

Young Women

Read what Cardui did for Miss Myria Engler, of Faribault, Minn. She says: "Let me tell you how much good Cardui has done me. As a young girl, I always had to suffer so much with all kind of pain. Sometimes, I was so weak that I could hardly stand on my feet. I got a bottle of Cardui, at the drug store, and as soon as I had taken a few doses, I began to feel better. Today, I feel as well as anyone can."

TAKE CARDUI The Woman's Tonic

Are you a woman? Then you are subject to a large number of troubles and irregularities, peculiar to women, which, in time, often lead to more serious trouble.

A tonic is needed to help you over the hard places, to relieve weakness, headache, and other unnecessary pains, the signs of weak nerves and over-work.

For a tonic, take Cardui, the woman's tonic. You will never regret it, for it will certainly help you. Ask your druggist about it. He knows. He sells it.

SNAIL'S TRIP ON RAZOR EDGE

Scientist Makes Interesting Discovery While Studying Mollusk's Method of Locomotion.

"When photographing the snail," writes Professor Ward in the Strand, "I was surprised at the fact that even the rough cut edge of a sheet of glass presented no difficulties to its locomotion; its even pace was continued in spite of the fact that the sharp corner appeared to be penetrating its body. There, too, we have exhibited the animal's delicate sense of touch, and this led me to make a further experiment.

"After I had placed the snail on the butt of a razor's blade it slowly moved along the back of the blade and then climbed completely over the sharp edge, the razor being in excellent condition. As the successive waves brought the fore part of its foot near the edge of the blade its head was held low down, and the lower and shorter pair of feelers nearly touched the blade, as if feeling the way.

"At the moment when the sharp edge was reached the small feelers were fully extended toward it, and just at the very instant when I expected to see them cut off they were both instantly retracted. They were little more than a hair breadth away, and though the lower feelers possess no eyes, yet by their sudden movement I was quite convinced that the snail at that instant recognized danger.

"Still the foot traveled on, and slowly the snail dragged its whole weight of exactly one and a half ounces over the edge, later moving toward the butt and remaining perfectly unharmed. The species experimented with was the Roman or edible kind, which accounts for its comparatively large weight, it being the largest of British snails."

NEW RACE NEAR THE POLE

Explorers Steffansson and Anderson Find Men With Red Beards in Victoria Land.

Tidings of a hitherto unknown race have been received in dispatches from Steffansson and Anderson, who are conducting an expedition in the far north.

The strange race was located in Victoria Land, north of Cape Bexley. One theory of their origin is that they may be descendants of an ancient Icelandic colony from Greenland. Of unusual interest is the fact that the natives bear names that can be translated into English, suggesting that survivors of the Franklin expedition may have lived among them.

They have some Scandinavian characteristics and are different from any other American aborigines. Two of them wore beards of a reddish color and all had light eyebrows. Nothing learned from them indicated that the race as it exists today had ever seen a white man.

The courier who first went forward to parley with them almost lost his life, when a native attacked him with a knife. Friendly advances were finally successful, and by means of the sign language and the assistance of native guides communication was held.

The race was an aboriginal one called A-kul-li-a-kat-tag-mi-ut. It had been believed that the territory was uninhabited.

Tour of an English Choir.

We have at least one "big thing" to our credit that America has not so far accomplished. The Sheffield Choir, now singing in Australia, represents the biggest touring musical enterprise on record.

It numbers 230 all told, and when they return to Yorkshire in a few weeks hence they will have covered 33,000 miles in seven months. The cost of the tour will be £60,000, the transport and hotel expenses absorbing £45,000. The choir has sung to crowded audiences in Canada, New Zealand and Australia, and if the receipts are equal to the expenses the promoters will be satisfied. The youngest member of the choir is a boy of 19, the oldest a man of 72. Three of the choristers are circumnavigating the globe hatless.—London Chronicle.

Unknown Lower California.

The interior of Lower California is today nearly blank on our maps and is possibly less well known from a geographical and a geological standpoint than any other region of equal area in North America. The Mexican government has at last begun a thorough exploration of this terra incognita.

During the last autumn the Instituto Geologico equipped four parties, each comprising two geologists, to explore the northern part of the peninsula. The work will be extended to the southern part this year—Scientific American.

The Tramp's Excuse.

"You seem to be an able-bodied man. Why don't you get work instead of begging for a living?" "I can't find anything to do in my line."

"You can't?" "No. I'm a lightning calculator by profession, and the adding machine put me out of business."

For Cause.

He—Why are you always throwing your money in my face?
She—Because I can't keep it out of your hands.
