

PENN'A White-Sand Oil Co. [A. STEELSMITH, Manager, Butler, Pa.] Dealers in Illuminating, Lubricating, Cylinder and Dynamo Oils...

Mr. Herman Hicks of Rochester, N. Y.

Deaf for a Year

Catarrh in the Head

Catarrh is a CONSTITUTIONAL DISEASE, and requires a CONSTITUTIONAL REMEDY like Hood's Sarsaparilla to cure it.

Hood's Sarsaparilla

Hood's Sarsaparilla is a blood purifier, and is the best remedy for all skin diseases.

PROFESSIONAL CARDS

- Dr. N. M. HOOPER, 127 E. Wayne St., Office hours, 10 to 12 M. and 5 to 8 P. M.
SAMUEL M. BIPPUS, Physician and Surgeon, 500 West Cunningham St.
L. M. REINSEL, M. D., Physician and Surgeon, Office and residence at 127 E. Cunningham St.
L. BLACK, Physician and Surgeon, 200 West Cunningham St.
E. N. LEAK, M. D., J. E. MANN, M. D., Specialists, Ophthalmology and Sur- Eye, Ear, Nose and Throat.
DRS. LEAKE & MANN, Butler, Pa.
G. W. ZIMMERMAN, Physician and Surgeon, Office No. 45, S. Main Street, over Frank A. Miller's Drug Store, Butler, Pa.
V. McALPINE, Dentist, Is now located in new and elegant rooms adjoining his former office. All kinds of clasp plates and modern gold work.
J. J. DONALDSON, Dentist, Butler, Penn'a. Artificial Teeth inserted in the latest and most perfect manner. Gold filling a specialty. Office over S. J. Collins's Store, Butler, Pa.
DR. S. A. JOHNSON, DENTIST, - - BUTLER, PA. Gold Filling, Rubber Extractions, Teeth and Artificial Teeth without plates a specialty. Nitrous Oxide or Vaporized Ether, Local Anesthetics, Gold Filling a specialty. Office over Miller's Grocery east of Lantz Hotel, Butler, Pa. Office closed Wednesdays and Thursdays.
C. F. L. McQUISTION, ENGINEER AND SURVEYOR, OFFICE NEAR DIAMOND, BUTLER, PA. Farm surveys promptly made. Charge reasonable. Office over Berg's Bank, Butler, Pa.
H. Q. WALKER, Attorney-at-Law-Office in Diamond Block, Butler, Pa.
J. M. PAINTER, Attorney-at-Law, Office-Between Postoffice and Diamond, Butler, Pa.
A. T. SCOTT, ATTORNEY-AT-LAW, Office at No. 8, South Diamond, Butler, Pa.
A. M. CHRISTLEY, ATTORNEY-AT-LAW, Office second floor, Anderson Hill, S. Main St., near Court House, Butler, Pa.
NEWTON BLACK, Attorney-at-Law, Office on South side of Diamond Street, Butler, Pa., Room No. 1.
J. W. HUTCHISON, ATTORNEY AT LAW, Office on second floor at the Huston block, Diamond, Butler, Pa., Room No. 1.
IRA McDUNKIN, Attorney at Law, Office at No. 11, East Jefferson St., Butler, Pa.
W. C. FINDLEY, Attorney at Law and Real Estate Agent, Office at No. 1, S. Mitchell's office on north side of Diamond, Butler, Pa.
H. H. GOUCHER, Attorney-at-Law, Office on second floor at Huston building, East Court Street, Butler, Pa.

CHAPTER XVII

The steamer Oregon had averaged about seven knots on this trip, which had been favored by superb weather. Zach had an idea that the steamer was doing her very best on Mrs. Allaire's account. It need hardly be said that passengers, officers and crew manifested the greatest sympathy for this brave lady, whose rare courage in bearing up under her misfortunes made her a heroine of the hour.

"Three years ago, as a result of catarrh, I entirely lost my hearing and was deaf for more than a year. I tried various things to cure it, and had several physicians attempt it, but no improvement was apparent. I could distinguish no sound. I was intending putting myself under the care of a specialist, when some one suggested that possibly Hood's Sarsaparilla would do me some good. I began taking it without the expectation of any lasting help. To my surprise and great joy I found when I had taken three bottles that my hearing was returning. It is now over a year and I can hear perfectly well. I can distinguish every little with the catarrh. I consider this a remarkable case, and cordially recommend Hood's Sarsaparilla to all who have catarrh." HERMAN HICKS, 30 Canal Street, Rochester, N. Y.

"Hood's Sarsaparilla is a blood purifier, and is the best remedy for all skin diseases. It is made of pure vegetable, and does not purge, pain or grip. Sold by all druggists."

BEATS THE EIFFEL

The Derby's Tower, a Strange Wonder-Work of Nature in Wyoming.

One of nature's strangest freaks, one of the greatest wonders of the world, is the Derby's tower, in the Sioux Indians call it the mateo tepes, or the bear's lodge, which stands on the banks of the La Fourche river, in a north-eastern county of Wyoming, says the Portland Oregonian.

The tower is a gigantic column, a monster obelisk of lava, which rises to a height of 1,737 feet, almost twice the height of the Eiffel tower. At the base the huge shaft of incandescent granite, through in one direction, high crystals of the volcanic rock, measuring from 1 to 2 feet through, start at the base and run unbroken to the top, giving to the column a peculiar fibrous appearance, even when viewed from the tablelands forty miles away.

How did it get there? How was it made? Once in awhile, in the present age, we have heard how portions of the bottom of one of the oceans have been pushed up by volcanic action, and even a new island added to the charts. Ages ago a similar volcanic force started a jet of lava up from the bottom of the ancient sea, and for the stack her head out of the water.

Doer while by note, mister? she inquired, "Mostly simultaneous like," she responded, laughing.

"I never heard them chime afore," she went on, "but I kinder had an idee they vuz book chimes got out for extra."

"Oh no," I assured her, "they are merely little bits from the popular songs of the day, that everybody whistles."

"S that so?" she asked in surprise. "I ain't never heard 'em up this way."

"Well, Comrade," Annie Rooney, "McGinty and so forth. Didn't you ever hear de McGinty?"

"What's the name?" she inquired. "Seems kinder like I know it."

"McGinty," I repeated, slowly, and her face brightened.

"Oh yes," she exclaimed, "I knowed I knowed it, but somehow I couldn't quite set it what it blinged. Ain't he the fellow that they named the tariff after?"

"I said it was and went in to dinner."

BRINGING THEM TO BOOK. How Six Old Girls Got Half a Dozen Young Men to Preach.

Six young ladies in Ohio, having received proposals from six young men, exchanged confidences and came to a mutual understanding, says the Brandon Banner.

"The women of America will be very much shocked to hear of a little sign which occupies a place on the coast of the Yuen-Fu river in Fochow. 'Do Not Drink Female Infants Here.' The sign is read by the Fochow people, and is a warning to the natives not to drink the milk of a female infant who has been killed by a Chinese man."

The Canadian dairy commissioner has announced that the milk of the cow which he has kept on a stone diet for about thirty years. He thus describes the manner of feeding: "He would give the cow a quart of milk every day, swallow them down and then drink a glass of beer after them. He devoured a half peck of these stones every day, and he would not eat anything else in his stomach. In appearance he is a black, swarthy-looking fellow, and, having been a soldier, made good use of the food allowed him by selling it and subsisting on dirt and grass."

Japan and China. The women of America will be very much shocked to hear of a little sign which occupies a place on the coast of the Yuen-Fu river in Fochow. "Do Not Drink Female Infants Here." LAMBS IN WINTER.

Thoughtful Experience Only Can Accomplish Good Results.

The low prices for wool compel the flock master to provide the best methods in the handling from the first detail of the industry to the final disposition of the product, whether of the fleece or the lambs or the mature wethers for mutton. The highest success depends upon it and thoughtful experience only can accomplish a good plan of doing this.

Lambs, like other stock, are easily stunted by ill-treatment. The change from green to dry food must be made gradually, and a good plan of doing this is to commence feeding at night regularly as soon as they become sufficiently cool and feed a little, gradually increasing as the weather gets cooler and the food in the pasture less. Generally young lambs must be taught to eat hay, and this should be done before grass gets too short in the pastures, as they will fail to keep as thrifty as they should. Keep them continued during the night, then rest them for five minutes in the morning to sharpen their appetites, and then while out put a small feed of hay in the racks and put them in the pasture. This should be done three days usually be all that is necessary, and they can be given whatever is necessary to keep thrifty.

Shelton could not see how it could be fed as grain. It is usually best to give the grain feed in the evening. As with all stock it is best to supply a variety, and this should be done by mixing bran and fodder, clover hay and straw. It is necessary to give a good variety in order to keep them with a good appetite. Make it a point to water every day regularly. It is usually poor economy to get them into the habit of eating snow, and careful watering every day will readily avoid this. Another point of importance is to have sufficient length of feeding rack and troughs so that all can get what they need to eat at the same time, or some of them will get more than their share, while others will be stunted. Make the troughs narrow and the racks wide, so that they will in a great measure prevent the larger lambs from bunching the grain, and in this way securing more than their share. Feed liberally as the weather gets cooler, letting the condition determine the quantity that should be fed. If the quarters are comfortable less food, and especially less grain, will be required. The plenty of bedding that will not only add to their comfort, but increase the quantity of manure, and aid materially in keeping the wool clean.

BEES BENEFIT FRUIT. It Is Not Easy to Raise Good Oranges Without Them.

The question of bees and fruit trees again commands the attention of horticulturists and growers. In some sections where bees are numerous the fruit growers are troubled at this season while packing fruit, and naturally complain of the bees eating the fruit. It is in a great measure prevented the larger lambs from bunching the grain, and in this way securing more than their share. Feed liberally as the weather gets cooler, letting the condition determine the quantity that should be fed. If the quarters are comfortable less food, and especially less grain, will be required. The plenty of bedding that will not only add to their comfort, but increase the quantity of manure, and aid materially in keeping the wool clean.
