LONG'S MUSIC HOUSE SHEET MUSIC

Department. Ditson's music received as published. Prosser's publications in full and a large line of 10-cent music handled.

Darst, Smith & Co., UNION ST., SALEM, VA.

Wholesale and Retail Dealers in COAL, LIME, CEMENT, BALED HAY, ROYAL PATENT FLOUR, MEAL, CHOP, BACON, ETC.

R. H. CARPER, COLLEGE AVENUE, SALEM, VA.

Steam Fitters, Water and Gas Plumbers,

Dealers in Iron, Lead and Terra Cotta Piping, Pumping Machinery, Pumps, Rubber Hose and Packing.

L. W. SPIES, The Salem Baker and Confectioner, Main Street, Salem, Va.

Cakes and Confections, wholesale and retail. Orders for weddings and parties filled. Ornamental work a specialty.

Camden Iron Works, ALABAMA STREET, SALEM, VA.

Manufactures Ornamental and Architectural Castings Iron Fencing, Crating, Iron Fronts, Miners' Cars, etc.

SALEM MATTRESS FACTORY.

Hair, Straw, Shuck, Excelsior and African fibre mattresses at wholesale. Lowest prices. Hair mattresses remade thoroughly and cheaply.

WANTED—WASHING AND IRONING for gent's or families. Free delivery. LYDIA A. BROWN, Water street, Salem.

PROFESSIONAL. W. M. MONTGOMERY, ATTORNEY-AT-LAW, EAST WING COURTHOUSE, SALEM, VA.

HELPS BY THE WAY.

Get your new bread with a hot knife. Fruit stains on white cloth will scald out or freeze out.

BORAX and sugar will disperse ants and other insects. Dip a knife in cool water to smooth the icing on a cake.

REMOVE iron rust by applications of salt and lemon juice. Dip spots of mildew into buttermilk and place in the sunshine.

Use half a raw potato instead of cork to apply bristol brick to steel knives. SPRINKLE dry salt among your furs, under and on your carpets, as a prevention of moths.

The long-clinging odor of onions can be removed from knife or dish by heating them when dry. Do not fill the room with smoke from the griddle, but "grease" it by rubbing with half of a turnip.—A. Lewis Woods, in Ladies' Home Journal.

THINGS MILITARY.

The Russian government has adopted the Canet quick-firing gun. Dogs will be trained for carrying messages during wars in Austria. A TORPEDO boat 120 feet long, built for Victoria by Yarrow, made 2 3/4 knots an hour for three hours on her trial trip.

A COCKING MAIN.

A Sporting Event Which the Police Knew Nothing About.

Unknown to the police, there was a cocking main down near the Hookman block when all was quiet last night, for a purse of ten dollars a side. The fight was manifestly unfair from the start, and so Referee Smith stated, on account of the great difference in the weight of the two birds, but the owners of the birds were so sanguine of the superior merits of their respective birds that the main proceeded according to the accepted rules of New Jersey, and resulted in the small, black-breasted red running his gaff through the brain of the big red in the third round, killing him soon after.

A good deal of side-betting was done, and two other fights were arranged to come off at the first favorable opportunity, which may be any night, for the neighborhood around the old freight depot is so quiet that the policemen rarely bother this section more than once a night. About fifty people were present, each paying an entrance fee of twenty five cents, which was added to the purse.

BREVITIES.

At a meeting of the Christian Endeavor Society of the Lutheran Church, Wednesday night, the following officers were elected to serve for six months after March 1st: Irvin J. Long, president; Ernest McCauley, vice-president; Miss Lelia Walter, secretary; J. Luther Frantz, corresponding secretary; Miss Nellie Phillips, treasurer.

Yesterday was a day of removals. Dr. Killian moved his office to Comp's pharmacy, Allen & Tompkins moved theirs to a room over Lee & Whitescarvers, and Overstreet & Co. took possession of Heller's store.

Mrs. Susan Zirkle, the aged mother of Sheriff G. B. Rirkle, recently had the misfortune to break her arm at her home near Cave Spring.

At the handsome residence of Postmaster W. Lee Brand, on Union street, Thursday night a reception in honor of Miss Carrie Bayley, of Hollidaysburg, Pa., was attended by the following ladies and gentlemen: Judge and Mrs. W. Griffin, E. G. Langhorne and wife, A. T. Powell and wife, W. B. Bowles and wife, E. M. Worden and wife, Mr. Ruthrauff and Mrs. M. S. Evans, Mrs. George St. John, Miss Nina Worden, Dr. J. J. Shanks and Messrs. J. E. Shipman, S. P. Clements, W. S. Taylor, L. C. Hansbrough, H. G. Comp, W. Johnson and D. E. Brand. Whist, music and singing, with a splendid supper to follow, made the entertainment a charming success throughout.

Wood Landon, of West Salem, has obtained a position as salesman with Meals & Burke, clothiers, of Roanoke.

Already talk is going on as to what will be on the next council ticket in May. Several changes will be made, though every one agrees that the present council has acted wisely and well in all that it has done, especially on the sewerage question.

C. B. Sibert has a force of hands at work getting out timbers for the new dam, which his counsel, Col. Hansbrough, says he surely will be permitted to erect, as he owns the land on both sides of Roanoke river at that point. The mill is full of machinery for grinding both corn and wheat, and if repaired and put in running order will be a valuable property. At present the question whether or not the dam will be erected is of more interest here than any other local matter.

C. D. Mahone, of Salem, has secured the contract for the roofing of the handsome \$40,000 hotel at Radford, now being built there for Gen. S. C. Wharton.

Pronounced Hopeless, Yet Saved. From a letter written by Mrs. Ada E. Hurd, of Groton, S. D., we quote: "Was taken with a bad cold, which settled in my lungs, cough set in and finally terminated in consumption. Four doctors gave me up, saying I could live but a short time. I gave myself up to my Savior, determined if I could not stay with my friends on earth, I would meet my absent ones above. My husband was advised to get Dr. King's New Discovery for consumption, coughs and colds. I gave it a trial, took in all eight bottles; it has cured me, and thank God I am now a well and hearty woman." Trial bottle free at Christian & Barbee's drug store, regular size, 50c and \$1.

Good Looks. Good looks are more than skin deep, depending upon a healthy condition of all the vital organs. If the liver be inactive, you have a bilious look, if your stomach be disordered you have a dyspeptic look, and if your kidneys be affected you have a pinched look. Secure good health and you will have good looks. Electric Bitters is the great alterative and tonic acts directly on those vital organs. Cures pimples, blotches, boils and gives a good complexion. Sold at Christian & Barbee's drug store, 50c per bottle.

Bucklen's Arnica Salve. THE best salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns, and all Skin Eruptions, and positively cures Piles or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by Christian & Barbee.

A. L. JAMISON & Co., coal and feed dealers. All kinds of feed Office at junction of Norfolk avenue and Campbell street. Telephone No. 105.

The George Steck, Weber, Chiseo, Jacob Bros., Everett and Cornet pianos are well and favorably known in the music world. The Smith Music Company have them.

Sickness Among Children. ESPECIALLY infants, is prevalent more or less at all times, but is largely avoided by giving proper nourishment and wholesome food. The most successful and reliable of all is the Gail Borden "Eagle" Brand Condensed Milk. Your grocer and druggist keep it.

FINEST cabinets, \$2. Sidelinger's, 31 Jefferson

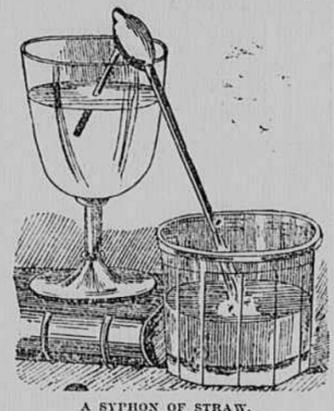

A SYPHON OF STRAW.

Two Straws and a Nut Are Necessary to Make One.

A siphon to play with can be made with a nut and two straws. Take a peach stone, a Brazil nut, or any nut with a large kernel, and cut in it two holes at right angles with each other. If you distrust your powers of cutting, rub down the nut on a stone. Then clear out the kernel with a pin, and insert into each hole a straw, making the joint air-tight with soap or wax. Let one leg be longer than the other.

Now arrange two glasses as shown in our sketch. Put the short leg into the water in the upper glass, give a suck at the end of the long leg, and the water will begin to flow and continue to do so until it sinks below the level of the short leg.

For emptying fish-bowls and aquaria, and getting water out of cisterns when frost has put a stopper in the pipes, siphons are freely used, the simplest siphon being a length of India rubber tubing, and the best way of using it is to immerse it in water so as to fill it and then, holding a finger at both ends, keep the water in it till the proper position is obtained with the short leg in

A SYPHON OF STRAW.

the liquid and the long one hanging into the receiver.

But how does it act? The weight of the liquid in the long leg exceeds that in the short leg. As the long leg is emptied the pressure of the air keeps the short leg full, and, as the column of water is unbroken, it necessarily flows down from the highest elevation to which the short leg leads it.

Strange to say, the siphon was unknown until 1690, when Reiselius discovered it at Wurtemberg. He wished to keep the affair secret, but Davies, Papin and Sturmius all hit upon the right explanation as soon as they saw the effect. And a good deal of siphoning followed.

One of the most ingenious devices hit upon was the vase of Tantalus. In this a siphon was hidden in the inner casing of a cup and was taken down in the casing to the ground. The short end of the siphon rose only half up the cup, and consequently the cup could never be more than half full. For when water was poured in it it would rise and remain until the pipe of the siphon was full to the curve, and then it would immediately begin to run away. The vase of Tantalus was for years merely a toy, but when the Languedoc canal came to be made the engineer adopted the principle for emptying the reservoir at the summit level when continuous rains gave too much water.—Golden Days.

A RUSSIAN DELICACY.

Batevnya, a Soup Made of Cold Beer and Vegetables.

When the Russian wishes to pay a compliment he will invite you to dinner; he will ask you to stand with the other guests around a small side-table, laden with hot curries and cheese omelettes, bread, butter and radishes, caviar, and plentiful beer, and a wicked-looking, white Russian whisky called Vodka; here you make an ordinary meal, while wondering at the handsomely-decked table in the center of the room, and why you were not asked to sit down there. But this first meal finished, you do sit down and forthwith proceed with a dinner of many courses, served a la Russe, everyone eating with as much gusto as if breaking a fast.

You become accustomed to the Zakouska, as all this side-show business is called, and dinner gets to be unsatisfactory without it. So important a function is it, that even at the hurried table d'hotel of a station, no matter how insignificant or far away from the main road, the Zakouska is never omitted.

The host bent on serving his choicest dish will offer you Batevnya, which is the euphonious name of cold beer soup, a compound requiring more courage to attack than enlisting for the wars. Of what is it made? Alas! of what is it not made! Spinach, salmon (they have magnificent salmon in Russia), green onion tops, strings of sausages, poached eggs and beer—much beer. To perfect this remarkable soup, to which every true Russian is devoted, the servant presents in one hand a dish of sour cream and in the other cracked ice; the rule is to take a liberal portion of each and stir in judiciously!—S. W. Selfridge in Wide Awake.

Guarding the Little King.

One of the most curious customs in connection with the court of Spain is the provision which is made for the safety of the sovereign at night. The slumbers of the little king, and, indeed, the entire palace, are watched throughout the night by a body of men, who, for four hundred years, have enjoyed the exclusive privilege of guarding their royal master or mistress from sunset to sunrise. They are bound by tradition to be natives of the town of Espinosa, and to have served with honor in the army. It is they who lock the palace gates, with much ceremony and solemnity, at midnight, and who open them again at seven o'clock in the morning. Their fidelity to the person of the sovereign is as traditional as their strange and ancient privilege.

FOR INGENIOUS BOYS.

Some Things They Can Make at Home If They Are Industrious.

"You know, uncle, you promised to tell me of some of the things that you used to make when you were a boy, and describe how you made them. It rains this afternoon and I think this is just the time."

Although I was quite busy when my nephew made this request, I was glad

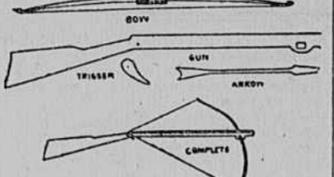

FIG. 1.—THE CROSS-GUN.

to gratify him, so I took out a piece of paper to illustrate, and began by asking him if he ever made a cross-gun, or, as some called it, a bow-gun.

"No, sir; what is it?" "It is made like this: Get a good piece of birch or oak—birch is the best—and make a strong bow about three feet long, just as you would for an ordinary bow and arrow, only the middle of the bow is made square for about two inches, tapering toward the ends. Be sure both sides are even, as it will shoot better." Then I made him a picture of the bow as shown in the illustration in Fig. 1.

"Now cut from a piece of pine board about an inch thick a model of a gun, having the barrel about one and a half inches thick. Within six inches of the end of the barrel on the under side make a knob, and cut a square hole in it just the size of the middle part of the bow, being sure to make a tight fit. It should be like this," and I drew an outline of the gun as shown.

"The top of the barrel must be grooved like the letter V to receive the arrow, and at the end of the groove a notch is cut, to which you can attach a trigger or the string can be pushed up with the finger. If you make a trigger, make it the shape of the diagram shown, and you will find that it will throw up the string nicely if screwed on just in front of the notch. The arrow can be made of a piece of pine wood. Make it like an ordinary arrow, but have the shaft wider and thinner than usual, like the one in the cut. Now you can put the bow into the barrel, string it up, and there is the complete cross-gun, like this," and I drew a picture of the gun complete.

"Do you think you understand this well enough to make one?" "Yes, sir, and I am going to try; but first I want to make a house for the two rabbits that Willie Mason brought over this morning. Father says I may keep them if I will make a safe pen."

When I was a boy I used to keep rabbits, and I knew just how to make what he wanted, so I replied:

"In the first place, dig a hole about five feet deep and large enough to put in a large box or a barrel. Saw out a

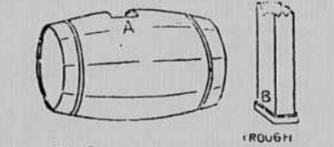

FIG. 2.—BARREL AND TROUGH.

hole at the bung about eight inches square. After you have placed the barrel in the right spot fill it full of earth and then build a trough from the barrel to about a foot from the top of the ground."

"I wish you would draw me a picture of it, uncle, for I can understand so much better when I see how it looks on paper."

So I drew a picture of the barrel with the hole in the top at A, as shown in Fig. 2. Then I made a picture of the trough and then one of the pen complete, which I called Fig. 3.

"The trough is made by nailing four boards together, and nailing some pieces of wood at the place marked B to keep it from slipping into the barrel and for fastening it to the edges of the square hole. After fastening it to the barrel fill it with earth. It must be placed in a slanting position, for the rabbits could not climb up a straight surface. Then make a floor about four feet square, with an opening for the trough, as shown in Fig. 3 and C, and nail boards a foot wide around it which will bring it up even with the ground, as at D D. Pack the earth all around the barrel and trough and then make a floor as large as you wish the pen to be. The square place in the center must then be filled with earth, and if you can

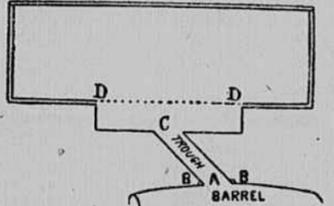

FIG. 3.—THE PEN COMPLETE.

get some turf put that over it. Then build the pen upon the floor as high as desired, either of slats or of poultry netting."

"But why do you make all the underground part?" "Because rabbits like to burrow, and they do much better if they can do so. They will dig all over the square box of earth and will find the trough because that is the only place by which they can get down. There is room enough in the barrel to satisfy them, and they will at once make a nest. They will be perfectly contented with this pen because they can dig freely and at the same time they cannot get out, so your father will not have cause to complain."

A few days later I was called out to see the rabbits in their new pen and the boy had made it exactly as I have described it.—American Agriculturist.

CITY DIRECTORY.

Of the Principal Business Houses of Roanoke.

The following is published daily for the benefit of strangers and the public generally. It includes all trades and professions and cannot fail to prove of interest to all who intend transacting business in Roanoke:

ARCHITECTS. GUSTAF BOTTLIGER, Masonic Temple. NOLAND & DE SAUSSURE, Architects, Masonic Temple. W. M. L. REID, Masonic Temple. WILSON & HUGGINS, 19 1/2 Third avenue.

ATTORNEYS-AT-LAW. CHARLES A. McLUIGH, Room 10, Kirk Building. FIRST NATIONAL, Salem ave. & Henry st. I. BACHRACH, 54 Salem ave.

BOOTS, SHOES, TRUNKS, ETC. WEST END, cor., 108 Jeff. st.

BUILDERS AND CONTRACTORS. F. J. AMWEG, Commercial Bank Building. FRANK H. MAY, 105 Jefferson st., P. O. Box 9.

BUSINESS COLLEGE. NAT. BUS. COLLEGE, 3rd ave. & Henry st.

CANDY, MAN'FR, FANCY CAKE BAKER & ICE CREAM FURNISHER. CATOGNI'S, 50 Salem ave.

CLOTHIER, TAILOR AND HATTER. JOS. COHN (E. M. Dawson, Manager), 44 Salem ave.

COAL, WOOD, LIME AND CEMENT. J. C. F. BELL & CO., 219 Salem ave. s. w.; tel. 19. NOTTINGHAM & HALLET (sawed stove and kindling wood), 7 Commerce street.

FRESH FISH, OYSTERS AND PRODUCE. B. E. ODELL BROS., City Market.

GAME, DRESSED FOWLS, VEGETABLES, &c. S. J. AKERS, City Market. J. W. SIMCOE, City Market.

PRODUCE, FISH AND OYSTERS. HUDSON & DEAL, 19 Salem avenue n. e. (wholesale and retail).

ROANOKE DRESSED BEEF CO. N. RENSCH, Stall No. 8.

Pay Day at the Shops. Yesterday was pay day at the Roanoke Machine Works and upwards of \$40,000 was distributed among the employees. There was a general hustling around yesterday afternoon and last night. Paying monthly bills was in order and all the stores kept open as late as they do on Saturday nights. It is thought the pay roll for this month will exceed \$50,000.

Horses Shipped Over the R. & S. G. M. Fenley shipped a carload of horses over the Roanoke and Southern yesterday to Martinsville. This is the first stock that has been shipped over the new road. Mr. Fenley is an extensive stock raiser. He made the purchase in Southwest Virginia.

TUNE paints, plaques, artists' brushes. Fox & Christian, 105 Commerce street

PROFESSIONAL.

GEO. L. COLGATE, CONSULTING AND SUPERVISING ELECTRICAL ENGINEER, ROANOKE, VA. jan10-tf.

Oakey & Woolwine. Funeral Directors and Practical Embalmers, 130 Third avenue, Roanoke. Calls answered in city or country. Residence telephone No. 23; office, 61. ap7-1y
