SOFT COAL CONTROL TO BE RELINQUISHED

WASHINGTON, Nov. 29.—Price restrictions on bituminous coal may be removed by the fuel administration within two weeks, fuel Administrator Garfield said today he hoped to cancel the price regulations not later than the middle of December. Present prices as fixed by the fuel administration range from \$3.25 to \$4.95 a ton at the mines. Dr. Garfield said it may be possible to abandon the zone system of distribution of bituminous coal by the middle of December, but that action to this end will be taken only after consultation with the railroad administration. The fuel administrator said he could not "take his hands off" the anthracite situation until winter is over. This was taken to mean that the government will continue its control over anthracite coal until the end of the coal year, April 1, and that the fuel administration will continue to function until that time.

EXPECT MANY WILL (Continued from Page One.) the allies, busy in reconstruction work, need to be fed; but if necessary Germany as well. This interest falling—there remains the increased benefit to home, schools and churches through better farming. Farm women get together and form farm clubs and through such effort, farms are conducted on a more prosperous basis. This basis keeps the children at home satisfied instead of sending them to towns and factories. Keeping the best children at home in the country makes for better school and better churches there. On the back of the cards which are to be distributed this coming week are certain divisions of farming. The division which interests the individual most can be checked off and work in that line can be specialized in. If for any unlooked for reason, some one interested in farming is not called upon this coming week and the work explained fully, will that person notify Farm Agent W. E. McComas so that he may not be overlooked entirely. This work is very important. LEWIS MADE GOOD. WESTON, W.
