Butler County Schools.

(County Supd. McCullough's report for the School year ending June 5, 1933, to the State Supd.)

In the last year's report of this term, we think we are safe in saying that our schools have made unusually rapid progress.

A desire to see our schools improve and prosper, is manifested by all interested in the welfare of our boys and girls.

Wages are being paid, and the school term has been increased in many of the districts. The teachers are becoming better qualified to teach.

A great number during the spring and summer months were in attendance at some of the higher institutions of learning.

We are becoming more convinced every year that teachers, as well as followers of all other professions, should enter upon their work only when they have completed some prescribed course, which should give them that thorough knowledge, training and discipline that will fit and qualify them for their life's work.

Our county institute was a success. The attendance was exceedingly large, the directors and patrons as well as teachers, manifesting an interest in its proceedings.

The districts as organized several years before, each held one or more meetings during the term.

At these local institutes was considerably larger than ever before. The teachers were assisted at these meetings by Professors Murphy, McElmoms, Kicketts, Magee, Wilson, Knack, Gilbert and Dr. Matley.

Petersville, a new school district composed of a part of Connequessing township and a part of Forward township, was organized.

Thirteen new buildings were erected during the last year. Adams, three Alphas, one; Cherry, one; Clay, one; Franklin (Ind.), one; Jackson, one; Mercer, one; Parker, one; Penn, one, and Prospect, one.

Prospect erected a fine commodious two story brick building, equipped with modern improvements at a cost of \$5,000.

Webster's International Dictionary was placed in about half the school districts of the county. Yaggy's geographical charts were also purchased by a number of districts.

With the exceptions of two, all the schools in the county were visited. Three hundred and five visits in all were made. The work of classification and grading the schools was continued. Pupils who were found to be taking but part of the work were classified in those branches, which it was deemed necessary for them to pursue.

Two hundred pupils were examined by committees of teachers appointed by the superintendent. One hundred and thirty received diplomas.

Five hundred and twenty-five applicants for teachers' certificates were examined. Three hundred and twenty-seven received certificates and one hundred and ninety-eight were rejected.

The great offer being made by the Pittsburgh Dispatch to take the sixty teachers of the public schools of Pittsburgh, Allegheny and other points in Pennsylvania, Ohio, West Virginia and Maryland, to Atlantic City in July is the talk of the hour.

The additional inducement that the twelve teachers of the sixty who receive the largest number of votes will be taken on a supplementary trip to Philadelphia, New York and Boston after the Atlantic City trip is over is indicative of the liberality which governs the Pittsburgh Dispatch in everything it does.

Give your favorite teacher the benefit of the splendid summer outing.
