WORK DONE
WHEN PROMISED

Good Work Done Cheap;
Cheap Work Done Good!

THE JOB ROOMS OF THE BOURBON NEWS

Are prepared to do the best of
Printing on short notice—such as

BILLHEADS,
LETTERHEADS,
CARDS,
CATALOG
POSTERS,

and, in fact, everything
that is printed.

Orders for Engraving,
such as Wedding An-
nouncements, Invitations,
given prompt attention.

Let us figure with you on
on your next work.

Our facilities are the best, having
just installed two of the latest im-
proved Chandler & Price Job
Presses—come around and see them
work.

Our type is new and modern
faces.

FLANDERS TWENTY again made clean sweep awarded first and second all the prizes there were in her class in ten days reliability run Minneapolis to Helena Montana. Hardest contest any light car ever entered one thousand three hundred ninety miles over mountains and plains worst roads in America and rained most every day mud hub deep. The two FLANDERS were only cars in her class to finish with perfect scores and only one other car of any price a marmon \$2700 finished perfect. Cars penalized included packard stoddard-dayton abbot-detroit amplex maxwell cole krit hupmobile and other small fry. This is second great victory for FLANDERS TWENTY in a month other was three perfect road scores in Iowa little glidden no other \$800 car on earth can stand up with FLANDERS TWENTY in hard road work and in this latest contest she went out of her class and trimmed the four thousand dollar fellows.

THE KING'S CHAMPION.

Westminster Hall, Where His Challenge Used to Be Uttered.

Westminster hall, in London, was built originally by King William Rufus (1056-1100) and tradition goes that the oak of its ceilings was brought from the forest of Shillelagh, in Ireland, timber which possessed peculiar properties rendering it hateful to spiders and their webs. Richard II. transformed the hall. Leaving the old walls standing, he buttressed them strongly and raised over them the magnificent roof of oak which is still extant and intact. It is ninety-two feet high. The length of the hall is 290 feet, its breadth sixty-eight feet. It was large enough for mounted men to enter in order to challenge any who would dispute the rights of the king, a ceremony that is quaintly described as follows on the occasion of the coronation of Richard III. and Queen Anne in 1483:

"In the afternoon the King and Queen entered the hall, and the King sat in the middle, and ye Queen on ye left side of the table, and on every side of her stode a Countesse, holding a cloth of Pleasance when she listed for to drink. And on the right hand of ye King sat ye Archbishop of Canterbury. The ladies sat all on one side in ye middle of the hall, and at the table against them sat the Chancellor and all the Lords. And at the table next the cupboard sat ye Mayor of London. * * * At the second course came into ye hall Sr. Robert Dimmock, the King's Champion, making Proclamation that whoever would say that King Richard was not lawful King, he would fight with him at the utterance, and threw down his gauntlet, and then all the hall cried King Richard.

"And then one brought him a cup of wine covered, and when he had drunk he cast out the drinke and departed with the cupp. * * * At the end of the dinner the Mayor of London served the King and Queen with sweete wine, and had of each of them a cupp of gold and a cover of gold. And by that time that all was done, it was darke night, and so the King returned to his chamber, and every man to his lodging."

The last time that the hall was the scene of the challenge of the king's champion was at the coronation of George IV.

Bell With the Wail of a Child.
A queerly shaped gong which occupies a position of honor in the center of the city of Seoul, Korea, is said to be one of the largest in the world and

is called "the bell with the wail of a child in its voice." When first cast the bell sounded with a harsh and cracked note, and the superstitious emperor, fearing an ill omen, consulted with his magicians. These gentlemen held a long confab and finally stated that the bell would never sound right until a live child was given to it. The mass was then melted again, and a live baby was thrown into the molten metal. The wail of agony uttered by the little tot as the bronze engulfed it seemed to be repeated every time the bell was tolled, and today the Koreans still claim that the wail of a child can be heard in the voice of the metal.

But She Wasn't Satisfied.

Lady Jekyll, who was fond of puzzling herself and others with such questions as had been common enough a generation before her, in the days of the "Athenian Oracle," asked William Whiston of berimed name and eccentric memory, one day at her husband's table, to resolve a difficulty which occurred to her in the Mosaic account of the creation.

"Since it pleased God, sir," she said, "to create the woman out of the man, why did he form her out of the rib rather than any other part?"

Whiston scratched his head and answered: "Indeed, madam, I do not know, unless it be that the rib is the most crooked part of the body."

"There," her husband said, "you have it now! I hope you are satisfied."
—Southey's Doctor.

Colors Warm and Cold.

One clear, cold winter's day Benjamin Franklin spread a number of handkerchiefs carefully on a level stretch of snow. One of the handkerchiefs was black, another white and the others of various colors. Some time afterward he returned and removed the handkerchiefs carefully one by one, measuring the depth of snow under each. Under the black handkerchief he found that the snow had melted considerably; under a red handkerchief, almost as much; under a blue handkerchief, very little, and under the white one scarcely any. By this simple experiment he learned that color has a great deal to do with the warmth of clothing. White sheds the sun's heat almost as well as an oilskin sheds water; blue is nearly as heat proof; green is less so; yellow is a warm color, red a still warmer color, while black soaks up almost all the sun's heat that strikes it. Make the experiment some time and you will see why black clothes are out of place in the summer time and white ducks in winter.—Christian Herald.

What She Didn't Understand.

A Boston girl who was watching a farmer milk a cow adjusted her glasses and said: "It is all very plain except that I don't understand how you turn it off."

Have to Learn to Spell.

More than half of the young women at Wellesley college have been found deficient in ability to spell well. Six hundred students are to give up their Saturday afternoons as well as other recitation periods of the week to drills in orthography.

Experience Boy Will Remember.

While exploring one of the big disused Martello towers, near Waterford harbor, Ireland, which was formerly used for military purposes, a boy named Charles Cummins had a terrible experience a few days ago. When he pushed open one heavy iron door it suddenly banged and shut on his fingers. In agony, he shouted for help, but he was kept a helpless prisoner all night, and till late next morning, when he was rescued by a passer by.

The Retort Sarcastic.

"That new family next door borrowed our ax again this morning," his wife told Jones.

"Well, why did you lend it to them," he complained.

"How could I help it?"

"You might have given them some kind of an excuse."

Mrs. Jones waxed sarcastic.

"Yes," she snapped, "I might have told them that you were going to use it—or some other crazy, impossible thing."
—Youngstown Telegram.

The Thunderer's Logographs.

Some of the most serious riots recorded in the printing trades occurred in 1814, when the London Times was first printed by steam, and a number of workmen discharged through this innovation sought to wreck the office in Printing House square. Long before this the Times had been printed logographically—that is to say, the proprietor conceived the happy idea of having words cast entire to save the compositors the trouble of collecting type. The logographs most in demand were: Dreadful, robbery, atrocious outrage, fearful calamity, alarming explosion, loud cheers, interesting female. One hundredweight of each of these was always kept in stock. Interesting females no longer figure in newspaper reports, but otherwise the cliches of journalism seem to have altered but little.—London Chronicle.

Medicine in Asia Minor.

Most of the people living in the villages and towns of Asia Minor, know nothing about remedies of any kind, except the few made of roots and herbs growing nearby, and a physician's services are rarely called for; consequently the mortality among the people is very great. In the larger cities and communities on the main roads there are many physicians.

Pavilion is Kaiser's Design.

Over the fountain Augusta Victoria at Hamburg is to be built a pavilion after the style of a Roman temple. This has been designed by the German emperor, who has also composed the following inscription for the fountain: "Nymph, dispense the healing waters to the sick; may God restore them, cured and rejoicing, to their families."

Icelanders' Gloves.

In so cold a climate as Iceland the glove must be put off or on as rapidly and easily as possible; so it is made without fingers, and in order that no time may be wasted in distinguishing between right and left all gloves have two thumbs. You simply thrust your hand into the first glove that comes and your thumb immediately finds its way. There are, of course, drawbacks in the matter of appearance, for the dangling idle thumb looks untidy.—London Chronicle.

Killed Two Foxes With One Shot.

While Alexander Thomson, a game-keeper, was out on Benyvrackie hill, Perthshire, Scotland, some days ago, he came upon two dog foxes fighting. He fired at the pair, with the remarkable result that both were killed by the one shot.

Books the True University.

"The true university of these days," says Carlyle, "is a collection of books." The man who is not brought into intimate contact with books in his youth, who has not learned to love them and how to use them, suffers a loss which it is almost impossible to make good.

In the Future.

Some years hence the men now known as farmers may be referred to as "the wealthy land owning class," and cease to be the subjects of special solicitude.

Courage and Cowardice.

Fear is far more painful to cowardice than death to true courage.—Sidney.
