The well is a six inch gusher of more than ordinary force and is said to be in strict keeping with the licavical producers on the hill. The tract on which it is located is in the deep territory area where the said is talelest and a remarkable part of the drilling in of the well is that W. H. Graham & Co., the drillows, went eighty-five feer into the oil said after they had passed through the cap rock. The depth of the well is 1168 feet. The first that with wells as this continue to come in without bailing or air pressure is alone sufficient evidence of the permanency of the field.
