Vocal, Culture, Piano, Harmony, Choir, Chorus and Concert

Music is preeminently the art of the intellect and is deeply rooted in our aesthetic nature. Truly can it be said here is an aid of the highest, the deepest value; it will repay you a thousand fold for the time spent in its study. It is the universal language for all rich and poor—for the children, the youth, the college boy and girl, the business man and woman, a universal means of elevation and of self culture.

Socrates said: "True education includes gymnastics for the body and music for the soul, and music must begin and continue with other branches."
