Natural Aristocracy. The democratic element in modern society is undoubtedly gaining in strength every year, and there is no good reason for lamenting its advance. But it will never do away with the natural aristocracy which has made skill in the conduct of business the endowment or the acquisition of a few. The weakness of co-operative production thus far has been its gross undervaluation of the manager.—Nicholas Paibe Gilman.

NORMAL CAMPUS SOON TO BE GREEN

Choice Grass Seed Was Placed in the Ground Last Week.

The grading on the grounds surrounding the Fairmont State Normal school which has been in progress for a number of weeks has been completed and last week the ground was sown with choice grass seed. A few days now should see the first appearance of the grass and a few weeks, it is thought, will see the campus covered.

The campus is beautifully laid off in terraces, walkways and driveways, and now presents a slightly appearance and when covered with grass no prettier spot will be found within the city limits.

To the rear of the building the campus has been given over to the cultivation of potatoes and other crops. If the weather permits the potatoes which are to be grown on three-fourths of an acre of ground here will be planted. This planting was to have taken place last week, but the seed potatoes which were ordered were lost in transit and failed to appear at the promised time. However, they have been received and the weather permitting, tomorrow will be planted by the student body.

proclamation, and when the class from which soldiers are to come is to be segregated by draft, of making the selections from the drafted persons whose military services the nation most needs and whose civil and domestic services can best be spared.

"Emphasis is placed upon the provisions of this Act making the duties thereunder compulsory upon yourself and the other person designated by the Governor under the President's direction.

"In making the enrollment the registrars appointed for the last general election have been and are designated registrars to conduct the enrollment of the persons indicated in the President's proclamation. It is the duty of the persons of the indicated class to present themselves at their respective voting precincts for enrollment, and the failure so to do subjects them to pains and penalties. The registrars will sit at the voting places within their respective precincts on the day or days indicated in the President's proclamation, and register all persons presenting themselves. And on the day following begin to enroll all persons of the designated class within their respective precincts who did not present themselves for registration. They shall complete the work as rapidly as possible and turn over the registration to the county clerk of the county. In this connection it is the duty of the sheriff of each county to furnish, if necessary, a sufficient number of deputies to see that all persons of the designated class present themselves for enrollment, and when necessary to make arrests of those who may refuse to be registered, or who in any way interfere or impede the registrars in their work.

"For the purpose of expedition the registrars have been notified to call on you forthwith for their supplies, which have been sent you direct from the War department. And you are instructed to advise this office forthwith by wire if any registrar fails to present himself in time. "Your attention is invited to the fact that two registrars have been employed in each precinct and two persons of opposite politics have been put on your board. The reason for this is obvious. Our country is in a great war. It is necessary that we utilize and conserve our man power. We must not have any suspicion of partisan or unfair methods in the execution of this law. "It is hoped and urged that you take steps to get the registrars started promptly, and that your board get together and organize at its earliest convenience, advising this office of such organization. Wire for any information desired, and do not hesitate to wire or telephone at its expense when, in your judgment, this is necessary. "While the duties are compulsory, it should be borne in mind that if these duties are well and conscientiously performed you are performing a patriotic service for your country in the time

of a great war, and the government will be prompt to express its appreciation."

The supplies for the registrars spoken of in the letter to the sheriffs as having been sent direct from the War department have already arrived at the Marion county court house.

The letter to the registrars, after reciting the action of the government and the governor, says:

"You will understand that the Act of Congress gives you no option to decline this duty, but you are required, under the penalties provided therein, to perform the services herein set forth.

"You will forthwith call upon the sheriff of your county, and get registration blanks, supplies, etc., furnished by the War department, on which to make the enrollment.

"On the day designated in the President's proclamation you, together with the registrar of opposite politics, will sit at the voting places in your precinct, and enroll the men of the indicated class who present themselves for enrollment, and immediately thereafter you will make an active canvass in your precinct so that no person of the class indicated will be omitted from the rolls.

"Enclosed in this letter is a copy to the sheriff of your county, from which you can see that you have ample power to call on the sheriff, who by himself or his deputies will assist you in any way in your work.

"Bear in mind that you have no option to leave any one's name off the register, and to do so is a violation of the law. The enrollment does not have to go to war, but upon the contrary, it is the list from which a board of representative men in your own county will make a selection of men whose military services the nation most needs, and whose civil and domestic services can best be spared.

"You can appreciate the importance of doing your full duty promptly, and the efficiency of the whole system depends primarily upon the honesty, accuracy and promptness of your work.

"It is believed it is only necessary to mention this to secure your complete and hearty co-operation, and your service will be recognized and the government prompt to express its appreciation therefor—and to pay for such service where pay is demanded."
