VISITING MANNERS.

Little Points of Etiquette That Should Be Carefully Observed. Many of us who pride ourselves on our good-breeding are singularly blind as to what is due to friends who are visiting...

It is useless to decry etiquette by saying that the best manners in all cases are those which hurt no one. This is true as a general law...

If you have an acquaintance who is entertaining friends whom she wishes you to meet, it is your duty to call promptly, and if possible offer some hospitality to both guests and hosts.

If the mutual friend is your guest, you may be sure that, if she is a woman of good-breeding, she, in turn, will accept no invitation which does not include you...

These same rules hold good for you when you are the guest. Before you go to make the visit, send word to your friends where and with whom you are to stay...

As to the disposal of your time, when you are visiting, no etiquette requires you to accept all the plans of your hostess, if you feel unable to do so...

Indeed, a skillful hostess will manage to secure you this privilege, and not make the mistake of working too hard to amuse you, and so absorb every moment of your visit into her idea of what is pleasure for you.

WITH TAIL IN AIR.

The Main Part of a Tree Is That Which Is Underground. Yes, a tree is an underground creature, with its tail in the air. All its intelligence is in its roots.

The leaves make a deal of noise whispering. I have sometimes thought I could understand them as they talked with each other, and that they seemed to think they made the wind as they wagged forward and back.

Do you think there is any thing so very odd about this idea? Once get it into your heads and you will find it renders the landscape wonderfully interesting. There are as many kinds of tree tails as there are of tails to dogs and other quadrupeds.

BEES AND ANTS.

Daniel Webster's Habits.

There has been a good deal of controversy about Mr. Webster's habits. When he went to England he acquired what I do not think was his habit before, he became convivial; and on his return he showed an evident liking for the brandy bottle. He was never an inebriate, but sometimes he made his most powerful speeches while under the influence of strong drink, and on more than one occasion he was sadly the worse for it.
