

GREAT FALLS TRIBUNE.

SEMI-WEEKLY EDITION.

VOLUME 8, NUMBER 93

GREAT FALLS, MONTANA, SATURDAY, APRIL 20, 1889

PRICE, FIVE CENTS

OKLAHOMA CRAZE.

CALDWELL, KANSAS, FILLED WITH BOOMERS.

The excitement increasing—A Great Rush Will be Made on Monday to the Frontiers East.

Kansas City, April 18.—In this city everything begins and ends with Oklahoma. It is the one topic of every tongue and one of every enterprise. The local jobbing trade is holding off its regular custom to supply one source of demand. Hardly sufficient for the current needs of the city in hardware, implements and general merchandise stores. In the Santa Fe freight yards, crowded on the tracks and under moving orders, are about 30 large trains, freighted with the anticipated necessities of the coming community. There are houses in sections, ready to be settled and entered for habitation within sixty minutes after their arrival.

Washington, April 17.—The postoffice department is making every necessary arrangement to give the new settlers in the territory of Oklahoma postal facilities. Assistant Postmaster General Clarkson says that within three months from the present time there will be at least 100,000 fourth class postoffices in Oklahoma. In his opinion there will be more than 100,000 people in Oklahoma within six months and adds that in his opinion it will be ready for admission into the union within two years as a state.

OKLAHOMA WAGONS. Oklahoma excitement is at its height here today. It is almost impossible to get along the streets as the crowd is so dense. Five hundred wagons, is the estimated number which arrived today while reports of those to come tomorrow will double the number.

No Change in the Strike. Missoula, April 17.—Although the street car company succeeded in running some cars over most of the lines in the city today, the strike is not by any means over. There were several skirmishes with the police. The mob on Washington avenue was the hardest to handle. It would be wiser in one place only to assemble in another. The police fear serious trouble tonight and to guard against it the chief of police ordered that no cars be run after 6 o'clock.

Copper Declining. New York, April 17.—Bar silver 92 1/2; Copper—Nominal. Lake and April 18 1/2. Lead—Eastern. Domestic 63.65.

Cattle and Sheep. Chicago, April 17.—Cattle—Receipts 18,000. Slow and low. Choice to extra heaves \$4.40 to \$4.50; steers \$3.35 to \$3.40; stockers and feeders \$2.40 to \$2.70; Texas steers \$2.50 to \$3.05. Sheep—Receipts 6,000, slow, 5c to 10c. Lower. Navaho \$4.00 to \$5.50; western corn fed \$4.00 to \$5.00; Texas \$4.70 to \$5.00.

New Executive Established. Helena, April 18.—A postoffice was established today at Ashlar, Missoula county, Montana, with N. E. Daggett as postmaster.

California Wine in the East. New York, April 18.—While in New York, lawyer Wm. McDonald of San Francisco, who is in this city, on his way home, visited some of the large wholesale wine dealers, who gave him some interesting facts about California wine. "One of these firms alone," he says "disposed of over 3,000,000 gallons of California wine last season; that looks like California wine, doesn't it?"

Red Cloud with the Great Father. Washington, April 17.—Red Cloud, a big Sioux chief called on the President this afternoon. Red Cloud was dressed in a military uniform. It is his custom to make a pilgrimage to Washington on the occasion of every new president, and this is the first time he has paid his respects to the great father. Red Cloud is in a hurry to secure the payment of \$28,000 appropriated by congress to pay for a lot of ponies which the United States troops took away from his band in 1875. It was feared they were going on the war path. He wants to see if this money will be paid to his people at once.

Success Achieved. Troy, N. Y., April 18.—The Troy Steel and Iron company has completed successfully the experiment of making soft steel by a process invented by G. W. Bland, chief chemist for Washburn & Moen, of Worcester, Mass. This quality of steel heretofore has been imported from Germany.

The Bannock Pow Wow. Bismark, April 18.—The Bannock conference will open on the first of next month. The German delegates are Count Hervey, Bismark and Dr. Krael of the foreign legation. Count Herbert Bismark will preside. Sir Edward B. Malet, British ambassador at Berlin, will represent England.

Wool Interests. Washington, April 18.—Assistant Secretary Theodore has given a hearing to Mr. Faxon of Philadelphia and R. D. Jackson of New York in favor of a modification of the present classification of wool waste, so as to permit its entry at 10 cents a pound as waste. It is now classified as secured wool, on which the duty is much higher.

BROKEN PLEDGES.

PRESENT HARRISON VIOLATES THE HOME RULE PLANK.

A Big Railroad Strike Reported—The Cause of Jackson's Suicide—Samson Again.

WASHINGTON, April 17.—William A. Calkins, was today appointed associate justice of supreme court of Washington territory. He has served several terms representative in congress from the 13th district of Indiana. He moved to Tacoma several months ago and proposes to make his home there.

WOODMEN BUSY.

THE TELEGRAPH POLES IN NEW YORK CITY MUST GO.

Double Tragedy in Buffalo—Copper Declines Slightly—Some More Presidential Appointments.

New York, April 17.—The department of public works today are proceeding to remove the overhead telegraph and electric light wires, in order to force the compliance of the law requiring them to be laid under ground at 10 o'clock. Mayor Grant's secretary received a copy of Judge Wallace's order, dissolving the injunction procured by the Western Union company against the mayor and board of electrical control. The order was sent to the board of public works before 10 o'clock. The poles at Fourteenth street and Union Square are now being cut down. Thousands of people gathered to witness the novel sight. Two gangs, one on each side of the street, attacked the poles. Another company of strong-armed woodchoppers made an attack on the poles on Sixth avenue at Twenty-third street east. The fall of every pole was hailed with cheer by the crowd. The commissioner sent for more poles, so as to be ready for any emergency.

LATER.—The work of cutting down telegraph poles was continued until night-fall and will be resumed again early tomorrow morning. The only poles left standing by the workmen were those which held the department wires. These will all be removed by the department this week. The electric light, telegraph and telephone people are helpless and say they can only grin and bear it.

Addressing the Half-Breeds.

DICK LAMM, N. W. T., April 18.—General Dumont, the late leader of the Riel rebellion, arrived here and is addressing meetings of the half-breeds, urging them to press their grievances upon the Dominion government.

Mussey of Missouri.

WASHINGTON, April 17.—It is said that a Mr. Mussey of Missouri, will soon be appointed chief of the Indian division in the office of the secretary of the interior, made vacant by the appointment of Mr. R. V. Belt to be assistant commissioner of Indian affairs.

General Sigel Resigns.

WASHINGTON, April 17.—The resignation of General Franz Sigel as pension agent at New York city has been received by Commissioner Thayer.

The Deadwood Reduction Works.

DEADWOOD, S. D., April 16.—A re-organization of the Deadwood Reduction Works company was effected by the consolidation of the mine and works, and will now be known as the Deadwood Consolidated Mining and Milling Company. The capital stock, \$8,000,000, is divided into 800,000 shares. One hundred thousand dollars worth of ore is now in the yard of the company at the mill site and a large body of ore in the mine. The superintendent of the mill is in the east overseeing the making of roasters, which will be shipped within the next thirty days and the erection of the new mill begun. This action of the company has given renewed energy to mining developments in this locality.

The Ladies Delighted.

The pleasant effect and the perfect safety with which ladies may use the liquid fruit laxative, Syrup of figs, under all conditions make it their favorite remedy. It is pleasing to the eye and to the taste, gentle, yet effective in acting on the kidneys, liver and bowels.

Do Not Suffer Any Longer.

Knowing that a cough can be checked in a day, and the first stages of consumption broken in a week, we hereby guarantee Dr. Acker's English Remedy for Consumption, and will refund the money to all who buy, take it as per directions, and do not find our statement correct. For sale by Lapeyre Bros.

Mr. C. J. Smith, traveling salesman from Belford, Clark & Co., Chicago, had the misfortune to sprain his wrist most severely. "I was suffering great pain," he says, "and my wrist was badly swollen; a few applications of Chamberlain's pain balm relieved the pain and reduced the swelling in one night, and in consequence my work and business was not interrupted, for which I am very grateful. I can recommend Chamberlain's pain balm from personal experience." Sold by Lapeyre Bros.

FIERY FURNACES.

BUY TIMES AT THE MONTANA SMOELTING COMPANY'S WORKS.

Turning Ore into Silver at a Rapid Rate—The Model Plant of the United States.

It is a busy scene at the smelter these days. The third furnace has been placed in blast and the fourth will doubtless be at work on the first of next week if not sooner. It is common now for ore to arrive in train loads of 14 cars each of which contain 30 tons. Some of these train-loads are worth \$25,000. The plant is so well devised that quick work is done in unloading the cars which come laden with silver-lead bullion for custom refiners. The ore is divided into two great classes—those which need roasting and those which do not. The ore is first taken to the sampling works in order that they may be crushed and their value determined. These works embody all the latest improvements. They contain an automatic cut-off engine of a hundred and fifty horse-power, built by Hendy & Myer of Denver, who have provided most of the iron work on the spot. This engine drives a system of one large Blake crusher, one small stone crusher, a pair of large rollers, and a small grinding machine. Besides this, it also sets in motion an automatic sampling mill, which both pulverizes and samples these ores that are subjected to the preparatory process, a rather great degree of accuracy being required for this. This automatic department consists of a stone crusher, elevator, trommel-screen, a large pair of Cornish rollers, and a small pair, and automatic sampling device, which takes out any desired proportion of the ore as it passes through the mill. It requires only two men to run it, and it is a very pretty design. It is very accurate, mechanically.

DOWNING LOWRY.

THE MINNESOTA HOUSE PASSES A REPEAL BILL.

The Strike Expeditious the People and the Legislature—A Heavy Majority for the New Bill.

St. Paul, April 17.—The house has passed, 40 to 16 a bill which deprives Lowry's company of the exclusive franchise. This is an account of the strike.

A New Judge Appointed.

WASHINGTON, April 17.—The president has made the following appointments: Wm. P. Webster of Iowa to be solicitor of the treasury, Wm. A. Whitman of New Mexico to be associate justice of the supreme court of that territory.

No Final Decision Yet.

New York, April 16.—The committee of the Northern Pacific met this afternoon to consider the Wisconsin Central case but adjourned until tomorrow without action.

READY FOR THE RAILROAD.

The Wheat Crop—Looking Well—Some Going to (Special Correspondence of the Tribune.) KANSAS, April 16.—Everyone here is on the alert for railroad news. Most of the grain is sown. The early sown wheat is looking fine. We had some rain here on the 13th. The grain shows the good effects of it already.

There has been a large acreage of wheat put in this season in and around Kibbey, but the country at present needs more rain.

Y. A. Wall & Co.'s saw mill is turning out lumber to supply all demands. This part of the country is fast filling up with a first-class lot of people, so that fancy locations are becoming scarce.

On Saturday, April 14th, we had a funeral at this place and chose a piece of ground to be laid off for a cemetery. On account of the height of it some of those at the funeral appropriately suggested the name of Calvary for the new burial ground.

Born, near this place, on the 7th of this month, to the wife of Mr. Joseph Lavoue, a son.

Died, on April 13, 1889, the infant daughter of Edward and Mrs. Peterson, aged five hours. The surviving parents have the sympathy of the entire community in their sad bereavement.

More snow. NEWS-GATHERER.

TIMELY ADVICE.

How Prospectors Found Land to Suit Them. Three Michigan land seekers came in the other day. They hired rigs from Mr. Paul and made several trips to the neighboring country.

"Well," said the spokesman to Mr. Paul, "we are discouraged. We have seen plenty of land, but found nothing to suit us. I think we will go back."

Mr. Paul advised them not to give up. "You are," he said, "men of family and are the kind we need here. I'll tell you what to do. Take my rig and go to Highwood at my expense. I will give you a letter to a ranchman who will show you the country and tell you all about it."

The land seekers took Mr. Paul at his word. They went to Highwood and saw the ranchman. One of them bought his ranch and the other two filed on quarter sections. The new settlers are delighted with the country and will send home for their families.

The moral of all this is that when the right kind of men come here in quest of land they find it, but cranks who would be dissatisfied in the garden of Eden are not likely to settle down here or any where else.

No genuine land-seeker lacks advice in finding a tract to suit him. Mr. Paul Gibson and his efficient aids Messrs. Webster, Dickerman and Morton leave nothing undone to put men on the right track. Messrs. Dym, Randall, Barnes & Collet, Hanks & Atkinson and others also willingly advise the prospector as to the best place to locate.

A person is seldom sick, when their bowels are regular and never well when they are irregular. Bear this in mind and keep your bowels regular by a occasional dose of St. Patrick's pills. Sold by Lapeyre Bros.

"What remains to be seen. I cannot see what there is to stop the 'big four' from forming a company and erecting in each state an establishment with a capacity sufficient to supply the demand of the state where located and then buy every bullock that is offered for sale in the yards and then slaughter them there, or ship them alive from one state to another, or abroad, and place the beef to city butchers at their own prices. They can still ship their cattle in its crude state to Chicago, where they now have the improved machinery for treating it, and thus hold the horns dealers still at their mercy."

Mr. Higgs holds the opinion that the true solution for all this conflict is to slaughter the steers in Great Falls where the healthy cattle can be procured from the ranges. This will preclude all danger of disease and losses incidental to railroad transportation on the hoof to Chicago or St. Paul. He holds in brief, that dressed beef should be prepared for market near the great ranges and distributed hence to the large markets of the world.
