We heard that 40 men signed the petition for a company of state militia in Sidney week before last and that every effort is being made to secure the other 30 required by the law. We wonder if those who signed actually know what they are doing.

John Johns, the oil and gas expert, returned early in the week from a visit to his home in Sheridan, Wyo., where he had been called by the sudden illness of his wife. Notwithstanding the secession of those portions of old Dawson county that now comprise the new counties of Richland, Wibaux and Prairie, this year's court business will, in many ways, exceed that of last year. The year of 1915 will show a few more cases in both the probate and criminal departments while there will be about half a dozen civil cases less than in 1914.

The most delicate part of your entire rear axle—your differential—should be taken down and thoroughly examined, bearings taken up, worn parts replaced, etc., if your automobile is to be of dependable, satisfactory use next season.

The overhauling of the rear axle and the differential gears, pinion gear, etc., requires mechanical skill of the best character, if you are to have a silent, reliable, tight, "rear end."

We'll do the work right, for our mechanics are REAL MECHANICS and every detail of the work is rigidly supervised.
