States of our union, all patriotic citizens recognize the necessity for stricter immigration and naturalization laws, for a more general education of the youth of our land, and a deeper reverence for law and authority.

To the speedy accomplishment of these things the patriotism of today commands us against all lawlessness. We trust the virtue and courage of the American people against ignorance, bigotry and superstition we trust a free press, free speech.

The past history of these immigrants coming to this country has proved to us that they know little and care less about any principles involved in any issue to be decided by the vote of the American people. They are ready and willing to give their votes where it will profit them at the present time the most. They regard their votes as so much stock in trade to be used to their own advantage and profit. They flock together and vote not as Americans but foreigners forming distinct factions, and are being used by political parties, office seekers, who have no regard for patriotism, but are willing to lower the standing of patriotism in order to gain their points. The worthy and unworthy from all lands are crowding our shores to share our great fortunes. Vast multitudes, who are grossly ignorant and who are not in sympathy with our institutions, are annually coming and many are becoming citizens. Many have not left their political animosities behind them and make our soil the skirmish ground of conflicts to be fought in foreign lands with whose government we are at peace.

Many come for beggary and criminal conspiracies against our laws. Many will not work themselves nor permit other men to work. Many boycott their neighbors and deny to American boys a participation in trades that are thrown open to the foreign tramp, the escaped convict and exiled mendicant to enjoy.

Farmers in the Southwest are getting rich on the increasing value of their farms.

Not many years ago Illinois and Iowa land sold for ten dollars an acre. More recently Nebraska lands sold at that price. Look at them now. What makes them so high? The land is no better than it was then. What caused the price to go up? People—noting but people, and lots of them. History will repeat itself in the Southwest—only it will not take so long. The Southwest is growing very fast; much faster than any of the other States, Iowa or Nebraska land. But there is more land than there are people, that's the only reason it's so cheap. How long do you think it will take the Southwest to get as many people to the farm acre as Illinois or Iowa have? Just about five years—ten at the very outside. When that time comes you will have to pay just as much for land in the Southwest as you would pay in Illinois or Iowa.

Why not buy your farm in the Southwest now—when you can get it cheap—cheap enough for you to get a big one? A few years hence you will be looked upon just as the man who owns 640 acres in Illinois is looked upon to-day—as a substantial, well-to-do, leading member of your community.

The low rate excursions via the Rock Island-Price Lines the first and third Tuesdays of each month, offer you an opportunity to see the Southwest at very little cost. Take this opportunity to get away from the cold for a few days, and enjoy the delightful weather the Southwestern farmer is having.

Let me send you some interesting literature about the Southwest to read these long evenings. Our books about Missouri, Kansas, Arkansas and Oklahoma are full of photographs and reliable information—the very information a man thinking of settling in any of these States ought to have. I'll send you absolutely free one of these books you want.

The Rock Island-Price Lines have no lands for sale and are only interested in getting good, energetic settlers for the fertile unoccupied lands along their lines. To such men every help possible is freely given. Write today and let us help you find a better location.
