THE CITIZEN.

The Story of an African Farm.

(Continued from last page.)

Position that makes the head ache. We of this generation are not destined to eat and be satisfied as our fathers were. We must be content to go hungry.

He smiled his automaton smile and returned the bag. Waldo thrust the book into his breast, and while he saddled the horse the stranger made inquiries as to the nature of the road and the distance to the next farm.

When the bags were fixed, Waldo took up his wooden post and began to fasten it on to the saddle, trying to twist the little blue cotton handkerchief from his neck. The stranger looked on in silence. When it was done, the boy held the stirrup for him to mount.

"What is your name?" he inquired, unglowing his right hand when he was in the saddle.

The boy replied, "My name is Waldo."

"We shall meet again some day, sooner or later."

He shook hands with the unglowing hand, then drew on the glove and touched his forehead with the little blue cotton handkerchief from his neck. The boy stood to watch him. Once when the stranger had gone half across the plain he looked back.

"Dear devil," he said, smiling and stroking his mustache with his hand, "I don't know if I shall ever see you again, but I don't think I shall ever see you again."

He smiled, and then he sighed wearily, very wearily.

And Waldo waited till the moving speck had disappeared on the horizon, then he turned and went back to his book. He had a goodly stock of books, and he had a goodly stock of books, and he had a goodly stock of books.

THE REAL DANGER

From heart disease is not the possibility of a sudden death, for that is comparatively few; but following in the wake of this dread disease comes a general breaking down of every organ of the body. Circulation is retarded, digestion is deranged, the blood is contaminated, the nerves weakened and the brain clouded.

If your heart is affected begin at once to treat it. The danger is not in the heart itself, but in the general breaking down of every organ of the body. Circulation is retarded, digestion is deranged, the blood is contaminated, the nerves weakened and the brain clouded.

A THOUGHT THAT WAS NOT ON THE RE-... The force of childhood recollections and the truth of the quotation, "A touch of nature makes the whole world akin," was shown graphically by a little incident in a restaurant the other day. A quiet looking, middle aged man of prosperous appearance was eating his dinner when another well dressed man took a seat opposite him. After giving his order in a bluff, genial manner the newcomer took a sip of water and faced around. Suddenly a queer expression came over his face as he watched attentively the actions of his vis-a-vis, and apparently without realizing what he was doing he burst out in a loud tone, "Well, well, well!"

Every one at the table, including the quiet looking man, started, and the others who had come in first and saw the speaker's gaze, turned their eyes also upon him of the quiet appearance to see what had caused the exclamation. "The man who had come in first and was in the act of spreading sugar over a slice of buttered bread, and when he realized that all eyes were turned upon him he blushed like one detected in a heinous crime and fell off of his chair. It took him a minute or two to recover, and then he said to the table in general:

"I used to get bread and butter and sugar for being good when I was a child, and being it a habit which I like to indulge in even yet, I know it isn't upon the restaurant bill of fare, but I couldn't resist the temptation."

"I must beg your pardon for my rude exclamation," replied the other man. "My mother used to put me down with butter and sugar in my lunchbox when I went to school as an 8-year-old up in the country town where I was raised, and I haven't eaten any since my childhood, and I guess I'll join you in a piece now for the sake of old times." And he did.—Bangue Whig.
