

ASSIGNEES' SALE OF Bourbon Co. Land

The undersigned Assignees of John G. Smedley will, on

SATURDAY, MARCH 20, 1897,

at the Court-house door in Paris, Bourbon County, Kentucky, at 11 o'clock, solar time, expose to public sale an undivided one-fourth interest in the following tract of land situated near Hutchison Station, Bourbon County, being the property of John G. Smedley. The land is described by metes and bounds as follows:

Tract No. 1, the large piece lying on the north west side of the Maysville and Lexington Turnpike, contains one hundred and twenty five acres, one road and twenty one poles (125 A., 1 R., 21 P.) and is bounded as follows: Beginning in the middle of said turnpike at 1, (see plat) a corner to Mrs. Waller and running therefrom with the middle of said turnpike S 49 1/2 W 303 4-5 poles to 2, a corner to Corbin, thence N 44 W 54 72-100 P to 3, a stone corner to the same, thence N 10 1/2 E 83 28-100 P. to 4, a stone corner to the same and Steele, thence S 71 3-4 E 77 52-100 P to 5, a stone corner to said Steele, thence N 19 1/2 E 96 96-100 P to 6, a stone corner to the same and Mrs. Waller, thence S 69 E 26 1-5 P to 7, a stone corner to said Waller, thence N 19 E 3 45-100 P to 8, a stone corner to the same, thence N 52 1/2 E 63 P to 9, a stone corner to the same, thence S 73 1/2 E 77 32-100 P to the beginning.

Tract No. 2, the small piece, on which the dwelling house is situated, contains twenty five acres, two roads and eight poles, (25 A., 2 R., 8 P.) and is bounded as follows: Beginning in the middle of the Maysville and Lexington Turnpike at A, (see plat) a corner to J. Jacoby, and running therefrom with said Jacoby's line S 59 1/2 E 24 4-5 P to B, a stone corner to Mrs. Steer, thence S 21 1/2 W 86 36-100 P to C, a stone corner to the same, thence N 62 1/2 W 69 44-100 P to D, the middle of said turnpike, thence with the middle thereof N 49 1/2 E 94 28-100 P to the beginning.

Tract No. 3, which fronts on the Maysville and Lexington and Hutchison Station Turnpikes, contains sixty-six acres and one road, and is bounded as follows: Beginning in the middle of the Maysville and Lexington Turnpike at E, a corner to the Hopewell Church lot, and running therefrom S 46 1/2 E 26 1-5 poles to F, a post corner to the same, thence N 42 1/2 E 12 48-100 P to G, the middle of the Hutchison Station Turnpike, thence with the middle thereof S 60 E 70 2-5 P to H, a stone corner to Mrs. Pryor, thence S 41 1/2 W 123 52-100 P to I, a stone corner to Mrs. Waller, thence N 42 1/2 W 64 44-100 P. to J, a stone corner to the same, thence N 42 W 44 28-100 P to K, the middle of the Maysville and Lexington Turnpike, thence with the middle thereof N 49 1/2 E 86 32-100 P to the beginning; making a total of two hundred and seventeen acres and twenty-nine poles (217 A., 29 P.) in the 3 tracts.

TERMS.—The property will be sold upon a credit of six, twelve and eighteen months. The purchaser will be required to furnish bond immediately after the conclusion of the sale, with good and sufficient surety to be approved by the undersigned, bearing interest from day and date of sale at 6 per cent. Default of payment of either bond at maturity matures subsequent bonds.

A. & B. D. SMEDLEY, Assignees. A. T. FORSYTH, Auctioneer.

The First Battle

OSCAR W. MILLER has received the exclusive agency for this and adjoining counties for the sale of Bryan's new book, entitled "The First Battle." It is written in Mr. Bryan's best style—clear, concise and logical. His inspiring language, full of keen satire and brilliant rhetoric will, charm, interest and instruct, not only those who were his most devoted followers but also his most ardent opponents. The book contains about 600 pages printed from large, clear type, with 32 full page illustrations; a magnificent colored presentation plate and an autograph preface; handsomely bound in cloth, half-morocco or full morocco, at \$1.75, \$2.25 and \$2.75 each. Mail orders will receive prompt attention. Address, OSCAR W. MILLER, Hutchison, Ky.

Cottage For Sale.

I HAVE a desirable 1-story 3-room frame cottage, on Eighth street, near the Georgetown-pike bridge. The lot is 47 feet front building back 165 feet; has big, never-failing spring; rents easy for \$6.00 per month. Will sell for cash or on 6 and 12 months without interest. Apply to or address, P. LENIHEN, Paris, Ky. (19feb-1mo)

ICE! ICE!

TO THE PATRONS OF THE PARIS ICE MFG. CO.: We appreciate your past patronage. We are now ready to quote prices for next season, and will not be undersold by anybody. Remember our ice is of pure distilled water. PARIS ICE MFG. CO., PHIL NIPPERT, Manager. (19feb)

FOR RENT.

TWO-STORY brick house, on Upper Pleasant street, adjoining the residence of S. S. Clay. Apply to A. C. ADAIR. (29sep-tf)

Sporting Salad.

Dave Foutz the ball player, died Friday near Baltimore.

The baseball season at the K. U., Lexington, opened yesterday. Several Paris boys will be on the team.

The State bicycle meet will occur at Cynthiana about June 20th. There will be a big tour from Louisville, Lexington and Paris.

Five of the Bourbon Ramblers made the first run of the season [Sunday] afternoon to Millersburg. The roads are only in fair condition. There will be a road race [Decorated] day from Lexington to Paris, Winchester and back to Lexington, and as soon as the weather permits the boys will be out training for it.

Porous Tires.

BICYCLE dealers who want to educate riders to use the form of tire which will give both rider and dealer the least trouble, would do well to remember the following, printed February 6, 1897, by the L. A. W. Bulletin, official organ of the League of American Wheelmen: We often hear about "porous tires," but never without a feeling that somebody may be mistaken. The fact that air comes through the outer surface of a tire numerous places is by no means conclusive evidence that there is more than one leak in the inner tube. Although tires are classified as inner tube and hosepipe, the idea conveyed to the mind of a novice is erroneous, since all tires have inner tubes—the principle difference being that the hosepipe tire the inner tube is vulcanized fast to the outer part of the tire. In the case of a tire in which the inner tube is separate (called the inner tube tire) the inner, or air, tube may be taken out an immersed in water while it contains just enough air pressure to stretch it slightly above its natural size. If it contains any holes, however small, the air will rise through the water in small bubbles; and if such a tube is found to be "porous" while it is yet new, it should be returned to the manufacturer. This, however, will be extremely rare, as the method usually employed prevents such results. If numerous bubbles rise from different parts of a hosepipe tire at the same time (and we believe it is in this form of tire that is most often accused of being porous), the chances are that the air is leaking through one hole in the inner tube, and that it divides into numerous channels before it reaches the surface.

The threads, of which all tires are made mesh, and often do, act as minute tubes which convey air from some leak at the inside, and let it escape at one or more openings some times quite a distance from the actual puncture.

Great care should be taken in plugging a hosepipe tire to prevent any fibre of the canvas from forming a connection between the inside of the air tube and the main part of

The cut shows in an exaggerated fashion the manner in which air frequently finds its way to the outside through the threads. After any tire has been used for some time, the outer rubber, which comes in direct contact with the road, will receive many little cuts or punctures which extend only from the surface in to the first layer of canvas, and it is through these surface punctures that the air escapes, even though sometimes it may first follow the canvas for several inches.

Instances have been known where the actual leak in the inner tube was on the opposite side of the tire from the point where the leak appears to be. There are some American riders who do not know that the cycling public of Europe, after long experience, long ago adopted double-tube tires as the only satisfactory ones. Any American rider who knows what a nuisance porous tire are will back up this experience. While in America the Morgan & Wright (double-tube) tire is sold at a very reasonable price and under a liberal guarantee, its construction is patented, so that other tire makers have tried to force into favor single-tube tires, which failed in Europe.

Year after year these single-tube makers bring out a new idea for successfully stopping leaks and repairing punctures, and year after year they fail, and the man who buys generally pays dearly for the experience.

In the Morgan & Wright construction the porosity is avoided, and when one of these tires is punctured the repair is permanent. Inside of the inner tube lies a strip of rubber, called the quick-repair strip. To repair a puncture, simply inject some M. & W. quick-repair cement inside the inner tube, press down, and pump up. See that the tire is pumped up, however, while the cement is being injected, so that the cement will get into the inner tube. Riders who use M. & W. tires and follow this simple instruction when the tires puncture, will save themselves and dealers from the trouble of porosity and imperfect repairs.

Change Of Time.

The Queen & Crescent changes time Sunday, February 28th. Schedules between Cincinnati and Lexington are shortened up on several trains. The Blue Grass Vestibule leaves Cincinnati at 4:00 p. m., instead of 4:15 arriving at Junction City at 3:30 p. m. Train No. 3, leaving Cincinnati at 8:00 p. m., reaches Georgetown 10:15 p. m. North-bound train No. 6 leaves Somerset 12:10 instead of 12:25 p. m., Georgetown 3:19 and arrives Cincinnati 6:05 p. m. Other trains practically unchanged.

Incomparable.

The service on the Queen & Crescent fast train North Through Pullman drawing room sleepers. Standard vestibuled day coaches (lavatories and smoking rooms), elegant cafe, parlor and observation cars. Nine and one-half hours to Cincinnati, 10 hours to Louisville from Chattanooga. O. L. MITCHELL, Div. Pass'r Agt., Chattanooga, Tenn.

Comfort.

No dust or cinders on Queen & Crescent Route limited trains North. Rock ballast Superb trains, with every comfort. Fast time and the short line to Cincinnati.

To Cure A Cold In One Day.

TAKE Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. 25c. For sale by W. T. Brooks and James Kennedy, Paris, Ky.

FIFTY PEAR TREES FOR \$1.00.

FARMERS—Grow your own Pear Trees. For one dollar I will send you, postage paid, the following fifty pear trees, all grafted on Japan Seedling Stock: 10 E. Harvest, 10 Bartlett, 10 C. Favorite, 10 F. Beauty, 10 Idaho. If you send in your order before February 15th, I will include one Lincoln Coreless—no seed, no core. Reference, any bank at this place. Address, GEO. A. RILEY, Greensburg, Ind.

A DREADFUL DISEASE

INFORMATION OF VALUE TO EVERYBODY ABOUT APPENDICITIS.

A Dangerous Superstition—Popular Errors on the Subject—How to Recognize the Danger Signs—Between the Ages of Ten and Thirty It is Most to Be Feared.

There is a popular and false notion that appendicitis is caused by a grape seed, an orange seed or some other foreign substance getting into the vermiform appendix. The true cause is the setting up of inflammation and consequent gangrene in the tissue of the appendix, usually due to insufficient circulation of blood in the part itself. In thousands of operations which have taken place—many in time to save the life of the patient and many too late—there is not one authenticated case of a foreign substance, such as a seed, being found in the appendix. This will be more fully realized when one has in mind that the interior of the appendix is only big enough to admit a medium sized darning needle. Its great liability to disease is due entirely to its low order of vital resistance—that is, it is an organ which appears to have no actual use in the present machinery of man, but in the earlier stages of man's development it is believed to have been a large pouch that played an important part in the digestive operations of the human system. By ages of disuse it has gradually shrunk to its present dimensions and is known to science as a vestigial organ, one which is only a remnant of its former self and possessing but a vestige of its original functions.

This becomes more clear if some other parts of the body which now seem to have no use are considered. The tonsils are in this class and also the wisdom teeth, and both are peculiarly subject to disease.

The appendix is in one of the most delicate and vital parts of the body, in the peritoneal cavity, usually to the right of the center of the abdomen.

But in rare instances it has been found on the left side, and still more rarely otherwise displaced. This discovery, made very recently, has caused the surgeons to be extremely careful to locate the trouble before using the knife.

But science never stands still. It always pushes its investigations beyond mere appearances, and out of the mysteries of nature develops facts which give it power and might. When it was once proved that the poison which produced septic peritonitis came from the breaking down or decay of the appendix, the very root of one of man's worst physical foes was laid bare. Further practice established beyond a doubt that in a large majority of cases the appendix could be removed by a simple surgical operation and the patient restored to vigorous health, if the disease was discovered in time and correctly diagnosed.

The surgeons now regard the operation itself as one of the most simple, but to obtain the best results it should take place within a few hours after the patient begins to suffer from the disease. In fact, the sooner the operation is had the better are the chances of recovery, while if the knife is not resorted to death is sure to ensue very promptly or after lingering miseries from the deadly poison perambulating through the system and coming to the surface in abscesses.

The symptoms are so plain and unmistakable to the surgeon of today that any sufferer may know them for himself: First.—The attack is always sudden. It comes on when the person is apparently in the best of health and without the slightest warning.

Second.—A sharp pain is felt in the very center of the abdomen. This is always the case, whether the appendix be in its correct place on the right side or displaced to the left.

Third.—A sore and tender spot, very painful to the touch, is located exactly where the incision must be made to find the appendix.

These are the three plain symptoms which have been found in thousands of cases with scarcely a variation.

Thus it is that many sudden deaths occur to persons in robust health. They are thought to have a colic or a vertigo, when the truth is that miserable and useless little organ, the appendix, has met with some kind of an accident and clogs the whole machine.

Appendicitis usually occurs between the ages of 10 and 30 years. It is extremely rare above or below those ages. It is much more frequent among males than females, the proportion in all countries being 20 per cent females to 80 per cent males.

The cause for this difference is of very recent discovery, and is not even known generally among the medical profession. Dr. Clado, a French surgeon and investigator, sought an explanation of the comparative immunity of the female sex from the malady, and discovered that the appendix in woman has an extra blood vessel that does not exist in man. This discovery was hailed with delight by the surgical world. It was not only a bit of new knowledge of infinite value, but was an additional proof of the theory that the collapse of the appendix is always due to its want of vital resistance.—New York Journal.

Cold Cures. A plan is being recommended by French physicians to cure colds by applying ice to the spine. Indeed, nowadays the curative value of cold is being highly spoken of, and the inflammatory sore throat which used to be treated by poultices and warmth is now said to be easily and quickly cured by sucking ice and keeping the patient in a low temperature.

Utility. "Your daughter has had a great many admirers." "Oh, yes! She puts nearly all her window curtains on the rods with her old engagement rings."—Chips.

TWIN BROTHERS' 10 GREAT BARGAIN DAYS,

CLOTHING, OVERCOATS, SUITS, PANTS, SHIRTS, HATS AND CAPS, UNDERWEAR, BOOTS, SHOES, ETC.

TEN GREAT BARGAIN DAYS,
