Saturday, March 18, 1803. ONE ON HENRY GEORGE.

Roswell G. Horr is well known as a aster of the argument adhominem He can turn his opponent's flank if such a thing is possible. This was well illus metrated in a debate Mr. Horr has had with Henry George at Syracuse. The eminent single taxer made his usual argument against the "unearned increment." that is, the value which is added to land by the community at large through no effort of the owner. Mr. Horr replied: "I have a book entitled Progress and Poverty." Did you write that book?" The author admitted that he did, and Horr continued: "I find something in that book which surprises me. On its title page is an inscription showing that it is copyrighted by Henry George. Did you copyright that book; Again its author answered, yes. Mr. Horr then brought out his point:

Well, it is a well written book, al though I do not endorse its views, and it is fair that your labor in writing it should be paid. I should say \$3,000 yes \$5,000 was due you for your work as its author. But your publishers say that Now, you did no work in printing, publighing, set ting over the land or selling it. You just sat still and raked in from your copyright some \$30,000 or \$40,000 of "uncarned increment," which by that copyright you compelled your dealers to pay you, and now you say that nobody but landowners should be taxed for such screment. I am greatly surprised!

Among the first nominations sent to senate for confirmation by President Cleveland was that of Capt. E. P. Ewers
of the Fifth infantry to be major.

THE correspondence between Henry George and His Holiness the Pope has occupied the major portion of the Boul-der Age for the last three or four issues and is still continued. As space writers, His Holiness and Henry appear to be unequalled, and of the two, Henry has thus far made the best record.

The Joreman having presented its rejectate or emphasize them now. It is for the taxpayers and residents to say what shall be done and if the meeting this accessing is fully attended by those costing \$1,000 to a palatial pile of brick most interested in the progress of the city, we have no doubt that a wise decis-ion will be reached. Of course whatever the chamber may finally adopt as a feasable idea, will be only advisory to the

A Typical Scene In One of the Well Kn "Bankers and Brokers" Offices With Which the Money Center of the Metropolls is Crowded-Carrying Payor.

In the interval between the morning and afternoon sessions of the Stock Ex-change the speculators and operators sat in the broker's office studying the quesstions as they had been marked up on the blackboard by a junior clerk. They spoke but little. Some were making mental calculations, some were building air castles, a few were hugging themselves with delight because fortune was in their favor and others leaker seeking. castles, a few were hugging themselves with delight because fortune was in their favor, and others looked grim and endeavored to conceal their chagrin and regrets at losses by the operations of the morning. Not a few were wrestling with Bassanio's problem, considering whether another arrow would discover that already lost. In gambling the hope that another fling at fortune will bring her down never fades. But those who gamble daily recognize that such reasoning is not sound, and where, as in Wall street, all the investments are based upon theorizing as to cause and effect, something more than unreasoning faith in.

In her salutatory Mrs. Edgar bespeaks the usual courtesic for a Mr. Crandall who will conduct the papers during her absence. Judging from brother Bonton's experience with the Fecho we should say it would be safer for all concerned if Mrs. Edgar should remain at her post and allow Mr. 'Crandall who will conduct the papers are to be indulged in to any extent.

The topic suggested by the Jorana's article on the city building question, was generally discussed yesterday and to such good purpose that if we are not mistaken there will be an unusually well attended meeting at the Chamber of Commerce this morning. sides as though they would split, I feel a throb of sympathy for him, for I know his case is very desperate. The man who laughs moderately, looks knowing and has a fairly contented expression has a fair margin up and feels safe. But the man who looks at Jones with an air of indifference or has the courage to frown upon him is the object of my deepest envy. That man reposes on a financial rock so high and solid that an earthquake would recoil from it. And, depend upon it, every other man in this place envise him too. If they dared, they would stroke his coat and rub shoulders with him in the hope of gaining luck thereby.

"I will never forget the sensation caused once by a man getting up here and colling Jones loudly by his first name. That 'William' still rings in mears. There was dead silence for fully a minute after it had been uttered. Every one of us expected to see the rash man struck by a thunderbolt or consumed by the withering secration of Jones' lightning glance. I felt my blood congeel with horror, and several of the others told meafterward that they looked for something awful. But Jones looked as sweet as an angel, and we all could heve worshiped the daring one on the spot. Playgoers are familiar with the electric bells which ring in all parts of the house just before the curtain goes up. This useful device has been adopted at Spurgeon's Tab-macle. Strangers are kept waiting in the aisles until five minutes before the service. By this time the regular sent holders are supposed to have taken their places, and the electric signal is made, followed immediately by a general rush for the best seats that remain vacant.—Yankee Blade.

A Costly Diole.

The most expensive illustrated book yet made is said to be a Bible now owned by Theodore Irwin of Oswego. It is valued at \$10.000, for Mr. Irwin pead that sone for the work. The original was in a ven volumes, 16mo, and by the addition of drawings and engravings of was enlarged to 60 volumes, each 16 by 24 inches, which occupy 17 feet of space on the shortes. This remeriable book contains 3,000 pen and pencil drawings, etchings, engravings, lithographs oil etchings engravings, lithographs of and water color pantings and mezzo of water coor paintings and mezzo-tints. Among the tilustrations are parts of the "Great blible of Cranmer," paint-ed in 1533, parts of the "Bishop's Bible," printed in 1568; parts of the "Nurem-burg Bible," the first illustrated Bible published, printed in 1736, and of "Lu ther's Version" and the "Breeches Bible." The extender has brought together not only all that could be found of the best only all that could be found of the less and rarest efforts at idustrating the text of the Bible, but also the art of modern painters and engravings, making it the most complete and valuable copy of the Bible in existence.—Washington Star

Fashions In Glas

Very few, years ago nothing would please but glass blown to the atmost thinness, either plan or engraved with ornamental designs but now we have returned to the fleavy faceted decanters returned to the heavy finested decanters and gobbets, which is the stricter taste? Undoubtedly that when we have just discarded for the special quality of glass, which can be rivaled in no other mate. which can be rivaled in no other mate-rial, is its transparency and capacity for being blown into exceeding lightness. When cut into facets, the former quality is impaired, the inter is not displayed, and the object depends for beauty on its brilliancy, in which it competes at a un-advantage with rock crystal. The virtue of an art consists not less in bringing out the inchest quality, of meaning the the inghest quality of material than revealing the mind of the artist. - Black wood's Magazine.
