—The first plowing of the season was commenced in Bourbon two or three days since with sod, and there will be a good deal of same turned for corn, hemp and tobacco, and nearly all of the stalk land was sown to small grain last fall. From the present prospects of the growing wheat, especially the late, there will be a goodly portion sown to oats, and some of the best land put to corn again. The early sown wheat looks very well, considering the siege it underwent, and with an open spring will make a fairly good yield.
