

RAILROAD SCHEDULE.

Table with columns for Train, Leave, and Arrival times for various routes including Texas & New Orleans, Galveston, Harrisburg & San Antonio, etc.

TARIFF ON SEED COTTON.

The Katy's Application Heard by the Railroad Commission.

ROUND BALE BENEFITS THE FARMER.

It Has the Effect of Increasing the Price of Cotton, Where It Is in Operation.

Austin, Texas, November 16.—The railroad commission today took up the matter of making rates for the transportation of seed cotton, the meeting having been called upon the application of the Missouri, Kansas and Texas for rates for the handling of the product that will put them upon an even footing with buyers and shippers of ginned cotton in bales, especially in so far as concentration is concerned.

REFUSE TO COMPLY WITH THE STATE LAW.

Two Express Companies Will Not Furnish Statements of Their Business to the Railroad Commission.

Austin, Texas, November 16.—The American and United States express companies having refused to furnish the railroad commission with certain information in regard to their business, as required by the act of the Twenty-fifth legislature, notice of their delinquency in this respect has been given by the attorney general, and it may be expected that proceedings to prevent them from further doing business in Texas will soon be instituted in consequence.

A BUDGET FROM BEAUMONT.

Committee of the Bar Arranges for District Court.

A GOOD DEMAND FOR BEEF CATTLE.

Several Hundred Head Purchased to Be Shipped to Cuba—Tobacco Will Visit Sabine Pass.

Beaumont, Texas, November 16.—The programme committee appointed at the meeting of the Jefferson County Bar association held yesterday, mention of which was made in this morning's Post, has submitted the following programme or order of business for the approval of District Judge West:

Organization of court, sounding of criminal and civil docket are placed as the first order of business, calling of the appearance docket being set for the evening session of the first Tuesday.

WEATHER AND CROPS.

WEEKLY REPORT OF THE TEXAS WEATHER BUREAU.

FARMERS ARE TURNING CATTLE INTO THEIR COTTON FIELDS—WHEAT SOWING IS NEAR COMPLETION.

Galveston, Texas, November 16.—United States Department of Agriculture, Climate and Crop Service of the Weather Bureau, Texas Section—Crop bulletin for the week ending Monday, November 15, 1897:

The weather during the week was exceptionally favorable for farming operations, but the ground is getting rather dry for cultivation in places over the north and central portions of the State. Much farm work was done during the week and farmers as a rule are well up with their work.

Hotel Bristol, HOUSTON, TEXAS. \$2 and \$3.50 per Day. Centrally located, electric lights, heat, return and call bells in all elegantly furnished rooms.

THE HOTELS. HOTEL YORK, \$2.50 per day. HOTEL WASHINGTON, \$2.50 per day. HOTEL WASHINGTON, \$2.50 per day.

LAWLER-RATES \$2.00 AND \$3.00 PER DAY. JAMES LAWLER, PROPR. 1000 Broadway, New York.

THE NEW HUTCHINS. W. T. HUTCHINS, Proprietor. Rates \$2.00 and \$3.00 per day.

Many persons cannot take cod-liver oil. It upsets the stomach. Now these things, we have digested the oil in Scott's Emulsion of Cod-Liver Oil with Hypophosphites; that is, we have put it up into little globules or droplets. We use machinery to do the work of the digestive organs, and you obtain the effects of the digested oil. That is why you take Scott's Emulsion.

THROUGH WITHOUT CHANGE.

Southern Pacific Passenger Trains From Texas to Algiers.

Beginning today passenger trains Nos. 17 and 18 of the Southern Pacific will run from Houston to Algiers, La., without change. The restrictions on freight traffic are in such a shape that the company is able to handle nearly everything in both directions.

A meeting will be held at Lafayette, La., today between representatives from nearly all the parishes along the line of the road, which will be attended by General Manager Kruttschnitt and Manager Van Vleck, representing the interests of the Southern Pacific, and Dr. Carter, on the part of the United States marine hospital service. The purpose of the conference is to decide upon and adopt a uniform system of quarantine for those places that desire to still maintain restrictions. The existing quarantines are so conflicting that the company finds it difficult to continue business and observe all rules, and also it is their desire to eliminate as far as possible all restrictions against freight originating at non-infected points passing through New Orleans. In the case of Calcasieu parish they will permit such freight to pass through, but not to stop. Mr. Kruttschnitt has been in New Orleans for several weeks and leaves today for Lafayette, La., to confer with Superintendent Mulvey left Houston yesterday afternoon.

CARR TO HANG.

The Man Who Inhumanly Murdered His Child Is Sentenced.

Liberty, Mo., November 16.—William Carr, felon, was this morning sentenced to hang on December 17. Carr drowned his 5-year-old daughter in the Missouri river, weighting the body down with stones. He received the sentence with a smile of satisfaction.

In sentencing the prisoner Judge Broadus said: "The crime which you have confessed is the worst I ever heard of. You are entitled to the sympathy of no one."

Carr had nothing to say. Carr is a raw-boned backwoodsman. His crime was committed in August, 1901, when he took his child from Liberty, a point near Kansas City. He tied her arms and legs with cords, paid no attention to her cries of "What are you going to do, papa?" and threw her into the river. She was found by a fisherman on October 10 last. He took her child from Liberty, a point near Kansas City. He tied her arms and legs with cords, paid no attention to her cries of "What are you going to do, papa?" and threw her into the river. She was found by a fisherman on October 10 last. He took her child from Liberty, a point near Kansas City. He tied her arms and legs with cords, paid no attention to her cries of "What are you going to do, papa?" and threw her into the river. She was found by a fisherman on October 10 last.

MONEY QUICKLY RAISED.

Colonel Uriah Lott Will Build His Victoria Road.

Victoria, Texas, November 16.—There was a meeting last night in the offices of F. C. Proctor, at the place, of those interested in the road projected by Colonel Uriah Lott to run from Victoria to Aldinger Head and from Victoria to Alvin.

In twenty minutes \$200,000 stock was subscribed in the railroad and construction company, in proportion of one to three. T. M. O'Connor is down for \$50,000 of this amount. Victoria is to have the general offices and the machine shops of the new line. Colonel Lott, one of those interested are sanguine and expect that operations will begin from this point within thirty days. The road will run via Longmont and Seddrit to Alligator Head and through Jackson, Wharton and Matagorda counties, connecting with the Gulf, Colorado and Santa Fe.

Notes and Personal.

W. B. Groesbeck, assistant general freight agent of the Katy, is in the city today.

Captain Robert Quick of the Morgan cutter El Rio was up from Galveston yesterday.

Traffic Manager Bein of the Huntington lines returned yesterday from a ten days' visit from St. Louis.

Jeff N. Miller of the general manager's office and S. R. Tuggle, superintendent of motive power of the Houston and Texas Central, returned last night from Calvert.

W. Waterman, commercial agent of the Iron Mountain; W. J. Taylor, general baggage agent of the International and Great Northern; T. E. Kinsey, superintendent of the Pullman Palace Car company, and W. Wilson, traveling auditor of the Houston and Texas Central, were among the visiting railroad men yesterday.

THE SURVEY COMPLETED.

Brownsville, Texas, November 16.—The survey of the Chicago, St. Louis and Texas Air Line was completed from San Antonio to this city yesterday afternoon. The surveying party are in camp here awaiting orders.

Notes and Personal. W. B. Groesbeck, assistant general freight agent of the Katy, is in the city today.

Captain Robert Quick of the Morgan cutter El Rio was up from Galveston yesterday.

Traffic Manager Bein of the Huntington lines returned yesterday from a ten days' visit from St. Louis.

Jeff N. Miller of the general manager's office and S. R. Tuggle, superintendent of motive power of the Houston and Texas Central, returned last night from Calvert.

W. Waterman, commercial agent of the Iron Mountain; W. J. Taylor, general baggage agent of the International and Great Northern; T. E. Kinsey, superintendent of the Pullman Palace Car company, and W. Wilson, traveling auditor of the Houston and Texas Central, were among the visiting railroad men yesterday.

HYMENEAL.

BECK-VASBINDER—Saxton, Texas, November 14.—Mr. Harvey Beck and Miss Vasbinder were married last evening at the Baptist church, Rev. J. O. Green officiating.

RIFFLE-SCHILLER—Brenham, Texas, November 15.—At the home of the bride in Wesley Saturday Mr. Joseph Riffle and Miss Annie Schiller were united in holy matrimony. The young folks are members of prominent families and have a host of friends.

M'ORKLE-SCOTT—Terrell, Texas, November 15.—Saturday night Mr. Robert M'orkle and Miss Eric Scott engaged a cab, drove up to the Methodist parsonage and were married. Miss Scott is the eldest daughter of Mr. and Mrs. J. T. Scott, and Mr. M'orkle is a prominent young man, all of the city.

SCURLOCK-THOMPSON—Grandview, Texas, November 11.—Married, at the residence of the bride's parents, two miles east of town, Mr. John Scurlock and Miss M. M. Thompson. Rev. J. W. Nicholas officiated. The bride and groom are well known and are connected with some of the oldest residences in the county and have a host of friends.

WOLKIC-CLAWSON—LaGrange, Texas, November 15.—Miss Francis Clawson of Wolkic and Mr. Joe Wolkic of Fayetteville, both of this county, were united in the bonds of matrimony at 1 o'clock this afternoon in the county judge's office. Judge Ehlinger officiated and a few friends witnessed the ceremony which wished the couple a happy journey through life.

PITTS-WALTON—Grandview, Texas, November 14.—Married, at the Baptist church in this city on November 11, at 7:30 p. m., Mr. Oliver A. Pitts to Miss Jesse Walton, Rev. D. I. Bmy officiating. The bride is the second daughter of O. C. Walton and is a beautiful and lovely young lady, with rare accomplishments. The groom is one of our promising young merchants. They have many friends who wish them a long and happy life.

Free of Charge to Sufferers. Cut this out and take it to your druggist and get a sample bottle free of Dr. King's New Discovery, for consumption, coughs and colds. They do not know you to buy before trying. This will show you the merit of this truly wonderful remedy and show you what can be accomplished by the regular size bottle. This is no experiment, and would be disastrous to the proprietors, did they not know it would invariably cure. Many of the best physicians are now using it in their practice with great results, and are relying on it in most severe cases. It is guaranteed. Trial bottles free at George W. Heyer's drug store. Regular size 50 cents and \$1.00.

TO ARRANGE FOR AN EXHIBIT.

Judge W. L. Parkinson, general agent of the Sabine Land and Improvement company, came up from Sabine Pass this afternoon and left for Houston tonight. The judge goes to the Bayou City to arrange for space for an exhibit which his company will make at the Fruit, Flower and Vegetable Festival.

SHORT TEXAS SPECIALS.

RICHMOND—New roads are being graded and opened up in the vicinity of Richmond on all parts of the county.

CHILLICOTHE—The new Methodist church at this place was dedicated with appropriate and impressive services.

DENTON—Thirteen hundred bales of cotton in Beaumont is hoped for at the end of the year, which 1000 bales have been bought at and shipped from that point.

CAMERON—George and Clark Blaneet were convicted of a general criminal case, respectively, in the penitentiary.

ROCKWALL—The man F.W. Fisher, who was burned five weeks ago, caused by the throwing of a burning lamp out of the door, died from the effects of his burns.

GEORGETOWN—The Williamson county republican executive committee has passed resolutions honoring Dr. Grant as State chairman and condemning E. H. H. Green.

ENNIS—Eight coal cars jumped the track here at the Union depot. The track was a wrecked as a result, one for public schools and will so report to the text book commission.

FORT WORTH—R. E. Lee camp, U. C. V., adopted the last of the series of Lee camps as a state one for public schools and will so report to the text book commission.

ENNIS—Big preparations are being made here by the ladies of Ennis for the celebration of the centennial of the birth of George Washington, which will be held November 15, 19 and 20. From all indications the affair will be a grand one.

CLARENCE—A protracted meeting is in progress at the new Baptist tabernacle in East Clarence, conducted by the pastor Rev. J. W. Newbrough, and assisted by Rev. Eubank of the First Baptist church.

CALVERT—Thanksgiving Day will be generally observed in Calvert. All the merchants will close their stores part of the day, and give everyone an opportunity to attend worship and enjoy a day of thanksgiving.

WHARTON—The friends of Colonel Joe Wharton are growing him for the county judgeship in next year's canvass. Although his home is in Spanish Camp, Joseph is probably the best posted man as to the ins and outs of the county. He has long stood without a peer among the legal fraternity hereabouts.

ENNIS—A local camp of ex-Confederate veterans has been organized here and named in honor of General James Longstreet. W. R. Howell was elected captain and B. F. Marchbanks secretary. The camp had a martialistic meeting yesterday evening. The enrollment now is about forty members.

CASTORA

For Infants and Children. The only safe and reliable medicine for infants and children. It is a natural product of the earth and is perfectly adapted to the system of the young.

THROUGH TO NEW ORLEANS.

Mr. E. McClannahan, who presides over the Southern Pacific ticket office in this city, this morning received instructions to resume the sale of tickets from Beaumont to New Orleans. This order of course means that the quarantine East is being lifted and Beaumont is hoped for in a few days the Southern Pacific will be in a position to re-establish the double daily passenger train service between Houston and New Orleans.

There is an extraordinary demand for beef cattle in this section just at present. A few days ago several hundred head were purchased for shipment to Cuba and there several buyers in this vicinity making purchases for the Kansas City market. The cattle purchased for Kansas City are being shipped over the Kansas City, Pittsburg and Gulf railroad.

There are germs in this city today a thousand times more deadly than those of the mild type of fever now prevailing. For instance, there is that member of the baell family known to the scientific profession as the gulfus whyskrytis. This germ, which lurks on almost every street corner, has alone caused more people to die in more different kinds of ways than all the cholera, yellow fever, typhoid fever, smallpox and diphtheria, of which we have record, and goes on killing at a rate entirely too rapid for the mathematicians to grapple with. And yet the wonder is we hear so little of it in spite of the fact that "the black plague" went out of business and died of a broken heart because it could not stand up as such as one round before such a powerful opponent. We have turned in vain to the medical magazines for information regarding the gulfus whyskrytis, but disappointment awaited us. No mention is made of its origin, history, or discovery, and there is not a line to give us an idea how it has ravaged the world for centuries, consequently there is no way to even approximately the number of deaths it has caused, except by a careful collation of the records of all the police stations in the world. This is a stupendous work, and were it possible to perform it, the result would be unsatisfactory, because the germ attacks all classes of society in numerous and insidious ways, and millions of deaths from the disease occur, of which the police bear only a faint and know nothing because they appear in the mortality lists under fancy titles.

It is stated on good authority that during the present prevailing sickness, a man suffered a severe attack of gulfus whyskrytis, a doctor diagnosed the case as cholera, and he knew nothing because they appear in the mortality lists under fancy titles. He recovered after enduring agonizing pains in the head and a very sick stomach, and was discharged, but inside of a week he had another attack, was reported as a yellow fever patient and again discharged.

He kicked properly and justly on the ground that having had the fever once before he was immune and he gained his point. We cite this case to show how easily it is for a physician to mistake whyskrytis for yellow fever and also to express surprise that medical science has not made a study of the disease. It may be, however, that as the gulfus whyskrytis is a harmless germ, no health officer or doctor would be inclined to investigate, fumigate or disinfect it, and if our memory is not at fault, we believe we once heard that the more it was doctored the deadlier it was. One thing is certain, however, and that is as a destroyer of the human race it is a becoming more rapid and malignant. It is a side partner of Old Man Death, and yellow fever is as whooping cough compared to it.

The yellow fever consists of one paroxysm, so we are told by the medical men, lasting several days, but the gulfus whyskrytis can boast of a much longer paroxysm. It has been known to cling to men for as many as forty years, and then kill them after the hardest kind of a struggle, only to be cheated out of the struggle by the achievement of the newspapers stating that the deaths were caused by pneumonia or heart failure. We have known a great many doctors who were the victims of this universal malady, and who in the advanced stages of the disease it is utterly impossible for them to diagnose the difference between a tomato can and a whitewash fence, and this fact, no doubt, accounts for a great many cases of cholera morbus, child hump, neuritis being reported as yellow fever.

Free of Charge to Sufferers. Cut this out and take it to your druggist and get a sample bottle free of Dr. King's New Discovery, for consumption, coughs and colds. They do not know you to buy before trying. This will show you the merit of this truly wonderful remedy and show you what can be accomplished by the regular size bottle. This is no experiment, and would be disastrous to the proprietors, did they not know it would invariably cure. Many of the best physicians are now using it in their practice with great results, and are relying on it in most severe cases. It is guaranteed. Trial bottles free at George W. Heyer's drug store. WEATHER AND CROPS.

WEEKLY REPORT OF THE TEXAS WEATHER BUREAU.

FARMERS ARE TURNING CATTLE INTO THEIR COTTON FIELDS—WHEAT SOWING IS NEAR COMPLETION.

Galveston, Texas, November 16.—United States Department of Agriculture, Climate and Crop Service of the Weather Bureau, Texas Section—Crop bulletin for the week ending Monday, November 15, 1897:

The weather during the week was exceptionally favorable for farming operations, but the ground is getting rather dry for cultivation in places over the north and central portions of the State. Much farm work was done during the week and farmers as a rule are well up with their work.

A general rain throughout the State would be of great benefit to general farming interests and would furnish water for stock, which is getting scarce in some sections. Great on the ranges is doing fairly well, considering the dry weather.

Cotton picking is not quite completed in some sections, especially on bottom lands, where some late cotton is opening, but the remainder of the crop is all that remains unharvested. The dry weather has been very generally picked their crop clean.

The correspondent at Corsicana states that there will probably be some top crop in bottom land, but farmers have already turned their stock in on a good deal of upland cotton. The weather has been exceptionally fine for late cotton over the southern portion of the State, and the correspondent at Missouri City states that some top cotton is beginning to open slowly, and without frost soon there will be some more cotton to gather in places, but as a general rule the top crop is a failure, and the cotton crop as a whole is below average.

Wheat sowing is nearing completion and the crop is all sown in some sections, and a good acreage has been put in. Early sown wheat is up and doing well. A rain over the wheat belt would be very beneficial for wheat and would insure a good stand of late sown wheat. The stand of early sown wheat is good.

The warm weather has been very favorable for fall vegetables and many are being marketed, but the vegetable crop is beginning to need rain.

Sugar planters are busy saving their crop, and while the stalk is not large, the quality is good. The crop is not an average in quantity.

From Post Correspondents. Mumford, Robertson County, Texas, November 16.—Cold north blowing here this morning. Some rain fell here last night.

Camron, Milam County, Texas, November 16.—A cool north wind blowing this morning, after the hard rain and blow of last night.

Calvert, Robertson County, Texas, November 16.—A norther and rain came up last night and the weather today is fine, clear and bracing.

Bryan, Brazos County, Texas, November 16.—A fierce norther, accompanied by a heavy rain blew up at midnight last night. It is clear and cold today.

Rogers, Bell County, Texas, November 16.—Cotton in this section is all gathered and cold. Very little being sold. The merchants will collect about 50 cents on the dollar.

Sugarland, Fort Bend County, Texas, November 16.—Superintendent V. T. Boystrand is having a large vine of wine made from the cane, as he anticipates a freeze soon.

Floresville, Texas, November 16.—The coldest norther of the season after several days of oppressively warm weather reached here about 3 o'clock this morning, accompanied by a drizzling rain.

Yorkum, Dewitt County, Texas, November 16.—A heavy rain came up this morning and is fair, though for several days it has been cloudy, but no rain. Almost no cotton is coming in. Nearly all farmers who have not sold are holding for higher prices.

Wharton, Wharton County, Texas, November 16.—The first general rain norther since the 1st of October came up at last night in regular style. The good effect is felt by every one. Summer malaria is now a thing of the past. A slight rain accompanied the wind.

Lockhart, Caldwell County, Texas, November 16.—After several days of ordinary south wind, a heavy norther blew up this morning, accompanied by a dashing rain and a fine electrical display. There is a considerable fall in temperature this morning.

Lexington, Lee County, Texas, November 16.—A cold north wind is blowing, the sky is clear and frost is expected. There will be nothing to freeze, the worms have destroyed the crop in September. The sweet potato crop is good. Jack Wiggins raised 300 bushels on two and one-half acres near here, and has sold 100 bushels at 50 cents per bushel.

Georgetown, Williamson County, Texas, November 16.—A brisk norther, accompanied by a slight rainfall, reached this place last night at 10 o'clock. The farmers say that the cotton is about all picked and that the top crop will not materialize. Many farmers in this county are now in the hands of the weather. It is estimated that there will be an increase of 300 per cent in the acreage of wheat the ensuing year.

Luling, Caldwell County, Texas, November 16.—At 3 o'clock this morning this section was visited by a terrific storm of wind and rain from the north, with hail, thunder and lightning. It has blown over the country with probability of a freeze tonight. Cotton in the fields and there is a good deal of it on some farms is badly scattered. Some farmers have stopped picking, as they say it will not at present prices pay for ginning, rickling and hauling.

Terrell, Kaufman County, Texas, November 16.—A heavy norther came in last night with much wind and some rain. This morning the weather is clear and cool enough for fires and overcoats, and prospects of increased cool weather. Cotton picking is coming in and there is considerable still on the farm, but has never been put on the market. The local receipts will exceed last year. In fact the present receipts lack only about \$500 bales of reaching last year's receipts.

Waller, Brazos County, Texas, November 16.—A norther came up last night between 11 and 1 o'clock and was accompanied by a heavy rain, and today a cold norther blowing. In addition to the wind will come blowing in from the north, and the weather will be a little drier. It will be of great benefit to the half-grown bolls. With this weather there will be a very good crop gathered here; a great deal more than was expected.

Warrington, Fayette County, Texas, November 16.—Cloudy, threatening weather has prevailed most of this week. A strong wind with a general rain, and a change is anticipated. Fall gardens are growing finely. Fall gardens are a failure, and little cotton remains to be picked. Nor is any as yet being sold. Business continues dull, but some there seem to be a likelihood of improvement for some time to come. Corn sells around 35 cents per bushel, and all kinds of country produce are sold to the merchant, but prices are so low that little profit is made.

Wichita, Wichita County, Texas, November 16.—A heavy norther came in last night with much wind and some rain. This morning the weather is clear and cool enough for fires and overcoats, and prospects of increased cool weather. Cotton picking is coming in and there is considerable still on the farm, but has never been put on the market. The local receipts will exceed last year. In fact the present receipts lack only about \$500 bales of reaching last year's receipts.
