

# An Electric Home

Progressive owners of houses, architects and contractors never think of building or remodeling a house nowadays without including specifications for electric wiring, because the people who buy, rent or build houses have been educated to the point of demanding the necessary electric conveniences.

You would not stay at a hotel that did not use electricity—the requirements of convenience, economy and health in your own home are very much more important. Phone Commercial Dept. 35.

**Excitement Over Local Option.** Mayor Gellatly states that he could have put in almost every hour of his time in making local option speeches. The people seem to want direct evidence from cities which have made a trial of a dry regime. The mayor, however, over exerted himself last Sunday at Bellingham, making three addresses, and had a bad attack of la grippe at Vancouver. He is feeling better now but will engage in no more speaking at this time. Bellingham, Everett, Auburn and Skagit county towns will vote on the local option question next Tuesday.

# The Bungalow, the Camp and the Summer Home

can now compare favorably with the most palatial residence in lighting effects and in cooking facilities. This is made possible by the introduction of the wonderful new fuel

# PYRO

ALCOHOL (Denatured)

FOR LIGHTING nothing can compare with it in brilliancy, economy, portability and safety. All the druggery and uncleanness of caring for the ordinary lamp is eliminated. Because of the small amount of heat it diffuses and its harmless effect upon the atmosphere it is pre-eminently the ideal light for summer.

FOR COOKING purposes Pyro is unique. All the unpleasantness of cooking in hot weather is obviated. Its intense flame is hot applied just where it is wanted. It cooks quickly without heating the air of the room.

The tax of \$2.08 per gallon on Pyro Alcohol Denatured has been removed by the U. S. Government, thus permitting its sale at a popular price. The process of denaturing Pyro simply renders it unfit for drinking.
