

Whose Say-so is Best?

With nearly all medicines put up for sale through druggists, one has to take the maker's say-so alone as to their curative value. Of course, such testimony is not that of a disinterested party and accordingly is not to be given the same credit as if written from disinterested motives. Dr. Pierce's medicines, however, form a single and therefore striking exception to this rule. Their claims to the confidence of invalids does not rest solely upon their makers' say-so or praise. Their ingredients are matters of public knowledge, being printed on each separate bottle wrapper. Thus invalid sufferers are taken into Dr. Pierce's full confidence. Scores of leading medical men have written enough to fill volumes in praise of the curative value of the several ingredients entering into these well-known medicines.

Amongst these writers we find such medical lights as Prof. Finley Ellingwood, M. D., of Bennett Medical College, Chicago; Prof. Hale, of the same city; Prof. John M. Scudder, M. D., late of Cincinnati, Ohio; Prof. John King, M. D., late of Cincinnati, Ohio; Dr. Grover Cox, of New York; Dr. Bartholow, of Jefferson Medical College, of Philadelphia; and scores of others equally eminent.

Dr. Pierce's Favorite Prescription cures the worst cases of female weakness, nervousness and retroversion and corrects irregularities, cures painful periods, brings up discharges and weakens drains, sometimes known as pelvic catarrh and a multitude of other diseases peculiar to women. Bear in mind, it is not a patent medicine, but the "Favorite Prescription" of a regularly educated physician, of large experience in the cure of women's peculiar ailments, who frankly and confidently takes his patients into his full confidence by telling them just what his Prescription is composed of. Of no other medicine put up for women's special maladies and sold through druggists, can it be said that the maker is not afraid to deal frankly, openly and honorably, by letting every patient using the same know exactly what she is taking.

Sick women are invited to consult Dr. Pierce, by letter, free. All correspondence is guarded as sacredly secret and womanly confidences are protected by professional privacy. Address Dr. R. V. Pierce, Buffalo, N. Y.

How to preserve health and beauty is told in Dr. Pierce's Common Sense Medical Adviser. It is free. For a paper-covered copy send Dr. R. V. Pierce, Buffalo, N. Y., 21 one-cent stamps to cover mailing only; in cloth binding 31 stamps. Dr. Pierce's Pellets cure constipation.

In the Year 2407 A. D.

"What will man be in 500 years?" That is the question that is agitating scientists of England and America. In addition to this there has been much speculation as to what his surroundings will be, and what turns his marvelous mental development will take. It is conceded by those who are inclined to dabble with the future, that the men of ages coming will sacrifice the body for the brain. Little exercise will be taken, as locomotion will be principally by the aid of airships and moving sidewalks. A journey around the world, it is thought, will be no more than a flight through the air.

It is also surmised that the man of the future will care nothing for feasts and banquets, and that these things and a Pure Food act will be unknown. His nourishment will consist of the concentrated extracts of the best food, prepared according to the formulas of advanced chemistry, and each meal, no doubt, will be confined within the limits of a single pill. Food elements to prepare a man for a certain kind of work will be one of the specialties. It is also thought that the style will revert to something like the style of the ancient Greeks or Romans.

There is a diversity of opinion as to the manner of habitation 500 years from now. H. G. Wells, an English writer who is inclined to look ahead a little, believes that in the year 2,000, the cities of New York, Chicago and Philadelphia will have about 40,000,000 inhabitants each, while London, Paris, Berlin and St. Petersburg will have about 20,000,000 citizens. The question of housing this number of people will be a large one, but it is the opinion of this same writer that, while these cities will not cover a great deal more area than they do at present, they will rise to a height undreamed of today. Buildings of 125 and 150 stories will be common, each one of which will be capable of holding 60,000 or 70,000 people.

The modern elevators will give way to pneumatic tubes and flying machines, and, it is thought, a great many people will not set foot on the earth at all, except for occasional pleasure trips. It is expected that the building operations of the future will be conducted largely in glass, which is even now being advocated to take the place of the common clay bricks.

It is predicted that the electrical age, which only seems to have begun in the present era, is doomed to pass, and that the air we now breathe will be sufficient for the wants of all men. Such persons even see, towering above the buildings of the future, immense chimneys that will suck down the air from miles above the earth, extract from it all its potential elements, causing them to make light, heat and ventilation, and then, through another set of chimneys, puff out the exhaust. In that age, the New York man who

wishes to send a letter to China, will merely step outside this door, drop it into a slot, with the knowledge that it will reach its destination on the other side of the world in a few minutes or at an hour at the most. Market gardening, it is expected will be conducted largely under glass, and there will be enormous forcing houses, where crops will be grown to an immense height and multiplied fruitfulness.

So the year 2407 is expected to see a land which no railroad trains will cross, where no factory chimneys will mar the beauty of the landscape, and a sea from which all vessels will long since have disappeared. There will be no more of commerce the wise forecasters say, because the day of individual fortunes and laboring for individual gain will have passed.

Good Receipt For Rats.

A farmer who has tried the experiment says: "If you will sprinkle sulphur on the barn floor and through your corn as you gather there will not be a rat or mouse bother it. I have done this for several years and have never been bothered with rats or mice. In stacking hay or oats sprinkle a little on the ground and on each load, and my word for it, rats or mice can't stay there. A pound of sulphur will be sufficient to preserve a large bin of corn and is good for stock and will not hurt the corn for bread."

New Variety of Wheat.

A new variety of wheat has been discovered in Mexico which is said to be immune from attacks of the wheat rust. The United States Department of Agriculture is greatly interested in the discovery, and steps will probably be taken to have the wheat introduced in this country. The Mexican Agricultural Society has just issued a report concerning the new wheat, which is said to have been grown in the State of San Luis Potosi, Mexico, for several years with great success. The rust immune wheat is from seed that was originally imported from Argelia.

Cut flowers, funeral designs, etc., gotten on short notice by Jo S. Varden.

Pooled Tobacco.

As the Burley Tobacco Society is an incorporated body with power to sue and be sued, the owners of tobacco who have signed contracts pledging their tobacco to that body, cannot now sell to the Trust without danger of suits against seller and the buyer. A Circuit Judge in western Kentucky before whom the matter was recently brought, decided that the pledged tobacco was in the hands of the society when it was pooled and that the grower could not legally sell it. The question as to whether one member of the pool may sell to another, the crop to remain pooled is one that has not yet been officially settled.

Found Her Brother Though a Dream.

Through a dream about a "boy in blue" Miss Cora Dawson, of Carmi, Ill., has found a long lost brother. He is Private William A. Dawson, of the Third U. S. artillery. The other day he met the three sisters he had never seen since he was a baby. Miss Cora Dawson wrote to the war department after her strange dream. She received an answer to her query about Dawson, stating that there was such a man in the service of Uncle Sam and that he was stationed at Seattle, Wash. Dawson was communicated with and the reunion followed.

Honest Boy Returns a "Lemon."

A messenger boy in the employ of the Postal Telegraph company, in New York city, recently returned a "lemon" to the cashier of J. Pierpont Morgan's banking house, in that city. He received an envelope from the house containing \$2, as a reward for saving the sum of \$67,000. He thanked the company for the "lemon", as he called it, and returned the gift to the cashier. The boy found an envelope in front of the banking house containing \$60,000 in bonds and \$7,000 in currency and returned them to the office of Mr. Morgan. He says he did not know that "lemons" came from Mr. Morgan in that shape, as he had expected a round hundred for his honesty.

Men's suits at Twin Bros., \$3.98.

Humpty Dumpty.

James Bonelli, the comedian who plays the part of the clown in Humpty Dumpty at the Opera House Friday evening is a young actor who has won considerable fame as a comedian, having appeared in such well known musical comedies as Fantasma, Devil's Auction and Eight Bells. He has been an acrobat since his fifth year and his father and grandfather were acrobats before him. Humpty Dumpty gives Mr. Bonelli a good change to introduce his droll eccentric comedy for which he has become noted. He is surrounded by an all-star company of singers, dancers, comedians and acrobats and a strong chorus of pretty girls. This is a comedy pantomime which can really boast of a plot of intense interest, full of comedy, wonderful electrical effects, and beautiful scenery. The comedy is bright and sparkling; the actor, terse, vivid and rapid; the musical numbers are bright and catchy; the chorus of pretty girls are all clever singers and dancers, while the specialties, six in number, are all feature acts.

Dickson & Mustard carry nearly three tons of beautiful scenery and wardrobe, all new this season. This, without a doubt, will be the strongest singing and most beautifully dressed chorus of young ladies, and the grandest scenic show playing here this year.

CLEARANCE SALE.

We have just begun a Stock Reducing Clearance Sale that we propose to make the Greatest selling event in the history of our store.

We carry the largest, most comprehensive line of Furniture, Carpets, Wall Paper, Draperies and Art Goods in Kentucky—which fact, combined with present prices, must make this a sale that will long be remembered by economical people.

If you buy House Furnishing Goods any where before seeing what we have to offer you in this sale, you are needlessly squandering 25 to 40 per cent of every dollar spent.

Look and Read!
Price & Co.,
Clearing and Sacrifice Sale
Ad on Page 3.

Everything in the house must be sold. Nothing reserved. The prices on this stock will surprise you, and will pay you to buy. Nothing charged during this sale. Call and see for yourself.

PRICE & CO., CLOTHIERS.....

W. ED. TUCKER'S
