

CLARK-MAGINNIS.

BOTH WERE ELECTED UNITED STATES SENATORS TODAY.

They Receive the Full Vote of the Joint Assembly—Telling Speeches Made by Senators Clark and Maginnis—They Have Firm Confidence in the Fairness of the U. S. Senate.

HELENA, Jan. 7.—[Special to the Tribune.]—The senate and house met in joint session at noon. There was a quorum present. On the first ballot Hon. W. A. Clark and Major Martin Maginnis received 37 votes and were declared elected.

Both gentlemen were escorted to the house by a committee and great enthusiasm.

Senator Clark then addressed the house briefly dwelling upon the unfortunate circumstances attending the session to statehood which are depicted by every Montanan. He believed that facts are fully understood by all the people of the Union. He was sure that every right thinking man approved the course pursued by the democrats in the controversy. They have done so in defense of all the principles involved in the fight of suffrage. The contest will now be transferred to the floor of the senate where it will be eventually decided by those who have at heart the welfare of all the people of the Union. There will be no demands upon your representatives. I shall at all times look to the welfare of all the people of Montana regarding political factions or platforms. Unlawful importation of lead ore, wood question and have all the credit of silver will demand our immediate action. Mr. Widom's proposed mining bill is considered as impracticable—being but full unlimited coverage will satisfy me. [Applause.]

SENATOR MAGINNIS SPEAKS. Senator Maginnis followed in a brief manner, expressing his confidence in the U. S. senate, who would not tear down all fundamental principles upon which the rock rests. The poor man's vote should count as well as the vote of the millionaire. "I shall go to Washington," said, and tell the story of the people of Montana. I am elected by those members of the legislature who were rightly elected and not returned by manufactured certificates."

LABOR TROUBLES. LONDON, Jan. 6.—Labor continues in a very disturbed condition and at present it looks as though the year 1900, in the early months, would be remembered as the year of strikes. The great eastern railway, who have been agitating for a ten hours' day, are almost in a state of revolt, and a national movement favor of a general reduction of hours railways is rapidly spreading. In some of the mining districts the men have demanded a further advance of wages, which employers have refused, and in all districts there is a strong disposition to take a stand for an eight hours' day.

WANT INDIAN TERRITORY OPENED. ST. LOUIS, Jan. 7.—A movement has been started by the Merchants' Exchange hold a "territorial convention" in this city, to which delegates from the various Indian tribes and the western people generally should be invited to discuss the question of the future of the territory of the entire Indian Territory. The promoters of the movement claim that the Kansas City convention opened up the eyes of the people of the United States and have the distinction of throwing the whole Territory open to settlers.

FINN HORSES. At the head of his draft stables Captain Couch has placed Lustré, 4383, National Register of French Draft Horses, Vol. V. This animal is a steel gray, coming four years old, stands 17 hands high, and is very well proportioned. He weighs 3,800 pounds, stands well on good legs and feet, has excellent sound, is high-spirited and intelligent, and is a king among show horses.

FOREST CHIEF, by Harrison Chief, is at the head of the trotting stock. The sire of this horse has a record of 2:30 and he is a descendant of a long line of thoroughbred trotters. He is a beautiful bay, high-spirited, kind and has good action. On this model ranch are over 150 mares, many of which are standard and well bred animals, among them are first specimens and new types of the Morgan, Black Hawk, Arabian, Hamiltonian, Knox and Chry. This is one of the finest herds of horses in Montana.

FINN HORSES. At the head of his draft stables Captain Couch has placed Lustré, 4383, National Register of French Draft Horses, Vol. V. This animal is a steel gray, coming four years old, stands 17 hands high, and is very well proportioned. He weighs 3,800 pounds, stands well on good legs and feet, has excellent sound, is high-spirited and intelligent, and is a king among show horses.

GOOD CATTLE. Besides raising different breeds of horses, Captain Couch has about 600 head of cattle. These include thoroughbred specimens of the Shorthorn, Hereford and Holstein breeds. The greater number of these cattle are kept on his Smith river ranch. This ranch is a fortune in land, located at the junction of the Smith and Missouri rivers, it includes over 400 acres of natural meadow lands, which annually produce two tons of hay per acre. The remainder of the ranch—comparatively 1,100 acres—is excellent pasture land, and the entire ranch is surrounded with a good substantial fence.

AN HONORABLE CAREER. That Couch began mining before he reached 20 is a fact well known to all. He was a very leader age emigrated to the Lake Superior copper region, where he remained a year; thence he went to California, working in the gold and quicksilver mines in the former at Grass Valley and in the latter at New Almaden. By his time, though only a boy in years, he was a good practical miner and developed an early ambition to get to the front.

On the first of February the banking firm of Clark & Larabee, which has existed for 20 years, and is one of the strongest and best known firms in the northwestern states, will be dissolved by mutual consent. Little work done on the bank and new firms will succeed it in both Butte and Deer Lodge. The Butte firm will be W. A. Clark & Bro., Mr. J. Ross Clark being the junior partner. The firm name of the Deer Lodge house will be Larabee Bros. & Co., the firm consisting of E. B. Larabee, C. X. Larabee and Henry S. Reed.

Thursday the Boston & Montana Copper company was organized a day by which it adds to its properties the Badger state mine. The Badger state mine adjoins the Aurora on the east and the Kentucky on the north, and though there has been comparatively little work done on the property, it is looked upon as a valuable mine. The negotiations have been pending for the purchase for some time, but were delayed because there were several owners, and an arrangement satisfactory to all could not be reached. However, W. H. Young, one of the principal owners, and Captain Couch came to terms, the purchase price being stated at \$25,000.—Butte Mining Journal, Jan. 6th.

Just Received January number of Butte's Delinquent. Price 15 cents. Joe Conrad.

THE GREAT DAM.

ENGINEER FANNING ARRIVES TO START THE WORK.

Some of the Details of Construction—Large Force of Men Will be Employed—No Greater Power on the Continent.

J. T. Fanning, the hydraulic engineer, and J. M. R. B. Fanning, have arrived from their home in St. Paul and will begin at once preparations for the construction of the great dam across the Missouri river at the Black Eagle falls. The purpose of Mr. Fanning's visit at this time is to consult with contractors whose desire to bid on the work and to make such explanations of the plans and specifications as will enable those who desire to compete for the contract to bid intelligently. He will remain a week or ten days and during that time will be pleased to furnish to those desiring to bid on the work any information they may wish.

THE PLANS AND SPECIFICATIONS. A TRIBUNE representative was shown the plans and specifications of the dam by Mr. Fanning today. Some of the provisions are briefly as follows: Bids will be received at the general office of the St. P. M. & M. R. L. in St. Paul, addressed to J. T. Fanning, until Feb. 20th. Each bid must be accompanied by a certified check for \$1,000, as an evidence of good faith, etc., which will be returned if contract is not secured.

The dam and headgates will be approximately 1,100 feet long, and will require the placing of 1,800,000 cubic feet of masonry, 80,000 feet of plank, 74 tons of iron work and bolts, 9,900 cubic yards of stone filling in cribs, 3,400 yards of gate chamber masonry, 12 sets of lead gates and 3 sets of waste gates.

The exact location of the dam is 300 feet above the Black Eagle falls. There will be a gate chamber containing three pairs of head gates on each side of the river and a waste sluice between the waste sluice and the gate chambers. These will be of cemented masonry.

The overall section of the dam will be a timber cribbed structure filled with stone. The excavations for the gate chambers and wing walls will be made down to solid rock that has not been disturbed by frost action.

ADDITIONAL FACTS. These are but a few of the general details, the full specifications covering several pages of closely printed matter. Mr. Fanning will have general supervision of the work, which will require his presence here a goodly portion of the time during the summer. He has also charge of the dam at Spokane Falls, which is now being built. The height of the dam at the lowest point will be 10 feet and at the highest about 15 feet. The masonry of the gate chambers will be 10 feet higher than the dam, or about 25 feet in height. The penstock is the great feature of the dam, being 10 feet in diameter, and the water is conducted to the power pit. The penstock for the B. & M. smelter will be 1,100 feet in length, and as there are to be six of these it will be seen that the B. & M. work will require one-sixth of the power that will be available on the completion of the dam.

The engine and boiler house at Sand Coulee was destroyed by fire on Saturday morning, resulting in a loss of about \$2,000. The engine and boiler were insured. The accident does not at all interfere with work in the mine.

C. H. Campbell, of West Minister, who has established a thoroughbred sheep ranch in Sand Coulee, will return in the spring prepared to build up one of the finest thoroughbred ranches in Montana.

Superintendent Green of the Montana Central is in the city. He reports busy days at the mine, and at Sand Coulee, and is expected to return to Anaconda. This with other freight made four freight trains south from here yesterday.

The first term of the district court, under the constitution, begins at Benton today. A number of the jurors from the Choteau and Dupuyer region arrived here Saturday and Sunday and are found in the city. The court will be held during the cold snap, especially as they have to stage it from 50 to 80 miles. District court in mid-winter is a new experience in this section.

Sand Coulee coal which has been in great demand here, has improved a great deal in its quality, and is now the principal fuel used in the city. Coal of all kinds is used more than ever this winter and the fuel dealers are of course the gainers by the change. As the domestic coal is constantly improving in quality the consumption increases in proportion.—Helena Journal.

It is a fact that it is an impossibility to buy a desirable store or office room, or a dwelling in the city of Great Falls. This being the situation, now what will it be six weeks hence, when the new enterprises here are under way and people from all parts of the country are coming to settle here in reduction of cost. The fact suggests that there is an excellent opportunity for the investment of capital in both business blocks and dwellings at this time. The market is at the earliest possible moment after winter loosens his grip.

Mr. Matheson in the Helena Independent: "We are doing very little in Helena right now. We have our hands full in the north. The Falls property. It is two miles from the town of Great Falls. The Boston & Montana company have 450 acres of ground on the river front, and are planning to build a dam at Black Eagle falls, which will be finished by September. Great Falls is going to be one of the busiest sections of Montana as soon as snow disappears."

Teachers are paid a liberal salary— from \$30 to \$120 per month—and as a class will compare favorably with the teachers in any of the eastern states. Among their number are graduates from several of the best colleges and normal schools in the older states, and this alone is a guarantee that the schools are in good hands and are progressing.

GRAY HATED FRAUD.

CATCHING SUCKERS IN THE PARK WEST.

Money Who Collected Money on Account of the Boston Journal Had no Authority to do so.

The Tribune received the following by today's mail: OFFICE BOSTON JOURNAL, Jan. 3, 1890. A man named Money is collecting money in the west on account of the Boston Journal without authority from this office.

This may be of interest to some of our Great Falls people, for Money was here. He is a grey-haired, sickly, thin, miserably-looking old gent and an infelicitous journey at Hot Springs, Ark. He will be gone about three months.

Train men report that the thermometer registered 38 degrees below zero at Fort Assiniboine yesterday. At Great Falls the thermometer was 25 above.

Wm. Albrecht has been compelled to enlarge his room in order to accommodate his large stock of furniture. He has done this by putting in a false floor about seven feet from the ground floor, and by the use of a large capacity of the back part of the room.

Mr. J. M. Jacobs, who is stopping at the Park, received a telegram this morning stating that his large store and entire stock of furs had been consumed by fire. Mr. Jacobs is the largest dealer in furs in Butte and had a large stock on hand. His total loss above insurance is about \$5,000.

This is the week of prayer and union meetings will be held every night at one of the churches. The meeting was held at the Presbyterian church last evening. Rev. Mr. Coombes, officiating. Tonight Rev. Anderson will preach at the Presbyterian church. Subject: "Nations and their History." All are invited.

City Marshal Lester and his wife are both confined to bed, both of them were married at the Catholic cathedral in Helena today. They arrived in this city this afternoon and their many friends are wishing them much happiness and according to them a hearty greeting. The Tribune joins in congratulations.

Mr. O. S. Warden, the editor-in-chief of the Leader, received a telegram today announcing the serious sickness of his mother. He started for his old home and his mother's bedside at Monroe, Va. This afternoon, Mr. Warden has made an excellent record while connected with the Leader and we sincerely hope that he will soon be able to return to his home.

THE STORY OF A YEAR.

PHOTOGRAPH FROM LIFE TAKEN ONE YEAR AGO.

PHOTOGRAPH FROM LIFE AS SHE NOW APPEARS.

"Look on this picture and then on that." The above faces are exact reproductions of photographs taken from life of Mrs. Morton D. Harlan, who resides at No. 38 West 8th Street, New York City. The first one was taken in November, 1887, while in the last stages of consumption, almost abandoned by physicians and nursed through the use of Dr. Acker's English Remedy for Consumption. The above pictures are wood cut reproductions of the original photographs taken from life. It can be seen at all the drug stores. Mrs. Harlan's consumption began about a year ago, and she had a cough in the morning, raising of phlegm, tired and depressed feelings, a weak appetite, the loss of flesh and pain throughout the body. It did not matter how extra diligent she became about her diet, she did not improve until she took Dr. Acker's English Remedy for Consumption. It soon began to cure her, and she is now as well as ever.
