

A Cough

"I have made a most thorough trial of Ayer's Cherry Pectoral and am prepared to say that for all diseases of the lungs it never disappoints."

Ayer's Cherry Pectoral won't cure rheumatism; we never said it would. It won't cure dyspepsia; we never claimed it. But it will cure coughs and colds of all kinds.

Three sizes: 25c, 50c, \$1. All druggists.

Consult your doctor. If he says take it, then do as he says. If he tells you not to take it, then don't take it. He knows. Leave it with him. We are willing.

J. C. AYER CO., Lowell, Mass.

Earth's Bendings. Little bendings are in progress all the time the world over. The "immovable" hills are bowing and scraping to each other constantly.

And in London, too, where earthquake sensations are practically unknown, the earth bends daily, and the buildings, like the hills and the mountains, nod to their friends opposite when the morning traffic begins.

Helme said that even the trees made obeisance to Napoleon I when he entered Berlin. This was imaginative, yet truthful, for the weight of the crowd along Unter den Linden made a tilting sufficient for Professor Milne's pendulums to have recorded distinctly.

How to Learn to Like Pictures. The following suggestions, if you please, are not from an artist nor even from a connoisseur, the writer being nothing more than an ordinary picture lover.

Never thought of such a sign for a medicine did you? Well, it's a good sign for Scott's Emulsion. The body has to be repaired like other things and Scott's Emulsion is the medicine that does it.

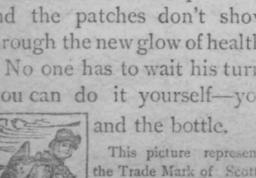

These poor bodies wear out from worry, from over-work, from disease. They get thin and weak. Some of the new ones are not well made—and all of the old ones are racked from long usage.

Scott's Emulsion fixes all kinds. It does the work both inside and out. It makes soft bones hard, thin blood red, weak lungs strong, hollow places full.

No one has to wait his turn. You can do it yourself—and the bottle.

This picture represents the Trade Mark of Scott's Emulsion and is on the wrapper of every bottle.

HINTS FOR FARMERS

The Fly Plague.

At the Wisconsin station they divided 14 cows into two lots as nearly equal in condition as they could make them, and one-half were sent to pasture according to the usual custom of farmers, though in a small field with plenty of shade during the day.

Sunlight in Stables. A recent experiment demonstrated the value of sunlight in the stables. Twenty-four healthy cows known or believed to be free from tuberculosis were divided and one-half put in a dark stable, the others in a stable into which the sun shone freely.

Sheep Fertilize the Land. Fertile farms and well kept fields have always been associated with sheep, says an Iowa farmer in Prairie Farmer.

Bots in Horses. No medicine that can be given the horse will kill the bots, says The Horseman. Anything that can get through their skins will first destroy the stomach of the horse.

Packing Apples For Storage. Apples that are to be put in cold storage should be carefully picked and assorted as soon as they are well matured, then packed snugly in barrels, headed up to almost an airtight condition and stored at once.

Grain Fed Lambs. The more rapid increase in growth of lambs fed grain as soon as they can be induced to eat it stimulates the constitutional vigor and ability of the animals not only to eat more food and make a correspondingly greater growth in a shorter time until final maturity, says American Sheep Breeder, but it stimulates the sexual functions so that earlier breeding is encouraged and made safely possible for both the young ewe and its lamb.

Fighting the Hessian Fly. The Hessian fly that has developed in the spring from the maggot that lived all winter in the roots of the wheat plant deposited its eggs on the blades of the wheat, and these during the early summer reach the maggot stage and may be found in the first joint of the stalk, says Colman's Rural Worker.

Nonproducing Fruit Trees. Vigorous trees which fail to produce fruit may be grafted with fruit buds from other trees during August and September. The following season fruit will be produced. This is the result of tests made in Germany.

AN ODD PROPOSAL

"Dear me, I've been saving up something all day to ask you, and now I can't remember what it was," says her visitor, settling himself on the divan.

"Now, don't add 'it must have been important,'" she says somewhat crossly, keeping her pen suspended over her interrupted letter.

"It wasn't so very," he answers serenely. "I remember now. I was just wondering whether you would want me to put on my dress suit for dinner every night if we were married."

"The pen descends on the half filled sheet. 'If you're going to be funny, I wish you'd choose some other time for it,'" she says, writing busily. "I want to write to catch the overland."

"Are you writing to that everlasting best girl of yours?" he asked. "I'm writing to Miss Austin, if that is whom you mean," she answers coolly.

"Well, tell her there's a tiresome man just come in to propose to you, so you must tear yourself away long enough to accept him," he says, putting another cushion behind his head.

"I never saw what isn't true in my letters."

"Don't you? Oh, mine are a perfect tissue of falsehood, though I am not much of a liar in everyday life. I don't exactly mean to, but I'm always finding myself writing, 'All the city is asleep. The house is mysteriously silent, and my fire turned into Cinderella as the clock struck 12, but I just send you a line before I—' and so on, when really it's 10 o'clock in the morning, and I'm sitting between a typewriter and a telephone. I suppose it's my picturesque imagination that makes me do it."

"Or perhaps the idea of a possible biography," she suggests, not without scorn.

"How would you like to write it?" he asks, unsmiling. "We could work it up together, and you could add the last sad touches after I had flickered out. The other day I was looking over the various letters and notes you've favored me with, and I decided that you would be just the person for it. You have rather a nice little way of expressing yourself."

"Do you mean to say you keep your letters?" she asks in a tone of surprised remonstrance.

"No, but I keep yours," he answers, smiling contentedly at her and feeling for a cigarette. "May I?" he adds, striking a match and shielding the flame in his hand.

"No, I'd rather you didn't," she says, intent on her letter. "It is my day at home, and more people may come even yet."

He blows out the match with a sigh and drops it down behind the divan.

"Aren't you going to let your husband smoke on your day at home?" he asks.

"He won't be around on my day at home," she says, laughing a little in spite of herself. "He'll be down town trying to pay for the tea and cakes."

"Poor devil!" murmurs her visitor, rolling the cigarette affectionately between his fingers. "Wouldn't you want to have him around?" he asks presently.

"Depends on the man," she says half absently from her desk. "How do you spell psychological?"

"I don't," he says resolutely. "I would not for anything. You never mind my dropping in at teatime, do you?"

"H'm!" "You rather like it, don't you?" "H'm, h'm!" "You'd find it rather pleasant to have me dropping in every day about this time and staying to dinner, wouldn't you?"

"What are you talking about?" she exclaims, lifting her head impatiently. "Why, if you should marry me."

"Well, I'm not going to marry you, and I'm not going to get this letter finished if you don't go away."

There is a silence, broken only by the frantic scratching of her pen. "Some one wishes to speak to you at the telephone, miss," says a voice from the doorway.

THE PROLIFIC FLY.

To Lessen the Pest All Organic Refuse Should Be Buried.

Flies multiply at a prodigious rate. Given a temperature sufficiently high to hatch eggs, their numbers are only limited by the amount of food available for them. Linnaeus is credited with saying that three meat flies, by reason of their rapid multiplication, would consume a dead horse quicker than would a lion, and the fact that certain diptera having some outward semblance to the honeybee lay their eggs in the dead carcasses of animals probably led Sanson and Virgil to make erroneous statements with regard to the genesis of honey and the manufacture of bees.

The breeding of "gentles" for ground bait is an industry the practices of which could probably give much information as to the policy of choice exercised by flies in selecting material for feeding and egg laying. According to Packard, the house fly makes selection of horse dung by preference for ovipositing, and as each female lays about 120 eggs and the cycle of changes from egg to fly is completed in less than three weeks it seems probable that a female fly might have some 25,000,000 descendants in the course of a hot summer.

Other varieties of flies multiply, I believe, still more rapidly.

As flies multiply upon and in organic refuse of every kind, it is obvious that the sooner such refuse is placed where it cannot serve for the breeding and hatching of flies the more likely is the plague of flies to be lessened. The most commonly available method for the bestowal of organic refuse is burial. The egg laying of flies in dead carcasses commences at the very instant of death or even before death in the case of enfeebled animals.—Lancet.

"I had a running sore on my leg for seven years," writes Mrs. Jas. Forest, of Chippewa Falls, Wis. "I spent hundreds of dollars in trying to get it healed. Two boxes of Banner Salve entirely cured it." Beware of substitutes.

Child Worth Millions. "My child is worth millions to me," says Mrs. Mary Bird, of Harrisburg, Pa. "I would have lost her by croup had I not purchased a bottle of One Minute Cough Cure."

Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box. 25c. (25-1yr)

How many live swallows go to a pound? This question lately formed the subject of a bet in the little town of N—, in Baden. A swallow was caught and its legs and wings tied up with a piece of silk thread and placed on the scales. To everybody's surprise it was found to weigh only ten grams, so that it takes 50 of them to make up a pound.—Karlserher Nachrichten.

A Tour of the Escorial. It requires about four days to make an investigation of the Escorial, the great Spanish palace, there being such a multitude of rooms and apartments. To travel all the halls, chambers, corridors, lengths and depths of the great palace would require a tour amounting to over 100 miles.

Healthy Trees. The time in the summer at which the leaves begin to turn is a tolerably sure indication of the soundness of the tree. Some trees will keep their foliage green until September, while the leaves of unhealthy trees will begin to show signs of turning brown or yellow in August.

Want your mustache or beard a beautiful brown or rich black? Then use the BUCKINGHAM'S DYE Whiskers. 50 Cts. of Druggists, or 5 Cts. at Home, N. Y.

ARE YOU DEAF? ANY HEAD NOISES? ALL CASES OF DEAFNESS OR HARD HEARING ARE NOW CURABLE by our new invention. Only those born deaf are incurable. HEAD NOISES CEASE IMMEDIATELY. F. A. WERMAN, OF BALTIMORE, SAYS: Baltimore, Md., March 30, 1901. Gentlemen:—Being entirely cured of deafness, thanks to your treatment, I will now give you a full history of my case, to be used at your discretion.

Our treatment does not interfere with your usual occupation. Examination and advice free. YOU CAN CURE YOURSELF AT HOME at a nominal cost. INTERNATIONAL AURAL CLINIC, 596 LA SALLE AVE., CHICAGO, ILL.

L. U. LANDMAN, M. D., WINDSOR - HOTEL, TUESDAY, Feb. 11, 1902.

D. R. H. H. ROBERTS, LEXINGTON, KY. HERNANDO BUILDING. (14Jan-02)

PUBLIC RENTING OF Fine Blue Grass Farm. I will rent publicly, at the Court House door, on Saturday, February 1st, at 2 p. m., sharp, my farm of 346.29 acres, being part of the Thomas Woodford lands, lying near Cane Ridge.

Women and Jewels. Jewels, candy, flowers, man—that is the order of a woman's preferences. Jewels form a magnet of mighty power to the average woman. Even that greatest of all jewels, health, is often ruined in the strenuous efforts to make or save the money to purchase them.
