WHY WILSON?

Because he is the greatest leader of Democracy since Andrew Jackson.

Because he is the most popular Democrat in the country, as an evidence of which there is no opposition to his renomination.

Because he is an executive who does things.

Because he has redeemed all of the important pledges of the party made in the Baltimore platform.

Because he has given the country a banking system which prevents a panic and prevents any bank from failing that is solvent.

Because the country is more prosperous under his administration than ever before.

Because he has kept the United States out of war and is the great peace President.

Because he is the greatest diplomat who ever sat in the White House, forcing Germany to agree to his ultimatum in regard to submarine warfare.

Because he is honest and capable

Because he has not allowed the money power to control and dictate to the business of the country.

Because he has been fair and just in dealing with all the great problems of the day.

Because he has had more questions to settle than any other President and because he has settled all of them right.—Elizabeth-town News.

JULIA CLAUSSEN, EMINENT CONTRALTO OF THE CHICAGO GRAND OPERA COMPANY.

THE great musical climax of the entire Chautauqua program comes again this year on the closing night, when Julia Claussen of the Chicago Grand Opera Company, whose successes of the recent opera season have even surpassed her former achievements, will appear in a concert. She will be assisted by Pierre Henrotte, concertmeister of the Chicago Grand Opera Company, and Marcel Charlier, also one of the leading conductors of Chicago Grand Opera.

A year ago, when Miss Alice Nielsen toured the Redpath Chautauquas, it was then widely stated in the musical journals that the Chautauqua opened a new field to the greatest musicians. The fact that another such great artist as Julia Claussen has been engaged for this season and that the assisting artists are also well known in the grand opera world at once establishes the fact that the move to give the Chautauquas the greatest music was not a spasmodic one, but permanent.

Institutional Treatment for Tuberculosis

means that the patient is given constant attention; that the regime which is found to be best adapted to the case is rigidly adhered to; that a resident physician is at hand all of the time, studying the case and adapting the treatment to it; that nursing service is of the best. All of these things mean improvement, greater comfort and possible recovery. Hazelwood is operated without profit by the Louisville Anti-Tuberculosis Association. Rates \$12.50 a week. Bulletin No. 1

A Mistake in the Policy of the Bethlehem Steel Company

To the People:

The Senate of the United States has passed a bill to spend \$11,000,000 of the People's money to build a government armor plant. The measure is now before the House of Representatives.

It is said that manufacturers of armor have "gouged" the country in the past, and that a government plant is necessary to secure armor more cheaply.

The mistake of the Bethlehem Steel Company has been that it has kept quiet.

We have allowed irresponsible assertions to be made for so long without denial, that many people now believe them to be proven facts.

We shall make the mistake of silence no longer.

Henceforth we shall pursue a policy of publicity. Misinformation will not be permitted to go uncorrected.

It is and has been the policy of our Company to deal with the American Government fairly and squarely.

We shall henceforth place the details of our relations with the Government before the American People.

The United States has for twenty years obtained the highest grade of armor and has paid a lower price for it than has any other great naval power.

Figures officially compiled for the Senate Committee on Naval Affairs from the Naval Year Book show that under conditions prevailing just before the European war, the chief naval powers of the world were paying these prices for armor:

England, \$503 per ton; France, \$460; Germany, \$490; Japan, \$490; UNITED STATES, \$425.

A government plant cannot make armor any cheaper than we can do it; and—

We are prepared to manufacture armor at any price which the Government itself shall name as fair. THAT BEING SO, SHOULD \$11,000,000 OF THE PEOPLE'S MONEY BE WASTED TO BUILD A GOVERNMENT PLANT?
