**One Divided by Naught.**  
Four men sitting together were confiding to one another their general ignorance of the matter contained in textbooks. One said he had studied algebra for three years, but he would find it impossible to solve the simplest problem by an algebraic process. Another said he had been counted a good student in geology, and yet he doubted if he could name the principal periods in their proper order.  
"Now let's see how much you do know," said one of the men. "How much is one divided by naught or nothing?"  
"One divided by nothing?" repeated the man at his right. "Why, that's one. If one isn't divided by anything, it remains one."  
"I think the answer is nothing," said another. "One divided by nothing is—nothing. Sure, that's right."  
"You're the worst I ever heard," said the man who had given the problem. "One divided by nothing—that means how many times is nothing contained in one. It is contained an infinite number of times, and the correct answer is—infinity."  
Then he had to talk to them for five minutes in order to convince them.—Chicago Record.

**GREENBACKS**  
or Government Money.  
At close of our Civil War in 1865, there appeared in the London Times the following:  
"If that mischievous financial policy which had its origin in the North American Republic during the late Civil War in that country, should become indurated down to a fixture, then that government will furnish its money without cost. It will have all the money that is necessary to carry on its trade and commerce. It will become prosperous beyond precedent in the history of civilized nations of the world. The brain and wealth of all countries will go to North America. THAT GOVERNMENT MUST BE DESTROYED OR IT WILL DESTROY EVERY MONARCHY ON THIS GLOBE."  
The famous Hazzard circular, to capitalists in New York, and the Bull Bank circular to United States Bankers, both emanating from London, and the fabulous corruption fund raised in England and Germany, estimated at \$1,500,000, were the agents that secured the closing of our mints against silver.  
The "walk into my parlor" policy of England, during and since the Spanish War, is the latest evidence of English Diplomacy in shaping the destiny of the United States Government.  
Notwithstanding the famine price of wheat, the Spanish War, and fabulous expenditures of money by our government during the past year, gold has increased in value eleven per cent. and all other values decreased in the same proportion.  
For a thorough understanding of the money question, or silver issue, the Cincinnati Enquirer has uniformly given evidence of its ability to teach, explain and produce all facts and truth. It is a paper that ought and can be read by all classes with pleasure and profit.

**The Heliograph.**  
With all its superiority in distances the heliograph is too uncertain for sole reliance. A passing cloud is sufficient to interrupt the clearest signals, perhaps in the critical moment of a battle, or a sun haze may render invisible the rays from the largest mirror, so that at any time without a clear atmosphere the system is useless.  
It is not known that the heliographic system has ever been in use on shipboard, and the sea service has nothing for daylight signaling that approaches its accomplishment in dry atmospheres. For night service at sea the flashlight appears to be the best system of signaling in all weathers, though on rare occasions the long beam of the electric searchlight thrown up on the sky has proved effective for communication when it was possible by no other means. An instance of such use was reported a few years ago by two British ships, which while on opposite sides of a high promontory nine miles in width opened communication with each other by means of dot and dash flashes on the sky from their searchlights.—Lippincott's.

**Gladstone's Doings and Undoings.**  
Mr. Gladstone began as the defender of the Irish church; he ended by demolishing it. No one ever opposed more vehemently the extension of British influence in Egypt, but it was under his government we bombarded the Alexandrian forts, fought the battle of Tel-Kebir and reduced Egypt to the condition of a British satrapy. He was the most conspicuous advocate of peace with Russia when Lord Beaconsfield was in office, until Constantinople was in danger. Five years later he left office, after having brought us to the very verge of war with Russia for the sake of Penjdeh. One year he clapped Mr. Parnell into prison, the next he proposed to make over to him the government of Ireland, and then again he deposed him from the leadership. Yet he was always consistent and anxious for his consistency. Circumstances alter cases, and Mr. Gladstone was not above being taught by events.—W. T. Stead in Review of Reviews.

**True to Principles.**  
A New South Wales country school teacher recently gave a boy a question in compound proportion for home work which happened to include the circumstance of "men working ten hours a day in order to complete a certain work." Next morning the unsuspecting teacher in looking over the little pack of exercises found Jim's sum unattempted and the following letter inclosed in the page:  
"Sur—I refuse to let Jim do his sum you give him last nite has it looks to me to be a slur at 8 hour sistum enny sum not more than 8 hours he is welcum to do but not more. Yours truly,  
ABRAM BLANK, SCHR."
