## REVIEW OF MARKETS FINANCIAL AND COMMERCIAL

Stocks, Money, Exchange Bonds, Grain, Cotton, Provisions, Etc.

New York, Feb. 15.—Many stocks were materially advanced on the Stock Exchange to-day, with dealing considerably larger than on yesterday. Generally the early market was more animated than of late, and strength developed on pool manipulation and commission house buying in London sold about 20,000 shares of stock, principally Northern Pacific, while literim was reported as being a purchaser of this stock. Northern Pacific common in the local market received pronounced support, apparently on pool buying and on large dealings advanced 3 points. Around 53, at which point London was selling, enormous blacks of stock were absorbed, although the price hung for a long time at 53%. The advance in this stock progressed in spite of the dissemination of reports that the officials of the company denied that the preferred stock would be retired or that such a project had been considered. As Northern Pacific was the feature of strength, so was Burlington prominently weak. This stock, which advanced yesterday in anticipation of action on the part of Eurlington directors on a refunding scheme, opened unchanged, developed weakness and made an extreme decline of over 3 points. The lowest figure was on the announcement that nothing had been done regarding refunding at to-day's meeting in Boston. This brought large realizing sales, but the stock recovering left lise not decline only two points. The weakness of Burlington had but little effect on the other Grangers, which displayed more or less strength at intervals. The high priced investment chares were conspicuously strong, expecially New York Central and Pennsylvania. Southern Pacific and Central Pacific developed pronounced strength, especially toward the close. New York Air Brake, which has been rather neglected of late, made a sensational advance of 10%c. There was considerable covering of short sales by traders, while stock was supplied by houses with Boston and Chicago connections.

There were some sharp recessions during the afternoon, at the time when

A brisk injurity prevailed for some the prominent bond bones today. The profession today is butter market was first the profession today in the butter market was first the profession today in the butter of the profession of the N. Y. Central (1881).

There were some sharp recessions during the afternoon, at the time when Burlington and Sugar were freely offered down, but prices picked up and continued to improve to the close, the leader in the receivery being Northern Pacific common. Union Pacific and Atchison preferred were decidedly firm. It was intimated in the Street gassip that a script dividend to Metropolitan Street Railway stockholders to be subscribed at par was in contemplation, but the stock was quiet all day, and moved very narrowly.

A brisk inquiry prevailed for some of the prominent bond Issues to-day, but the market generally displayed an improved tendency. Total sales, \$3,-570,000.
