Meadeville Tribune, A reliable newspaper, which carries a certificate of veracity signed by its preacher and also by the County Superintendent, informs us that it's because the wind blows stronger now, and at shorter intervals, than it did 25 years ago.—Franklin News.

Mr. Hughes, of Pittsburgh, is putting down the sewer on Main St. at 93 cents per foot. It is an eight-inch tile pipe and the average depth of the excavation is about eight feet. At the meeting of our town council, Monday evening, the bid of Mr. Hughes for the 15-inch sewer from the Prospect bridge, around the creek and across the "island" to the outlet or connection with the main sewer, at \$4.25 a foot, and \$2 a foot for the iron pipe across the creek, was accepted and the president and secretary of the council were authorized to enter into a contract with him for the same.

The difference in the cost of 8 and 15 inch tile is so small that it need not be considered; the excavation for this sewer across a part of the "island" will be some 30 feet, yet the average depth of this sewer will not be over twice that of the Main St. sewer, and why this sewer should cost nearly five times as much per foot as the Main St. sewer is beyond our knowledge at present.

LEGAL NOTES.

Mr. Blaine of Summit twp. died on Monday of this week.
