

MAMA! DON'T YOU SEE YOUR CHILD IS SICK, CONSTIPATED

Look At Tongue! Move Poison From Liver and Bowels at Once.

Mother! Your child isn't naturally cross and peevish. See if tongue is coated; this is a sure sign its little stomach, liver and bowels need a cleansing at once.

When listless, pale, feverish, full of cold, breath bad, throat sore, doesn't eat, sleep or act naturally, has stomach ache, diarrhoea, remember, a gentle liver and bowel cleansing should always be the first treatment given.

Nothing equals "California Syrup of Figs" for children's ills; give a teaspoonful, and in a few hours all the foul waste, sour bile and fermenting food which is clogged in the bowels passes out of the system, and you have a well and playful child again. All children love this harmless, delicious "fruit laxative," and it never fails to effect a good "inside" cleansing. Directions for babies, children of all ages and grown-ups are plainly printed on the bottle.

Keep it handy in your home. A little given to-day saves a sick child to-morrow, but get the genuine. Ask your druggist for a bottle of "California Syrup of Figs," then look and see it is made by the "California Fig Syrup Co."

The trouble is that the Mr. Saunders who announces the unsinkable ship is the same Mr. Saunders.

FOR A BAD COLD.

Take Chamberlain's Cough Remedy. It has stood the test of time and can be depended upon. (adv. March)

MISS SIMMS ENTERTAINS WITH A HOOVER DINNER.

Miss Simms entertained all the women of the county, who had so patriotically served in the Food Administration Campaign, with a buffet luncheon at her home, Mt. Airy, on Friday.

The ladies were asked to serve at this most vital post of duty for the duration of the war. We feel sure they will have the earnest support of the men and women of the county.

The following recipes for conserving wheat were used.

ROLLS.

3/4 teacup of sifted corn meal; 2 1/2 teacups flour; 1 teaspoon salt; 2 tablespoons sugar; 1 tablespoon lard; 1 cup lukewarm liquid, (milk and water; 1 cake yeast.

Pour lukewarm liquid on meal, add yeast (dissolved in liquid), add it to dry ingredients, into which the lard has already been worked. Set dough to rise at a temperature of between 70 and 80 degrees. When double in bulk, make into small rolls and let rise again. Bake in hot oven fifteen to twenty minutes.

BEATEN BISCUIT.

2 1/2 pints sifted flour; 1/2 pint sifted rye flour; 1 large kitchen spoon of lard; 1 teaspoon of salt.

Mix flour and salt, and work into two pints of mixture the well-chilled lard. Make into stiff dough with ice water and very little milk. Work through kneader one hundred and fifty times, gradually adding rest of flour. Roll one-half inch thick, cut into biscuit and stick with fork. Bake in hot oven until light brown.

FARMERS ARE FACING SEED CORN SHORTAGE.

A statement campaign is to be made by agricultural extension leaders in Kentucky to have farmers throughout the State test during the first ten days of March all seed corn to be planted this year. Co-ordinated efforts, it is realized, are necessary to prevent a crop shortage this year, in view of the seed corn situation. Because of the early frosts many States are almost without seed corn, and agricultural authorities here are seeking to prevent the planting of any corn unless it proves strong in germination. State and county organizations are to unite their efforts in the campaign and Gov. Stanley will issue a proclamation. The aid of Food Administrator Sackett also will be secured.

Arrangements will be made for temporary agents in counties not having regular agricultural agents. The plan is to enlist the service of all schools, especially in county seats, in the work, where farmers may take their seed corn to have it properly tested.

KENTUCKY'S DRIVE IN NEXT RED CROSS DRIVE \$900,000.

The quota of the Lake Division of the American Red Cross in the second Red Cross drive to raise a fund of \$100,000,000 to carry on the war work of that organization among the fighting men and civilian populations of the United States and allied countries of the United States and allied countries, will be \$9,400,000, it was announced at the headquarters of the Lake Division at Cleveland, O., Saturday night.

Of this amount Kentucky's quota will be \$900,000; Indiana's \$2,100,000, and Ohio's \$6,400,000. The drive will be directed in each of the three States by a State director not yet named, and it will extend through the week of May 6 to May 13.

COUNTY LIVE STOCK INSPECTOR DESCRIBES NEW CATTLE DISEASE.

Hemorrhagic Septicemia, an outbreak of which occurred in a herd of cattle belonging to Mr. J. L. Dodge, near Paris, is an infectious disease affecting cattle, sheep, hogs and in fact most all domestic animals, and is caused by a specific germ, called Bacillus Boviseptus, generally occurring enzootic but occasionally in epizootic form.

This disease occurs in many different forms. A form such as occurred in the above herd is commonly called "Mad Itch"; other forms show different symptoms such as staggering gait, apparent loss of vision, convulsions and death; some have bowel affections causing severe diarrhea; some show pneumonic or lung affections and many other symptoms due to the severe toxemia of the system. All usually result in death, especially the above mentioned forms of the disease.

This disease is very prevalent in the western states and has occurred in Kentucky in enzootic outbreaks in many herds, but in a good many instances has been diagnosed Hemorrhagic Septicemia, but generally thought to be Forage Poisoning, due to animals eating spoiled or moulded corn, causing symptoms of Cerebral-Spinal Meningitis.

It is a very difficult disease to diagnose except upon post mortem examination of animals dead of the disease, and this verified by laboratory examination of sections of internal organs. Whereas the Bacillus in many instances can be found under the microscope. If the microscopic examination fails to isolate the organism, a direct inoculation of a rabbit with spleen of dead animal will establish definite diagnosis.

The mortality of Hemorrhagic Septicemia is very high, that is animals affected usually die of the most severe forms, vaccination will save a small per cent of sick animals, but the best results are to be obtained from vaccinating all exposed animals before the disease develops. Outbreaks can, as a rule, be almost immediately checked or stopped by vaccination, which at present, is the only known preventative.

Animals sick of this disease should be isolated and the exposed herd, and premises, quarantined and all other animals on the farm kept separate and away from affected herd. Carcasses of animals, dead of this disease, should be burned or buried and covered with lime, hides can be saved, provided they are dipped in a standard disinfectant solution. One handling carcasses and hides should be very careful and thoroughly disinfect hands afterwards.

Practically all noted investigators of the United States have agreed that the commonly called forage poisoning and conditions supposed to result from eating spoiled or mouldy corn of cattle is nothing more than Hemorrhagic Septicemia. This is more or less proven from the fact that practically all outbreaks of above mentioned diseases are controlled and eradicated by vaccination with Hemorrhagic Septicemia Vaccine.

Mr. Dodge had lost ten steers of a herd of fifty-six and one was sick at the time of vaccination. Following the vaccination, the one sick died, and two others developed the disease and died, one of these showed much milder symptoms and lived several hours longer than previous cases. Two others also developed a mild form of the disease and recovered, thus showing the beneficial effect of the vaccine.

The above herd was vaccinated again on the eighth day to insure the animals immunity for a longer period of time and to guard against a recurrence of the disease.

This herd was placed on different pasture and feed was changed for a few days, but were put back on same feed again, also Mr. Dodge had a herd feeding of twenty-eight head of steers, some distance from the diseased herd, and had been, and are yet, eating the same feed the diseased herd was feeding on when they were taken sick, and none of that herd has ever been sick. This also goes to show that the feed is not a factor in the cause of said disease.

The disease in the herd of cattle belonging to Mr. Dodge was diagnosed by me from post mortem examination on a dead steer. Section of internal organs were sent from this steer by me to the Kentucky Agricultural Experiment Station, at Lexington, and my diagnosis was verified by them by microscopic examination in laboratory as Hemorrhagic Septicemia.

H. M. HAMILTON, Live Stock Inspector for Bourbon County.

FORGOT WHAT HE NEEDED.

From the Republican, Mt. Gilead, Ohio: The editor had an interesting experience some time ago, when a young gentleman came to his office and asked for a copy of the Morrow County Republican. He scrutinized it carefully when a copy was handed him, and then said: "Now I know!" "What is it you are looking for," we inquired. "My wife sent me after a bottle of Chamberlain's Cough Remedy, and I forgot the name. I went to several stores and the clerk named over everything on the shelf except "Chamberlain's". I'll try again, and I'll never go home without Chamberlain's Cough Remedy." The Republican would suggest to the proprietors of drug stores, that they post their clerks, and never let them substitute. Customers lose faith in stores where substituting is permitted to say nothing of the injustice to the makers of good goods and the disappointment of customers. (adv. March)

Glad as we are that the Col. is convalescing so rapidly, we suppose science will never be able to explain why it was not his vocal organs, instead of his auricular machinery, that got out of whack. (adv)

LOCAL ATTORNEY FIGURES IN BIG OIL SUIT.

IRVINE, KY., March 4.—Suit for \$712,500, growing out of a transaction in oil properties, was brought here recently by J. Fred Miles, formerly of Tulsa, Okla., now of Lexington, Ky., against the Union Oil Company, which has offices here and at Cleveland, Ohio.

The petition, one of the most voluminous and exhaustive documents ever filed in Eastern Kentucky, was prepared by Messrs. Robt. B. Franklin, of Lexington, and Robert C. Talbot, of Paris, and Judge Ed. C. O'Rear, of Frankfort, attorneys for the plaintiff.

The Union Oil Company, the petition recites, is a Kentucky corporation, holding leases on 1,280 acres of land in Estill and Powell Counties, the greater portion being in Estill County. Its capital stock is \$75,000, and its officers are W. R. Thompson, Jacksonville, Fla., President; Norwood Johnson, Pittsburg, Penn., Vice President; Carl J. Weidman, Cleveland, Ohio, Treasurer, and M. O. Thompson, Irvine, Ky., Secretary.

J. Fred Miles is an experienced oil operator from the Oklahoma field, and is one of the pioneers in the Kentucky field. His attention was called to the properties of the United Oil Company by James Hillis, who has the distinction of having drilled the first thirteen producing wells in the Tickety Fork district and of having induced the building of the Cumberland pipe line to the Estill County field.

About May 1, 1917, the petition recites, J. Fred Miles was introduced to Carl J. Weidman and other stockholders of the United Oil Company, and it was agreed that Miles should send his field men to the property to make an investigation of its approximate value, with the understanding that if the reports of the investigators should be favorable Miles would enter into negotiations with the United Oil Company for the purchase of the property.

The reports were favorable, and on May 10 Miles went to New York and consulted his financial backers, former Governor Myron T. Herrick, of Cleveland, and William F. Bonbright & Co., bankers of New York, to the end that he went to Cleveland, and on May 15, the petition sets forth, closed an agreement with the United Oil Company, through Carl J. Weidman, under which he procured an option on the properties at a price to be \$1,500,000 net cash to the company.

The following day, Miles, according to the petition and substantiated by papers filed as exhibits, advised the company that he would take the property at the price stipulated, subject to the settlement of litigation then pending in the Estill Circuit Court, concerning a portion of the W. L. Marcum farm, covering approximately 50 acres above the cliff, and known as the Christopher tract.

A \$3,000,000 corporation was organized to take over the properties of the United Oil Company through J. Fred Miles, together with the holdings of J. Fred Miles, and into this corporation with Miles and Bonbright & Co. came J. I. Lamprecht, of Cleveland.

The \$1,500,000 to be paid the United Oil Company was provided, and Miles and his associates in the \$3,000,000 corporation, the petition states, called upon the United Oil Company to deliver the properties with titles clear, with the exception of the Marcum litigation, to cover which it had been agreed, \$180,000, would be held in escrow.

But the petition recites, defects in the title were discovered and made known to the buyer and seller and their attorneys.

Thereupon Miles and associates in the \$3,000,000 corporation demanded of the United Oil Company that it clear up and "deliver to them good and merchantable titles," which to date, according to the petition, the United Oil Company has failed to do.

It is generally believed in this section that the holding of the United Oil Company combined with the holdings of J. Fred Miles were worth \$4,500,000 to \$5,000,000. At the time of the purchase by Miles the United Oil Company had 40 wells producing 2,300 barrels daily, and 50 or 60 undrilled locations.

EAT BIG MEALS! NO SOUR, ACID STOMACH, INDIGESTION OR GAS

"Pape's Diapepsin" is Quickest, Surest Stomach Relief Known—Try It!

Time it! Pape's Diapepsin will sweeten a sour, gassy or out-of-order stomach within five minutes.

If your meals don't fit comfortably, or what you eat lies like a lump or lead in your stomach, or if you have heartburn, that is usually a sign of acidity of the stomach.

Get from your pharmacist a fifty-cent case of Pape's Diapepsin and take a dose just as soon as you can. There will be no sour risings, no belching of undigested food mixed with acid, no stomach gas or heartburn, fullness or heavy feeling in the stomach, nausea, debilitating headaches or dizziness. This will all go, and besides, there will be no sour food left over in the stomach to poison your breath with nauseous odors.

Pape's Diapepsin helps to neutralize the excessive acid in the stomach which is causing the food fermentation and preventing proper digestion.

Relief in five minutes is waiting for you at any drug store.

These large fifty-cent cases contain enough "Pape's Diapepsin" to usually keep the entire family free from stomach acidity and its symptoms of indigestion, dyspepsia, sourness, gases, heartburn, and backache, for many months. It belongs in your home. (adv)
