It is made of better material. It is lighter draft. It will turn soil more regular. It will slip and easier. It is longer lived. It is superior excellence over all other Plows. Do not fail to see this plow if you are thinking of making a purchase. I will be ready to do business in my new quarters by Monday. County Court Day. We are now selling our line of Cook Stoves for less than ever before. Write me.

Brave Old Sickles Will See That Gomez Gets All the Guns.

In an address on the Cuban question, delivered last week before the Brooklyn Democratic Club, in Historical Hall, Gen. Daniel E. Sickles made the announcement that he was ready personally to take charge of the consignment of arms for the Cuban insurgents. "I will personally dispatch them," he said, "and I will control them." Gen. Gomez. I would defy all interference and I would be ready to accept all the consequences of my action. "I make this statement not in defiance of the law and of the authorities, but because I know that such an act would be perfectly lawful and in line with the uniform decisions of our courts."

During the course of his address Gen. Sickles declared that because of our traditional position of not allowing any foreign power to interfere with the Spanish war of Cuba, this country has resumed the responsibility for whatever relief shall be given to Cuba from the oppression and wrong under which it is now suffering. He stated that the United States owes civilization to interfere; he was in error or in immediately recognizing the belligerency of the insurgents and sending the idea of war with

Seven Hundred Men Quit Work.

As a result of a 10 per cent. reduction in wages 700 of the 900 employes of the Norton Bros., tin works at Maywood, Ill., struck last Tuesday. According to Manager Norton, however, only one-third of the men have struck, embracing only unskilled laborers. The strikers are now in an angry mood, and trouble is apprehended.

Little Johnny has been naughty, and has to be sent from the table without having any desert. For an hour he has been sitting in the corner of the room crying. At last he thinks it time to stop.

"Well, I hope you have done crying now," says his mother.

"Haven't done," says Johnny, in a passion, "I'm only resting."

WHAT CAN BE DONE

To Secure The Railroad to Walnut Grove, Morgan County.

Talk is revived about the building of a railroad to the canal coal fields of Eastern Kentucky, especially in Morgan county. The time will come when many resources of Eastern Kentucky must be developed. Our city ought to have more roads. We clip the following from the Morgan county Messenger of the 4th:

"Capt Broas has been in town for several days examining the county records of property in Morgan county, and South of Walnut Grove. It is thought now that work will be begun on the railroad from Jackson to Walnut Grove in the spring. While we would much prefer it from Morehead by the way of West Liberty or the mouth of Caney, we are willing to take it in any way we can get it, and if the Morehead route is absolutely abandoned, and we believe it is, we hope to see the cars running to the Caney coal fields before the end of the year from Jackson or some other point on the L. & E. K. railroad."

HUNGER

In Louisiana's Drought Cursed Parishes.

Twenty Thousand People Are Destitute.

The suffering among North Louisiana people through the failure of crops from the long drought of last summer, has proved greater than anticipated. A correspondent from the stricken district says: "I have traveled 200 miles in a buggy, and in a house to house canvass I find the situation growing darker all the while. There are 20,000 destitute people in the parishes of Wynn, Jackson and Lincoln, with many sick, others naked and hundreds nearly starved. White women are begging, barefooted on the highways. The situation is appalling. Unless outside aid can be secured, and promptly, this State will soon be confronted by anarchy."

A New Motor.

William Henry, an engineer of Ludlow, Ky., has just completed an invention for propelling railway engines by means of compressed air. The reservoir or air retort, which takes the place of the boiler, is charged with compressed air at a pressure of 600 pounds. This supply will run an ordinary engine with four or five coaches a distance of 150 miles without being replenished. The machinery is so constructed that the action of the driver recharges the supply, compressing the air to be used as power.

Judge Perry, of Lexington, has become interested in the project and has organized a stock company, with \$1,000,000 capital, to push the enterprise. Hanley has completed a working model, which will be sent to the department at Washington, with an application for a patent upon his work.—Owenton News.

When visiting a sick person, endeavor to sit where the patient may see you without making an effort to do so. Under any circumstances it is always more satisfactory to whom one is talking, and nothing is more fatiguing to an invalid than to be obliged to twist into an uncomfortable position in order to see the visitor. The good effect of the most cheery talk will be nullified by the fatigue of the patient.

Don't speak of depressing subjects; don't refrain from talking of all uses that you have known or unless by so doing you can cheerer more hopeful. Tell cheery things you can, bits of news, but don't even though urged to Links.

NEW SILVER DAILY,

THE LOUISVILLE DISPATCH

TO BE STARTED

MARCH 1, 1897.

Will advocate true BI-METALISM and will support all Democratic nominees—National, State, District, County and City.

There is not a Metropolitan Paper in Kentucky that advocates the paramount issue of the American people—the FREE COIN SILVER—that doctrine which is fast becoming the white people of this country, two-thirds of the intelligence and two-thirds of the property holders of the State.

That a daily paper representing the idea in accord with nine-tenths of the Democrats of Kentucky should be started, there can be no doubt. If you are a Democrat and favor the Free Coinage of Silver, and are tired being called a repudiator, fanatic, crank, etc., etc., by the so-called Democratic papers of Louisville, encourage the new paper by subscribing for a little of the capital stock thereof.
