Now Advertisements.

Administrators' notice, estate of William Hartley.  
Thomas' Phosphate.  
A. M. Reiber's Big Bargains.  
NOTICE—All advertisers intending to make contracts in advertising, should be notified that their advertising should be done no later than Monday morning.

Found Dead.

John Wilson of Clay twp. was found dead in his bed at his home, Tuesday morning. He was in Butler, Monday, and was apparently in his usual health then. He was about 40 years of age, was a son of James Wilson, who left this county about five years ago, and was married and had some property. He was a dealer in railroad ties and drew a thousand dollars from the P. & L. E. Co. on Monday while in Butler.

The Only Place to Advertise.

At the convention of general passenger agents of leading railroads held in Denver, Sept. 15, 1890, it was resolved to send all other methods of advertising except that of the newspapers. The experience of these men had fully demonstrated that money spent in railroad guides, hotel registers, fancy show cards and other schemes of like character did not pay and should be prohibited. This newspaper is the natural and proper medium through which to reach the public, and this is the conclusion of all who have any knowledge upon the subject of advertising. All other methods are wasteful and unprofitable. The columns of well established and reputable newspapers furnish the only proper means of directing the attention of the public to what you have to sell. The most experienced business men realize this.

The Printers of the "Citizen" to its Readers.

When in the course of the Earth around the Sun and the due progression of the seasons the hot days of mid-summer, and particularly those of the mid-summer holiday week approach, and it becomes necessary that all mankind and especially all printers should take a brief season of rest, recreation and vacation from their usual routine of types and galleys, and to assume among the peoples of the Earth that separate and equal existence to which the laws of nature and nature's God entitle them once a year, a decent respect for the opinions of mankind requires that they should declare the causes which impel them to do so. We hold that these truths are self-evident; that all men are created equal; that they are endowed by their Creator with certain inalienable rights; that among these are life, liberty and the pursuit of happiness; and that to secure these rights we must establish governments.

Prudence, indeed, will dictate that customary forms of government should not be changed for light and transient causes; and accordingly all experience has shown that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed.

Therefore as it has long been the custom of this office not to publish a paper on the week of the 4th of July we solemnly publish and declare our intention of not changing the custom this year.

J. H. REIBER,  
L. STEIN & SON,  
C. W. VOGELY,  
J. N. HAZLETT,  
DREY BROS.

Butler, Pa., on this, the 26th day of June, in the year of our Lord 1891.

See raisers have numerous proverbs which they regard with veneration, such as:

"A swarm in May  
Is worth a load of hay;  
In a swarm in June  
Is worth a silver penny;  
But a swarm in July  
Is not worth a fly."

Extra quality all wool cashmere 40 inches wide at 50 cents a yard, extra fine henriettes in black and colors at 75 cents and \$1 per yard at L. STEIN & SON'S.

LOCAL AND GENERAL.

—"Seasacker ice cream" is the latest. An immense crowd attended the Elks' Picnic at Slipperyrock Park, Thursday.

—The mercury has been climbing to the top of the telegraph poles lately, but good-natured Americans continue to "smile."

—The only Sunday trains in and out of Butler are on the P. & W. R. R., and are noted in our time table.

—It was probably the man who married a rich wife who first started the joke on the difficulty of finding a woman's pocket.

—According to law, a widow is entitled to her third, but the men are generally shy after she has buried her second.

—The farmers of Allegheny and Butler counties will celebrate the 4th at James Magee's Grove, near Valencia station. All are invited.

—The average human life, it is said, is growing longer because of better and more careful observation of the laws of health.

—The body of young Robert Taylor of Allegheny twp. who was killed by lightning last week, turned black almost immediately.

—Says Josh Billings: "Just as soon as a man loses his property, then we all cried out once that he was always a creditor."

—The grandest, prettiest, sweetest, most luscious bunch of strawberries we have had this year came from the nursery of the Pearce Bros. of Butler.

—The Latherns of North Washington are building a new church. The O'Connor brothers have the contract for the masonry and Eli Gibson for the frame.

—A snapping turtle that weighed twenty-two pounds was caught in the Slipperyrock near Gettysburg, a few days ago and sold to a New Castle restaurant keeper.

—It is now legal to fish with a hook and line in streams not stocked, but the gill and seines are proscribed by law at all seasons of the year. The penalty for violation of the law is severe.

—The Public Works Committee of the Allegheny City Council, and the railroad committee are at loggerheads as to whether a bridge or a viaduct shall be built across to Herr's Island.

—The fire companies of the town, led by the Germania Band and the Markham Hook and Ladder Co. with their new hook and ladder truck, made a handsome parade on our streets, Monday evening.

—Edison's latest invention, the kineograph, not only records sounds, but photographs the producer's every gesture.

—It will be a dangerous machine to have in a parlor when the young man calls to see his best girl.

—In some parts of this county the frost and dry weather of the early spring injured the growing crops more than in others, but from all we can learn there will be good crops of wheat and corn, and fruit in this county.

—A Farmers Alliance orator told the farmers at Sedgewick, Kan., that "there was no more agriculture for them should be Republicans because their fathers were Republicans than that they should be backsliders because their fathers were backsliders."

—Messrs A. Trantman & Son are the first to put down a new side walk to the full width of the same in the business part of the town. This is a matter that should have the immediate attention of all our business men, and where grading is needed to any extent, the paving should be done in blocks.

—At a late meeting of the school-board, a committee was appointed to consider the advisability of putting the Sewall-Willis system of ventilating in the Jefferson St. school building, and we think that the committee should go slow in the matter, as that system is wrong—fundamentally wrong.

—In exchange recommends this and as it is easily done, it should be tried. Now is the time to destroy burdock. Don't go forth with the grubbing hoe and blister your hands but take the oil and pour a little coal into the top of each plant. It will all die. The oil "will do the rest," and most effectually.

—The entertainment given by the "Model School" in the grand chapel of Slipperyrock Academy, last Friday evening, was a very pleasing and very successful one. The school is composed of children and they all did well. The receipts netted \$45 to \$50, which will go into the gymnasium fund. The Model School re-opens September 1st.

—The State Board of Normal School Examiners completed the examinations of the graduates of the Normal School at Slipperyrock Academy last Thursday, and awarded diplomas to twelve Seniors and forty Juniors. The examination papers and the discipline of the school were highly commended by the visitors. The Commencement exercises will be held July 2, 1:30 p. m.

—Don't forget the entertainment to be given in the Opera House, next Tuesday evening, by the Butler and South Side Councils of the Royal Templars of Temperance. The talent will all be local, and part of the programme, both musical and literary, will be original. The proceeds will be for the benefit of the art school, and tickets will be sold at 20, 30 and 40 cents each.

—The County Commissioners of Lycoming Co. have taken a step that might be duplicated, in part at least, by the Commissioners of this county. They advertise for very well regulated, and continuous tobacco choppers. County treasurer Heilmann will supply each man with a large plug of tobacco, after which Janitor Bastian will lead them out to the court-house lawn and boost them into the trees. After mounting the shade trees, there will be nothing for them to do but chew, and spit, in order to destroy the insect life that is busily engaged in cutting off the leaves of the handsome shade trees.

—The first through train on the Pittsburgh & Western road over the Ellwood short line Saturday, the road having been formally opened on Friday. The road is probably the best of the railroads in the State, the expense being \$100,000 a mile. The line is only 31 miles in length, but is very important from the fact that it is the connecting link in the Beaver Valley. It starts from Linton on the Pittsburgh & Western, crosses the Connoquessing river a bridge 65 feet high and then through a tunnel 700 feet in length it reaches the new town of Ellwood City. A new branch of it joins the Pittsburgh & Western further down and another branch touches the Erie & Pittsburgh and Lake Erie roads. The latter connection is to be made by a bridge across the Beaver river. The road is not entirely completed, only one track having been laid. The other track will be double track. The lower bridge over the Connoquessing has also been anchored, but the one over the Beaver river will not be completed for some time yet. The great feature of the line is the low grade. In a distance of 31 miles the grade is only 17 feet to the mile, while on the old Pittsburgh & Western track the line goes six miles to cover the same territory and has a grade of 40 feet to the mile. Besides this the Connoquessing river is to be dammed in order to furnish compressed air power in the factories at Ellwood—New Castle Guardian.

Borough Business.

The special meeting of the Council, Tuesday evening was for the purpose of hearing the report of the Sewer Committee, and as they had made a thorough inspection of the sewers now in use, and as the sewers are being flushed regularly, and work all right; they so reported; and the solicitor read a statement of the money paid in on the sewer assessments, and motions to pay Mr. E. P. Hughes \$15,202.16, and Messrs Ott Bros. \$2,176.00 of it, which is about 78 per cent of their whole bills, carried.

A petition of citizens of S. Main St. protesting against the proposed change in the grade of the return curb at the Campbell alley, was read and afterwards debated; and the recommendation of the Paving Committee that a slight change be made was approved, though the debate was somewhat acrimonious and the proposed change stoutly contested.

Mr. Rehling asked for the grade to be established on Wayne St. between Main and McKean, and the Street Committee agreed to attend to the matter next morning.

The average human life, it is said, is growing longer because of better and more careful observation of the laws of health.

—The body of young Robert Taylor of Allegheny twp. who was killed by lightning last week, turned black almost immediately.

—Says Josh Billings: "Just as soon as a man loses his property, then we all cried out once that he was always a creditor."
