patterns. Conspicuous among them are the small polka grounds on plain colors, small stripes, figures, etc., on both dark and light grounds.

Image: The image is a specific of the commission of nd not until Sunday were the heavy earls lifted and gladdened by the return

It was a few minutes past I o'clock Sun-day affermoon that the first division of the regiment arrived in Burnington. When the engine whistled into the Fort the track was lined with friends. The train moved slowly and an air of sadness seemed to have locked the hearts of the crowd as no outburst of enthusiasm greeted the boys. Looks of expectancy were on the faces of the the Theory were on the aces of the throng. The ambulance back d up to the train, stretchers were placed a position and the unloading of 214 sick men was begun. It was a sight that brought tears to the eyes of strong mer and women wept as if their hearts would assortment of Zephyr Ginghams, Cotton Homespuns. Printed Dimities, Flannelettes, Silkolines, etc., all at 614 cents. In this lot are 20 pieces Silkolines, extra wide, fine quality, made to sell at 12½ cents, would make beautiful comfortables or bed puffs.

The distance of manhood were but shadows. A large corps of young men shadows. A large corps of young men form Burlington were on hand and with willing hands they assisted the aurses in willing hands they assisted the nurses in taking the sick from the train. Typhoid fever had fastened itself upon some of the men and reduced them almost to skele-tons. Mothers and fathers were not recognized by some while others were so weak they could hardly speak. Others were choked with emotion wallethusewho able to walk unassisted were joined other by friends or relatives. It tool about an hour to unload the train but out of the 214 men only 21 were obliged to go to the hospital. The larger number were quartered in the barracks.

Among those in the hospital are the following

iospital at East Lake, Tenn.:

CAPT. H. E. CHAMBERIAN of Bradbeginning to furnish every camp with all beginning to furnish every camp with all appliances asked for but of course the appliances asked for but of course the LIEUT, CHARLES WILLIAMS, Newport, majarial fever.

The events of the day were not all sad. The first battalion followed the hospital train, arriving at the Fort at 5:30 o'clock. At Burlington a large crowd of people assembled at the depot and cheer after ener went up. Near Spaulding & Kimbail's warehouse a large cannon was used in firing a salute. When the train came to a standstill at the Fort the sight was one worth witnessing. The boys in blue leaned out of the windows and shook hands with friends as they passed along. Many of the volunteers did not wait to get out of the doors, but crawled out of the windows. It was a cordial welcome home and the boys were glad to return. They visited the canteen and sat around in ground and the boys were glad to return. They restricted the canteen and sat around in ground states and an abundance of the supplies. They had lighters were lost in severe storms on the way. As soon as were notitied of the fact, two tows of lighters work of the say many disembards, getting off a portion of its supplies and medical stores, and immediately marched to the front to fight the Spainards. The great difficulty of anding spraing up every morning at 10 and made a high surf, rendering almost impossible twice of small boats with one lighter, which was all they had left for this purpose. Of the packers who were employed to return.

movement bordering on audacity, but it succeeded and the persistence of the attacks. At Washington Senator Proctor met the train and greeted many of the boys. The train and greeted many of the boys. The people of the capital also sent sandwiches and gave the troops an enthusiastic greeting. At Jersey City the section containing the baggage was delayed by an accident to the running gear of one of the cars and the third section passed the second section, leaving Jersey City at 5:30 Sunday morning via the West Shore road to Albany and the Delaware and Hudson to Rutland, which city was reached shortly after 2 o'clock Sunday afternoon. The people of Rutland supplied Co. A with lunches and the people of Brandon did the same for Co. C. The stations at Rutland and Brandon were filled with people who cheered the solders and at other stations on, ipe Rutland road there were large gatherings.

THE HOME-COMING.

The third section of 18 cars, confaining the baggage, tents, stores, 27 mules, 18 horses, 12 army wagons and 40 men in charge of Quartermaster Creed, arrived at Fort Ethan Allen at 10:15. The fourth section with the second battalion, Companies of the capital also sent sandwiches and with the second battalion, Companies of the capital also sent sandwiches and with the second battalion, Companies containing troops on the capital and the people who cheered the solders and at the capital section of 18 cars, confaining the baggage, tents, stores, 27 mules, 18 the result to the ingentity of the secretary of war, but the result of the combined counsel of the secretary of war, but the result of the combined counsel of the secretary of war, but the result of the combined counsel of the secretary of war, but the result of the combined counsel of the secretary of war, but the result of the combined counsel of the secretary of war, but the result of the combined counsel of the secretary of war, but the result of the combined counsel of the secretary of war, but the result of the combined counsel of the secretary of war, but th

Montpeller and I of Brattleboro, arrived at 11, and the fifth and last section, with Companies B of St. Albans, D of St. Johnsbury, G of Bradford and L of Newport, comprising the third battalion, arrived about midnight.

As the trains entered this city last evening a number of parriotic citizens sent up rockets and made liberal use of torpedoes along the track.

Cal officers sent with transports were taken ill on the way home.

To give you a little idea of the work that has been done, I append the following: partment has been to muster and order to their station, to be precise, 216,400 volunteers, and 24,500 for the regular army. This with a reduced force, as many staff officers from all of the departments had

tween artificial embankments, for in the four miles there is a drop of thirty-fix feet. Tarough Joliet and beyond the Deskin cured by Crystalina. No benefit no plaines is being considerably e and its banks diked to prevent overflows in the season when the riv itself is high, and new movable bridges at many places have been necessary. This is, in brief, the problem of construction which has been met, and some figure may help to show the magnitude of the undertaking, Of glacial drift 27,900,000 cubic yards have been excavated, and of solid rock 13,000,000 cubic yards. This is half as much excavation as in the Suez Canal, which cost \$100,000,000, and but slightly less

excavation than in the celebrated Man-chester Canal, which was six years in building and cost \$77,00,000. Two korts of opposition arose to this great project from its earliest suggestion; the first on the theory that it would dis-turb the level of the lakes, whose harbors turb the level of the lakes, whose harbers are now only too shallow, and the second that this stream of pollution would be a great detriment to the towns along the river below. Both of these objections have been in a measure met, so there is now little real hostility evinced toward the desirance and little real hostility evinced toward. the drainage canal in any quarter. Bu in 1897 the Vessel Owners' association ap pealed to the government for a scientifi-investigation to determine the effect or the lake levels that would result from tak

New stock just unpacked, ing 300,600 cubic feet per minute out of Lake Michigan and carrying it to the Missistepi. The report they made was rather inconclusive. At the drainage commis inconclusive. At the drainage commis-sioner's office, however, it is asserted, and the testimony of great engineers cited in proof, that the level of Lake Michigan wil not be reduced more than three to five ontemplated.

a complete line of the smaller sizes.

L. C. GRANT,

Contemplated.

Fortunately, nature has here too come to the rescue, for the lake levels, at one time a subject of serious apprehension, have now for two years been rising. In 1895 they were the lowest since 1847, and fear was general for the harbors, which are nearly all artificial, and none too good under most favorable conditions. At Chicago, Milwaukee, Cleveland and many minor ports they were made by the dredsing out of small rivers and creeks. They were adapted in depth to the vessels in which the commerce of the lakes was originally transported, but the constant tendency transported, but the constant tendency toward increasing the size and draugh

f the craft has called for large harbor spenditures from year to year. Just at the time when the tendency toward large-sized lake craft begin Chicago commited the folly of practising blockeding ner-liver near its mouth against deep draught essets by building huge walls across it a accommodate by tunnels the street cats hat run to the North Side and to the Vest Side. These tunnels have became a cry writing barrier to the new terms. ty serious barrier to the navigation or strain. Large vessels cannot take a all lead at the elevators and get out to be lake without scraping against the nnel roofs, and unless some remedy can found Chicago must come to be a first es port. Several plans have been surdesired, like the lowering of the tunnels, he removal of lake business to a new arbor at South Chicago, and what smally-may he the solution of the difficulty, the conversion of a part of this draining anal into a broad commercial channel, with whose free like the commercial channel, with wharf facilities on both sides. This would be one of the most expensive undertakings ever dreamed of, and no city is part way to a solution of the harbor problem, coubic with which it is intimately connected. The argoins believe this is a beginning, a hat the commercial highway will follo either at the expense of the Federal go erament or the State of Himois, or p-haps Chicago in conjunction with one

a stoody current of water in strainia which had been periodically dry. The Desphines has been almost dry during besis of water supply, was another piece of

eration to the water supply of Chicago cannot be overestimated. That now comes from four cribs, as they are called, located about four miles out into the lake, but even at that distance, in times when the Chicago River overflows, the pollution is quite serious. The canal is a gravity stream, and so the expense of maintenance when contains a contains and so the expense of maintenance when contains a contains Con. Merritt:
