

# BICKEL'S, Fall Announcement OF BOOTS and SHOES.

As the time of the year is fast drawing near when people are beginning to prepare for the cold waves of winter, I make an announcement to introduce to you our many new styles for fall and winter wear.

Having just returned from the large shoe centre of Massachusetts, where I purchased a large fall stock, I do not buy just as usual, but I have been the common topic for conversation during the long hot months of summer, but do not let that trouble you. If your corn crop and apple crop has been a failure that is no reason why you should not buy just as good footwear as before. The question now to decide is where can I buy good substantial footwear for little money? That problem will be easily solved. Visit the ever popular shoe house of John Bickel and learn his low prices, and the shoe house you will do your trading with this year will be quickly selected.

Our stock of Mens' boots is large. We have a full stock of the celebrated Jamestown Boot in plain toe and box and can sell you them 75 per cent cheaper than last year.

Boys and Youth's boots of all kinds.

Our stock of Ladies' and Misses' every-day shoes is large. We can give you the selection of a pair of grain shoes, pair calf shoes, pair satin slip shoes in button or lace at \$1.00 per pair, and also large stock women's lace up shoes, seamless, at reduced prices.

Space will not permit me to write about our line of fine shoes, but call and examine, for yourself, our stock of button, lace and congress shoes ranging in price from 90c to \$4.00.

Our stock of rubber goods this year is very large, comprising the many different styles in shoes and boots of the following Rubber Co: Candice, Boston, Woonsocket, American and Boy State.

Call at our store when in need of boots and shoes, and secure a pair to suit you at reduced prices.

**THE CITIZEN**

The Crime of the New Tariff.

The crime of the new tariff which awaits the President's signature cannot be fully measured till it has begun to cut its swath of destruction. It cannot now be even estimated without considering its multiplied phases. The crime is manifold. It strikes in many directions. Almost every provision is a wrong which hurts in some quarter. But, without going into details, here are some of the general features.

I. It is a general assault upon American industries. In some cases the blow is inflicted by destroying all protection—in some cases by reducing the protection below the safe level. The wool industry is wiped out. Lumber and timber are made free for Canadian invasion. Woolens, glass pottery, chemicals and metals receive heavy cuts. In most of these industries the protection is great enough to close them out of force of reduction of wages. In a few cases, like collars and cuffs, a special vote compelled a special concession. But the discrimination only emphasizes the general blow.

II. It overthrows reciprocity. This is a sheer, wanton, wicked, needless wrong. After the most laborious and careful efforts continued through a period of years the arrangements were completed for a reciprocal interchange of commercial advantages with Spain, Brazil, Germany and other nations. We admitted some of their products free. In return they admitted ours free or at preferential rates. If foreign commerce cannot be advanced in this way it cannot be advanced in any way. As a matter of fact reciprocity brought a large increase of trade. But the new tariff topples over all this work of statesmanship. It destroys reciprocity with all the sugar-producing countries, and throws open our doors to the wool of Argentina and Australia without exacting any return.

III. It plays into the hands of Canada and strengthens her political and industrial independence. The step is a crime as extraordinary as its iniquity. It weakens and postpones the movement towards American union. The great American lumbering interest along the border is placed at the mercy of Canada. Canadian lumber with its vast forests and its cheap labor is free to invade our possession of our markets as if Canada were a part of the United States. In the same way the farming interest along the border is crippled. The protective duty on farm products is out of order or obliterated. Canadian products are free to invade our markets as if Canada were a part of the United States. In the same way the farming interest along the border is crippled. The protective duty on farm products is out of order or obliterated.

IV. It establishes the odious Income Tax. This alone is enough to condemn it. It is repugnant to all American instincts and traditions. The unpopularity of such a tax is very far from being limited to those who pay it. It extends to all who are compelled to make returns and to subject themselves to the inquisitorial and offensive exactions of the law. Still more it extends to all who object to class distinctions in our country. It is not protective of the tax on sugar alone. It is not protective of the tax on sugar alone. It is not protective of the tax on sugar alone.
