COAL OPERATORS

(Continued From Page 4)

The president of the Consolidation Coal company, especially for this magazine, it is a highly patriotic appeal, especially intended to awaken interest in war work where it still lies dormant. It urges the coal miners to extra effort and points out that it is the "imperative duty" of all connected with the coal mining industry to do "their utmost" to increase the mining and loading of coal.

Mr. Wheelwright points out that the Consolidation Coal company placed itself squarely behind the United States government "in the very beginning of this war" and that "practically all of its coal is shipped to those whom the United States Fuel Administration at Washington directs us to ship it."

Mr. Wheelwright emphasizes the position of the coal company which is working for the United States government at present and not for the Consolidation Coal company. He appeals to the mine workers in these terms:

"It is essential that more coal shall be mined if the ships that are being built are to carry our soldiers; to carry the food, to carry the clothing, to carry the guns and shells for our soldiers, and the thousand essential things necessary to equip an army; to carry the doctors, the ambulances, the nurses and hospital equipment; more coal will have to be produced to enable the steel mills to manufacture more steel without which ships cannot be built, guns cannot be made nor shells turned out. More coal will have to be produced to supply the railroads, to supply the munition factories and to supply factories which are manufacturing the essentials necessary to equip this great American army."

The work of the Consolidation company and its employees in the Liberty Loan campaign is reviewed, the Thrift Stamp and War Savings Fund is explained and saving recommended in convincing terms. The outbreak of infantile paralysis at Monongah is described and a detailed account given of the excellent way it was handled for which the coal company deserves great credit (although that point is passed by in the magazine, war gardens are discussed and encouraged and the surprising data given that the Consolidation employees had 2,500 war gardens the past summer, playgrounds are given attention, knitting is treated of, economy is encouraged, safety first is emphasized, and throughout the magazine is instructing, uplifting and at the same time interesting.

The Thrift stamps and war savings certificates will be placed on sale at every Consolidation store, it has been announced since the magazine went to press, and the company will make it

easy to secure them and easy to pay for them, feeling that it is not only doing patriotic work but encouraging economy among the employees.

The magazine innovation on the part of the Consolidation is one of the most important steps ever taken along the line of "community interests" and will doubtless be appreciated by superintendent as well as mine driver, by the miner's daughter as well as the official's wife. There is something in the magazine to interest every one of these people and becoming familiar with what is being done in other lines of work connected with the Consolidation is certain to be of "common good" which is the intention of the magazine as emphasized by its name, its policy and the character of the material found in the first issue.

Catarrhal Cough. Mr. W. S. Brown, R. F. D. No. 4, Box 82, Rogersville, Tennessee, writes: "I feel it my duty to recommend Peruna to all sufferers of catarrh or cough. In the year 1909, I took a severe case of the la grippe. I then took a bad cough. I had taken all kinds of cough remedies but got no relief. I then decided to try Peruna. I used five bottles. After taking five bottles my cough stopped and my catarrh was cured. My average weight was 115 and now I weigh 148 1/2. Any one suffering with catarrh in any form I will advise them to take Peruna." Those who object to liquid medicines can procure Peruna Tablets.
