HEADLINERS TONIGHT.

Musical Comedy.
 Hippodrome.....The Rich Miss Single
 Photoplays.
 Grand.....Oliver Twist
 Princess.....Black Sheep of Family
 Nelson.....Inspiration of Harry Larrabee
 Dixie.....The Americano

DELIGHTFULLY tuneful operetta is being presented by Zarrow's Little Bluebird Company in the "Rich Miss Single" for the second and last time tonight.

Jack Fugay and Harold Giles are a pair of light opera comedians—one Dutch and the other Irish—such as are seldom seen in tab shows. The sensation of the playette is furnished by a quintette of dancers that won liberal applause from the audience.

Tomorrow the bill changes to "The Haunted House," which is said to be the strongest comedy program in the company's repertoire.

"The World Against Him" with E. K. Lincoln and June Elvidge in the star roles, will be the attraction at the Grand tomorrow. This is a World picture Brady-Made and tells a striking dramatic story.

"The Inspiration of Harry Larrabee," a stirring three reel drama with considerable pathos and a gripping love theme is at the Nelson today. Also there is a screaming Ham and Bun comedy called "The Misfit Millionaire."

These two features make an exceptionally strong bill and are doubly attractive because of the varied character.

Margaret Landis and Clifford Grey are starred in the drama and by their previous work in the Fortune Photoplays are already favorites at Manager Nelson's pretty theatre.

Helen Dunbar, who plays the prominent role of Jane Warren in Metro's wonder serial, "The Great Secret," a Princess attraction today, in which Francis X. Bushman and Beverly Hayne are co-stars, is known in the motion picture world as "the actress with the largest and most diversified wardrobe." With Miss Dunbar her wardrobe has become a fad.

This fad of Miss Dunbar's has cost her much money, but she believes it is worth it. Her extensive wardrobe needs all the space of fifteen unusually large trunks.

Charles Dickens' immortalized novel "Oliver Twist" is at the Grand today in all the perfection to be expected from the Laskey studios. The fascinating Marie Doro is the star.

The famous English novelist is chiefly noted for his wonderful drawing of characters. To secure these characters and present them on the screen was one of the chief tasks of the producing company. Marie Doro, who was the ideal Oliver in the all-star revival of the play on the speaking stage several years ago, was selected for the difficult character described by Dickens. The cast supporting Miss Doro is an all-star cast, including Hobart Bosworth and several other well known character actors.

The Kasky company made exhaustive research into London conditions of the period in which the story was written and have reproduced everything with great fidelity and attention to detail.

One of the latest additions to the Metro-Popular Plays and Playettes is Violet Reed, who is supporting Mme. Petrova. Miss Reed was born in Chicago, educated in the public schools of Philadelphia, and then she attended Lombard University at Galesburg, Ill. She went on the stage at the age of 18, appearing in "Coming Through the Rye." Next she was seen with Eddie Foy in "Mr. Hamlet of Broadway." Concert work appealed to her at this point in her career, and she left the stage and studied voice culture. Then she appeared in oratorio and concert work, but abandoned that to go into motion pictures.

Douglas Fairbanks in "The Americano" is at the Dixie today. It is a Triangle Comedy drama, entirely befitting the strenuous star. His plunging through a South American revolution is full of thrills.

BABY WEEK WILL BE OBSERVED HERE

Woman's Club Plans Wide Campaign in Interests of the Children.

"Baby Week" which title designates a movement nation wide for better babies and a decrease of infant mortality will be observed in Fairmont this year in connection with the National baby week which includes the week from May 1 to May 6.

The movement in this city is under the direction of the Woman's Club and plans for its celebration include a campaign through the churches, the public schools, the movies, the press and various other mediums which seem practical. Plans as mapped out by the committee in charge would include a Sunday of sermons in the various pulpits of the city on some phase of the work, films in the various picture shows which would further the interests of the baby's health besides the publicity which the local press accords. However these plans have not been definitely outlined at this time.

Baby week originated in 1914 in Chicago. Later in the same year New York joined the campaign followed by Pittsburgh, Indianapolis and Topeka. In the following year the General Federation of Women's Clubs co-operating with the Children's Bureau of the United States Department of Labor started a nation wide movement which was participated in by more than 2,000 cities and towns, West Virginia contributing the number of 13 towns in which the event was observed.

Among the projects which the movement hopes to further in the campaign is the registration of infants at birth. Care of infants in summer, prenatal care, etc. The results of better babies week are quickly realized, a campaign conducted at this season of the year should be shown at the end of the season in the decrease of mortality among infants in the summer months.

"She Wasn't to Be Caught."
 Mr. Lawhead—"Why do you treat me so coldly? Why didn't you answer the note I wrote you last Thursday?"
 Miss Brushley—"Sir, I don't wish to have anything more to say to you. You began your note by saying you 'thought you would drop me a line.' I want you to understand that I'm not a fish."

The Ruler.
 Blessed above all others is he for whom the kingdom of Self-Respect remains to have and to hold. For there he always rules from an unchallenged throne. Across its benign boundaries no invading force can ever cross. Unthreatened and unafraid, he is evermore the master and the maker of destinies eternal and abiding.

Not Product of Nature.
 The natural products of the Arabian deserts and other oriental regions which bear the name of manna have not the qualities of the manna of the Bible which the Israelites fed upon for 40 years until they got the new corn of the land of Canaan. The manna of the Scriptures may be regarded as wholly miraculous and not in any respect a product of nature.

POPULAR AND COMMON BREEDS OF GESE

TOULOUSE IS GIANT OF GOOSE FAMILY.

The Toulouse is the giant of the goose family. It is a native of France. Its ordinary weight is from 15 to 20 pounds, but it is not uncommon to find specimens weighing from 25 to 30 pounds. This is the typical gray goose, but beneath and behind these are white areas in the plumage.

It is said by those who have had experience with this breed that young geese during the first year lay from 15 to 25 eggs, when older they may lay from 25 to 40.

The Embden is a popular breed in some places. The body of the birds is snowy white, the legs and bills yellow. They have good type and conformation. In size it is the same as standard for the Toulouse, though it is said a smaller number of Embden reach this standard than of Toulouse.

Only One Cure for Selfishness.
 Selfishness is a disease, and, of course, it is attended with pain. It is a disease of the mind which has its inevitable effect on the body. And its cure is in the deliberate practice of its opposite.

A Real Friend.
 "Pa, what is a friend?" "One who knows you well and yet doesn't tip it off to all the agents in town that you are thinking of taking out a thousand dollars' worth of life insurance."

FRESH AIR VERY NECESSARY

Without Proper Ventilation Poultry House is Neither Dry Nor Sanitary—Bad for Health.

Fresh air is very necessary in the poultry house. Without ventilation the poultry house is neither dry nor sanitary. Chickens in a damp house are more liable to colds and roup than in a dry house. One of the best ways to ventilate in winter is by having an opening covered with muslin. An opening on the south side, 2 by 3 feet for each 8 or 10 feet of length of house. A good way is to put the muslin on a frame which can be on hinges so that it can be raised on warm days, to allow more air to enter.—North Dakota Experiment Station.

MOULDY AND DECAYING FOOD

Kills and Injures More Young and Old Stock Than Any Other Cause—Poor Economy.

Mouldy, sour and decaying food kills

and injures more young and old stock than almost any other cause. It is poor economy to have a few cents' worth of spoiled food and lose several dollars' worth of chickens from the poisonous effects of the food.

In the Silent Opera.
 "What do you think of my daughter's voice? Do you think she would make a success on the stage?" "She might—in the movies."

Silence.
 There is no better ornament for the ignorant than silence, and did he but know this he would not be ignorant—Sadi (Tr. by Youel B. Mirza).
