Saturday, July 22, 1893.

The Edison family is remarkable in more ways than one. The great inventor's father lives at Port Huron, Mich., and is 91 years old.

An ambitious female named Keegan has a seduction and breach of promise suit against Russell Sage, and specifies the year 1868 as the particular time.

The celebrated Davis will case is set for trial on Monday next in Butte, and the local attorneys do not think that there will be any effort made to again postpone it.

At Miles City the other day Chris Ramme sued Charley Daly for the possession of a dog. The judge gave judgment for defendant in the sum of \$84.55, including costs.

Certainly they are. Probably about as much as a corner lot in Livingston. Everything is valuable in a lively town.

There was such a howl and clamor all over the country for the opening of the World's Fair on Sunday that everybody supposed the grounds would be literally packed on that day.

The work of coast defense has begun. A 15-inch 51-ton gun is in position on Sandy Hook on a disappearing carriage and protected by a wall of concrete 20 feet thick.

The birds, after an absence of some years—how many we cannot really commit ourselves to say—have returned to Kensington gardens and established a flourishing little colony of some 11 nests in the trees on the west side of the broad walk, between the old banqueting hall and the Baywater road.

They may always be seen in Palace yard, Westminster, and for the fourth year in succession a pair are nesting in the elm tree over the fountain at the end of Great George street.

Those people who are always complaining of the inaccuracy of newspaper writers ought to be impressed with this story of M. de Blowitz, the famous correspondent of the London Times.

AN AIR CYCLE NEXT.

THAT IS WHAT'S WANTED BEFORE THE FLYING MACHINE.

The Bicycle No Longer Satisfies the Longing of Mankind For Free Movement. We Want to Travel as the Birds Do, But Must Learn Essential Lessons First.

The Frenchman who covered the dead walls of Paris with calls for subscriptions to a Society of Aviation, to start with a capital of 500,000 francs, may have been lacking in the highest qualities of public spirit.

Though he should languish for the rest of his days in prison, M. Delprat will have the glory of the discovery that the bicycle no longer satisfies the longing of mankind toward a freer movement over the face of land and water.

The flying machine still holding to earth by one wheel has already appeared sporadically in England, according to Engineering. Mr. Phillips published the results of his trial of a machine resting on a light car and claims that he flew, but the front wheel of the car never left the ground.

The principle of the balloon, useful as it is in overcoming gravity, has carried generations of inventors into a fool's paradise.

Birds are lighter than beasts, but they are not soap bubbles. And to the bird we have to return indirectly or directly for lessons in the navigation of the air.

More important than such machines as Lieutenants Renard and Krebs successfully steered from Meudon to the walls of Paris and back again are the small flying machines developed from the bicycle, which seem now about to make their appearance.

The inventors who are constructing on paper or in actuality great flying machines are like men of an inland race who have for the first time seen a broad piece of water.

What is wanted is a popular air cycle, an "air safety," to lead the way to larger air wagons with sustained flight. Who will invent one?—New York Times.

Velocity of the Earth. The highest velocity attained by a cannon ball has been estimated at 1,632 feet per second, which is equal to a mile in 3.2 seconds.

All life looks black to a miserable man with a stomach in which his food

lies like lead. Woe to his companions if they expect good fellowship from him! Woe to his wife unless she has the womanly intuition that will make her humor him as though he were a cross baby!

Some things of course in the French display—especially of pottery and bronzes—are purely decorative, and some of the visitors of course are destitute of taste.

Making the Most of His Chances. The family tutor was invited to a grand dinner party by his employers and surveyed with intense satisfaction the half dozen wineglasses arranged in front of his plate.

DR. SANDEN'S ELECTRIC BELT. With Electro-Magnetic SUSPENSORY. Latest Patent's Best Improvement! Will cure without medicine all weakness resulting from over-exhaustion of brain, nervous force, exhaustion of vitality, etc.
