Election—Next Tuesday.

To The Polls! To The Polls!

There is nothing clearer in this country than the duty of every man to vote. Here the people have the power to determine all questions, by their votes—and the majority rules. But if good citizens stay away from elections the real majority, or the true sentiments of the majority, may not be expressed. Therefore all should go to the polls.

Next Tuesday must determine important questions in this State and in this country. While the questions themselves may not be new, yet they have assumed a new and a peculiar phase. We are no alarmist; but the issue has been forced upon us and must be met. It is now known that a combined effort is being made to defeat the Republican party at this election. This combination embraces the elements that all good citizens are opposed to and do not want to succeed. And it can only succeed by the scattering of the forces opposed to it. What then is the duty of all thinking alike and in the same way about temperance reform, the submission amendment to the Constitution, the preservation of the Sunday laws, and the good order and peace of society? Is it not clearly their duty to rally to that party that party where their votes will count most and do the most good? By the success of the Republican party all the above principles and reforms will be maintained and advanced. By its defeat they will be put back, may be for years, if not entirely overthrown. No man wishing a good thing to be done can conscientiously cast his vote so as to impede or retard that good thing. Is there any other way to prevent this than by voting with the Republican party this year? None that we can see. Its defeat now would defeat all hoped for reforms and, as we say, will put them back for years. All who do not want to see their put back, or delayed should cast their votes with the only party strong enough to protect them.

J. Q. A. Kennedy's Acceptance.

HE WHO WOULD ACCOMPLISH GOOD MUST MAKE HIMSELF A SACRIFICE.

BUTLER, OCTOBER 28.—The choice of the Union Labor party for State Treasurer accepts in the following letter:

Dear Sir—Your telegram officially informing me of my nomination for State Treasurer by your committee at Bradford, was duly received, and would have received an immediate answer, but for the reason that I had forever withdrawn from the political arena, so far as seeking or desiring official promotion; but coming as this nomination did, without any solicitation or any knowledge on my part, and from those representing my political opinions, demanded my sincere consideration and respect; and I could not decline their request, although I would have preferred to be known only as a humble private citizen in the ranks of the Union Labor party of the nation. But we must all be willing to work and sacrifice something for the good of the suffering millions of our countrymen and women. God heard the cries of the oppressed in Egypt, and he took them out with a high hand, despoiling their task masters.

When the Southern slave reached out his hands and called for help and deliverance from the free North they refused; but he that was called upon to help heard their petition and answered it in blood and woe, and broke their shackles with bombs and bullets, and slavery died, and 2,000,000 of freemen sacrificed their lives in the bloody conflict that right and justice might live. The conflict has only changed base. The capital that once extended the arm of slavery is now seeking to own labor in a new form; only in a more extended and a more cruel form. These enormous deposits of gold and silver, not with the bulk, but the ballot, and if producing a class of the country which will stand as a unit the victory is ours. If men knowing their wrongs will not stand shoulder to shoulder with those seeking the restoration of the rights that let them be free, but let us be free.

I thank your committee and through you the party you represent, for the honor conferred on me, as a humble member of the Union Labor party of the great State of Pennsylvania, for the responsible and trust-worthy nomination for State Treasurer. In the event of my election, the money of the State will be sacredly guarded and freed from all improper uses and precautions against hazardous deposits or any investments of a private character for speculation.

Truly Yours, J. Q. A. KENNEDY.

We find the above letter of acceptance in the Pittsburgh Dispatch of Oct. 29, inst. and publish it out of respect to a neighbor and citizen, as well as to give our readers all going on in our local and State politics at present. The letter of Squire Kennedy is well written, but the objects or aims of the Labor party are not very fully or plainly made known in it. The analogy made by the Squire between the old slavery and slavery of the South and the laborers of the country at present is somewhat rather far fetched. To say that the capital that owned the slaves "is now seeking to own labor in a new form" would seem not to be tenable. But all the efforts now being made to raise the dignity of labor and secure it in its rights will have a good tendency, and we hope will lead to good results, and that through peaceable means and without the intervention of the bullet, as became necessary in the case of slavery. All agitation on all questions of reforms in society, whether of temperance, of morals, of politics or of labor, will in the end produce good results. And therefore all are ready at all times to hail any movement or any cause which can lead in the effort to raise the low and trodden and oppressed; or aid the weak and poor in their efforts to secure a fair chance and a free and open field to better their condition.

The Bolard-Greene big well in the Saxenburg field now does from 700 to 800 barrels per day.

An old rebel flag was displayed at Macon, Georgia, on the recent visit of Jeff Davis.

The Shut Down Begins.

The great shut down movement in oil was completed at Oil City on Monday last and went into operation on Tuesday, Nov. 1st, inst.

The general features of the movement are: a stoppage of the drill for one year; the shutting in for one year of one-half the present production; no glycerine to be used within the same time, and no wells are to be cleaned out.

For these concessions on part of the producers the Standard Oil Co. is to set aside 5,000,000 barrels of oil, at 62 cents per barrel, the profits of which are to be divided among the producers who shut in their wells and the laboring men who may be thrown out of employment by the shut down or shut in. This all is based on the expected rise in oil that the movement will soon bring about.

The new Saxenburg field this Co. is said to be the only one not fully embraced or entirely controlled by the movement. Strong efforts were made by the Association (Producers) to control it also.

The Reibold field is said to be completely in the movement. All the big producing firms however in the country, both Standard and independent have or will shut in their wells, according to their own consumption plan to raise the price of oil.

Case of the Anarchists.

The Supreme Court of the United States has refused to grant the writ of error prayed for by the Chicago Anarchists. This now leaves them without any hope unless the Governor of Illinois commutes their sentences to imprisonment for life. Three of them however have written the Governor that they do not desire and that, but ask for full pardon or for death. It is believed the Governor will not in any way interfere and that the men are doomed to hang on the 11th inst.

Offer of a Banner.

The Republican State Committee offer a handsome silk banner to the county which will poll on next Tuesday a Republican vote showing the nearest relative approach to the Blaine vote of 1884.

Here is a chance for the Republicans of Butler County to get a fine silk banner. Can we take it? We can if we try. We have the votes in the county and if they all turn out to the election next Tuesday we can take the banner. Let us try. The offer of the flag comes to Mr. Mates, Chairman of the Republican County Committee, and we are authorized to make this announcement.

The Blaine vote in Butler Co. was 5,217. The nearest approach to this, in comparison with the vote of other counties, will win the banner. The terms of the offer give an equal chance to all counties, large or small.

It is not to be doubted that the result of next week's election will greatly affect that of next year. This should induce every Republican in Butler county to turn out and cast his ballot for the State and County tickets. This is not the year to lay back and let things slide, and say to yourself "we'll give the Democrats this next year." We should all labor to keep Pennsylvania in the front rank where she has so long stood. Her reputation for honesty and integrity is being assailed, and she is being brought into disrepute by the actions of her representatives in the State and National Legislatures. There is no equivocation about this—now is the time to do it. Now will the Democratic State Committee have the honesty and courage to issue an address as plainly declaring that the overthrow of these safe guards to morality and this recognition of the right of every people to a free and equal vote is the object of the alliance of the Democratic party with the liquor power? It will not do so, but instead the Democratic managers will plot in secret with the liquor leaguers whose chief object is to make money out of a quarter of a million of money to be distributed to the people and defeat the Republican party, to the ultimate end of entroning free rum and an European Sunday upon the ruins of the salutary restrictive system which has kept our State through Republican influence. This is the battle that now opens before the people of Pennsylvania, and the Republican party is ready for it.

Do not disfranchise yourself by not voting on the 8th of November. It is political suicide.

The Oil Producers' Movement.

For months the oil producers have been organizing a movement to stop the drill, reduce the production and the stock of oil on hand, and to bring about a general strike of the oil producers. Their plan for accomplishing the desired end has been kept a secret but now that the work is accomplished the plan agreed upon is made public by the press.

The Standard Oil Company is the owner of 20,000,000 and \$5,000,000 of stock above ground. They were to set aside 5,000,000 bbls. of this oil at 62 cents a bbl. The producers were to shut in one-half their production and drill no more for a year. Whatever the market advanced above 62 cents each producer is to share to that amount in the profits accruing from the 5,000,000 bbls. to the extent of the production he shuts in. In other words, he is to receive pay for the oil he leaves in the ground, and no doubt much more than he could get for the same oil if he produced it. This movement will advance the price of oil is reasonably certain, as the market has already advanced 18 cents since the shut-down was first suggested.

The committee representing the producers went to work organizing the region, with a view to stopping the drill and shutting in one-half of the production. The magnitude of the work will be apparent when it is known that there are 14,000 producers of oil, and many of them strongly prejudiced against the shut-down movement. The oil population was organized into local lodges, every local lodge having its assembly. The plan was to hold 14,000 meetings were held nightly and it was fully discussed. The meetings were all held in secret and the members bound by an oath to not divulge the proceedings of the council chamber.

There is no man on the Republican ticket this year as a candidate but is worthy of support for the office for which he was nominated. Nearly every one of them served their country in war, and all of them are competent and of good character.

The Pennsylvania Railroad Company have declared a dividend of 3 per cent on its earnings for the past six months. For some years past it had been but 2 1/2 per cent.

Saxenburg oil development is making its quiet life over there. Several fine fights between contending parties on disputed leases have already occurred, and more are threatened.

Putting it Plainly.

In the pending campaign in this State, says the *Miners' Journal*, a crisis appears to have been reached which will render the liquor question and its adjuncts the dominant issue hereafter. The organized conspiracy between the Democratic leaders and the liquor power to defeat the Republican party and then overthrow all the barriers erected by that party against the demoralization of the liquor traffic has forced that issue. With its characteristic fearlessness and fortitude the Republican party accepts the issue and boldly marches out to give battle upon it. The address just issued by the Republican State Committee sounds a ringing defiance to the unholy alliance and fearlessly avows the responsibility for all the legislation that has inspired the liquor power to organize and conspire against the Republican party. "The liquor traffic," says the address, "is the (the Republican party) is charged with preserving the Sunday laws which forbid the sale of liquor upon that day. In answer it accepts the responsibility. It is charged with having passed the High License Law. It is just as freely accepted that the Republican party is charged with having in state convention and Legislative caucus ordered the submission to a vote of the people of the bill which prohibits the sale of liquor and with affirming a like determination this year. The charge is true—so flatly true that no Republican will evade it."

There is no equivocation about this—now is the time to do it. Now will the Democratic State Committee have the honesty and courage to issue an address as plainly declaring that the overthrow of these safe guards to morality and this recognition of the right of every people to a free and equal vote is the object of the alliance of the Democratic party with the liquor power? Coal and Gas.

In a speech delivered by Judge Agnew in welcoming bankers to their convention in Pittsburg, he said that there are 14 organized natural gas companies drawing supply from 310,000 acres of territory, and having over \$11,000,000 capital invested. These wells are delivering 500,000,000 cubic feet of gas per day, and are capable of yielding one thousand million feet. He estimated the total capital invested in Western Pennsylvania at \$20,000,000 and \$5,000,000 in Ohio. The amount of coal displaced by natural gas is daily 25,000 tons. The Judge's estimates as to the amount of coal displaced is probably under the amount. Persons who live within a few miles of the territory, and who supply the coal, are naturally supposing that the new fuel is a heavy detriment to the coal trade and has a depressing effect on prices. This is an error. So vast is the coal trade that the loss of the natural gas fuel as a consumer is hardly appreciated on the market. The coal producers, our people proceed to buy coal they will find that the prices have not changed very materially from those of the good old days before natural gas competition set in.

The people can always be trusted and hence a full vote means a Republican victory.

THE LIQUOR LEAGUE will get out every vote it can to defeat the Republican ticket. Initiate its example in this respect and see that every Republican in your district votes on the 8th of November.

Important Notice.

There are a number of subscribers to whom the CITIZEN has been sent for several years past and who have neglected to make any response to our former notices or bills sent them for their dues. Some of these live out of the State, some out of the county, and some in it. By the coming Holidays we will have several bills to meet and pay and will need each and every cent we can get. Therefore make this appeal to those friends to let us hear from them at least, with the best they can do. We will extend the time to all such to the first day of December coming, near a month's notice, and to any who do not answer by that date we will be liberal and accommodating as possible. Friends, let us hear from you.

Stand By The Sabbath.

—The Republican party in Law, rence county was never in better shape than is today. It is thoroughly united; has a first class ticket in every respect, and not a word can be said against a single one upon it. On the other hand the Democrats are fighting over the only place to which the law allows them a chance to elect one of their number in the Commissioners' office and the friends of each candidate are applying to Republicans to come to their aid. This is a Democratic quarrel and Republicans should vote for their own candidates, and allow the other fellows to fight it out among themselves.—Lawrence Guardian.

DYSPEPSIA

Causes its victims to be miserable, hopeless, confused, and depressed in mind, very irritable, languid, and drowsy. It is a disease which does not go away until it receives prompt attention, and a remedy to throw off the causes and tone up the digestive organs till they perform their duty. Hood's Sarsaparilla has proven just the required remedy in hundreds of cases.
