Publishers.

SUBSCRIPTION RATES:
One Year - \$2.00
Six months - 1.50
Three months - 1.00
Single copies, 5c
Canadian Subscriptions, 5c per year extra

Subscription outside of Flathead county payable strictly in advance.

In Flathead county subscription is payable at any time within the year. As most people in the county who take the paper do not like to have their subscription interrupted, a year's time is given in which to pay for it, and the paper does not stop when subscription expires unless so ordered.

If you are receiving a copy of the paper regularly, you will be expected to pay for it. Don't forget this. If subscription is not paid at the expiration of a year's time, you will receive notice. If you wish your paper stopped when your subscription expires, kindly notify this office.
There are no deadheads on The Pilot's list, and we want none, so if you do not expect to pay for the paper please take the trouble to have it stopped before you get in debt to us and we become the victim of misplaced confidence.

ADVERTISING RATES:
Display—2c per single column inch per week. Standing ads, 7c per single column inch per month.
Reading Notices—1c per line per week. Want Ads—1c per word.

PUBLISHED EVERY FRIDAY.

Entered as second class matter February 18, 1914, at the postoffice at Whitefish, Mont., under the act of Congress of March 3, 1879.

For County Assessor.

I hereby announce myself as a candidate for the office of county assessor, subject to the action of the republican county convention.

J. H. McAFEE

For County Assessor.

The Pilot is authorized to announce the candidacy of E. L. Geddes for Whitefish for the office of county assessor, subject to the will of the republican county convention.

Have you got a claim?

Mining talk fills the air.

Get a grubstake and hike.

Just wait till we get to shipping ore.

Yes, The Pilot prints mining stock.

Electric light franchise election Monday.

Every good citizen should attend his party primary.

This is the last day of registration for the franchise election.

The democratic scrap in Flathead county is getting real warm.

Everybody seems to be in favor of the electric light franchise.

Nearly every man in Whitefish has a piece of ore in his pocket.

There is still a good opening in Whitefish for a steam laundry.

There is plenty of timber handy in this locality for mining operations.

Where there are good mineral indications development is bound to come.

Judging from the talk that is heard, an electric lighting plant would be well patronized.

Reports of new locations of claims in the gold belt are coming in quite regularly, and it is evident that the prospectors are busy.

The mining excitement, the hunting season, the electric lights, the increase in railroad business and the political campaign are all coming at once.

The Lupfer prospect, for a long time the only representative of the mining industry in this locality, will now have to divide the honors with many others.

Whitefish has tributary undeveloped resources of such a varied nature as to assure the building of a city at this place beyond the expectations of even our own residents.

It is not probable that the lumbering industry in Whitefish will ever have so dull a year as this, but even with little doing in this line, the town is prosperous and has grown steadily.

Why not develop the North Fork coal fields, and use the product at a smelter which could be located at Whitefish to treat the ores which will soon be pouring down from the hills north of town?

The men of Whitefish might take a lesson from the Woman's Civic club and do a little boosting for the town through a proper organization. The town should have a chamber of commerce, or some such organization.

"The foxes have holes, and the birds of the air have nests, but the Son of Man hath not where to lay his head." The words of Christ are as true to-day in the case of the sons of men

ANOTHER INDUSTRY.

THAT a mineral belt of quite large extent crosses the country north of Whitefish there is no longer any doubt, and now that discoveries of rich ore have been made it will soon be thoroughly prospected.

As to what the future may hold forth in the way of paying mines remains to be seen, for no man can see into the ground, but the indications are all favorable, and there is every reason to believe that some good mines will be developed.

At any rate the discoveries are worthy of the fullest development, for with such surface showings as prevail in the mineral belt it is highly probable that plenty of ore will be found which will be rich enough to amply repay those who may invest their money in getting it out.

With these latest discoveries of mineral a new industry will be added to the resources of Whitefish that, in all probability, will be a very material factor in the town's future. At any rate there will be much prospecting and development work done, with the chances good for finding something which will be of lasting benefit.

LOOK TWICE BEFORE YOU SHOOT.

AS the hunting season draws near the dangers of hunting in a country such as surrounds this locality are again brought to mind. The two greatest dangers in this connection are, first, that of mistaking a man for a deer and shooting him, and, second, of getting lost in the woods.

The first danger mentioned is the greater. Nearly every year from one to half a dozen men have been shot in this county by hunters who would not take the time to ascertain positively what they were shooting at. Some particularly sad accidents have happened.

A slight movement in the brush and the hunter raises his gun and fires. A moment later he discovers that he has taken the life of a fellow-being, perhaps a near friend. These accidents occur every year in startling numbers, and it would seem that with such terrible examples of carelessness more care would be taken, but such does not seem to be the case, and the coming of the hunting season means the time when many must die.

A CLUB THAT HAS DONE SOMETHING.

THE Woman's Civic club of Whitefish is furnishing a good illustration of what a few citizens may do for the advancement of a town by getting together and working for some definite purpose.

The club has only been organized a few months, but in that brief space of time has secured park grounds for the town, bought and planted shade trees upon the same, and has purchased a public ambulance and casket wagon, the need of which has so often been keenly felt here.

It is through just such efforts that a town advances, outstrips other places where public spirit is lacking and becomes known as a live and thriving community.

The Woman's Civic club has done well, and it is to be hoped that the club's usefulness as an organization will be continued and strengthened by receiving the commendation and co-operation of all the citizens of the town.

as they were when uttered of the Son of Man. Less than two per cent of the population of the United States own their own homes. It is a sad commentary upon our social system.

The Kalispell Bee recently published a petty arraignment of Hon. Thos. D. Long, purporting to be a communication to that newspaper, the foundation for which is Mr. Long's candidacy for the democratic congressional nomination. In the next issue of the Bee, Fred Whiteside, the reputed owner of the paper, announced his candidacy for the same office. Save?

Every effort should be made to have the mining prospects in this vicinity developed as rapidly as possible, and to this end, where claim-owners have not the means to develop their holdings, it would be advisable to incorporate companies and issue stock to raise the necessary funds. Many residents of Whitefish would undoubtedly be glad of a chance to take stock in such concerns, if properly managed, not only as an investment, but in order to hasten the development of the mineral resources of this section, which may mean a great deal to the town.

A WHITEFISH CANDIDATE.

The Pilot this week announces the candidacy of E. L. Geddes for the office of county assessor. Mr. Geddes having very recently made up his mind, upon the solicitation of friends, to allow his name to go before the republican county convention.

If Mr. Geddes should receive the nomination, he would undoubtedly make a lively campaign for the office, and would be a hard man for the

MISLEADING NAMES.

Terms in Science That Deceit the Products to Which They Apply.

There are terms in certain departments of science that positively misname the products to which they are applied.

The word "oil" in its more comprehensive and indiscriminate uses is made to include hydrocarbons, like petroleum, and also many other substances that have an oily appearance, like "oil of vitriol," which is not oil at all, but sulphuric acid.

Strictly speaking, the mineral oils, including all petroleum products, are not oil, although we speak of "coal oil" and "kerosene oil."

The best classifications of oils do not include mineral hydrocarbons, like naphtha, paraffin and petroleum, but treat only the two well defined groups—fixed oils and fats and the essential or volatile oils.

"Coppers" is not copper, but sulphate of iron. "Salt of lemon" has nothing to do with the fruit of the lemon tree, but is potassium binoxalate or potash treated with oxalic acid.

"Carbolic acid" is not an acid, but a phenol. In structure it is allied to the alcohols and has only slight acid properties. "Soda water" has no trace of soda. "Sulphuric acid" contains no sulphur. "Sugar of lead" is innocent of sugar.

"Cream of tartar" has nothing to do with cream nor "milk of lime" with milk. "German silver" is a stranger to silver, and "black lead" is not lead at all, but graphite. "Mosaic gold" is a sulphide of tin.

These misleading names have come down from the vocabulary of an early and laxet chemistry. As popular science extends the old terms are yielding to the more scientific nomenclature.

JOKED HIMSELF IN.

How "Private" John Allen Got Himself Elected to Congress.

Here is Champ Clark's defense of humor, if it needs one:

"The dry-as-dusts solemnly asseverate that humor never did any good. Now, let's see. How did 'Private' John Allen of Mississippi get to congress? Joked himself in. One bit of humor sent him to Washington, a national lawmaker. Opposing him for the congressional nomination was the Confederate General Tucker. They met on the stump. General Tucker closed one of his speeches as follows:

"Seventeen years ago tonight, my fellow citizens, after a hard fought battle on yonder hill, I bivouacked under yonder clump of trees. Those of you who remember as I do the times that tried men's souls will not, I hope, forget their humble servant when the primaries shall be held."

"That was a strong appeal in those days, but John raised the general at his own game. 'My fellow citizens,' he said, 'what General Tucker says to you about bivouacking under yonder clump of trees is true. It is also true, my fellow citizens, that I was a vedette picket and stood guard over him while he slept. Now, then, fellow citizens, all you who were generals and had privates to stand over you while you slept vote for General Tucker, and all of you who were privates and stood guard over the generals while they slept vote for Private John Allen.' The people caught on, took John at his word and sent him to congress, where he stayed until the world was filled with his renown."

Aid For the Explorer.

"Peary," said a geographer of Chicago, "never started on one of his exploring expeditions without receiving by mail and express all sorts of packages from cranks—cowhide underwear, tea tablets, medicated boots and what not."

"Peary once told me that George Ade a few days before the start of one trip wired him to expect an important package by express.

"The package came. It was labeled: 'To be opened at the farthest point north.'

"Peary opened it at once, however. It was a small keg, inscribed: 'Axle grease for the pole.'"

Shouldn't Overfeed Hubby.

Hint for young wives who desire to have their husbands retain their boyish, slender figures: In an address at Vienna on the subject of food Professor Karl Van Noorden, one of the greatest medical experts in Europe, uttered an emphatic protest against wives who overfeed their husbands. He declared that the reason so many begin to get fat immediately after they have married is that their wives give them their favorite dishes on every possible occasion.

An Inducement.

"Is there anything I can do," cried an exasperated west side mother, "to induce you to go to bed?"

"Yes," responded the small boy promptly.

"Well, for goodness' sake, what is it?"

"Lemme stay up an hour longer."—Cleveland Leader.

His Mark.

Hewitt—Gruet can't write his own name. Jewett—I know it. Whenever he sees a man showing another man how to make a cross on an Australian ballot he thinks he is forging his signature.—New York Press.

The Pampered Pets.

"Hortense, call up Mr. De Milliyons and ask for Fido."

"Yes, me lady."

"Carlo wishes to bark to him over the telephone."—Washington Herald.

If the brain does not sow corn, it plants thistles.—German Proverb.
