THE DAILY TRIBUNE

SPRAY OF THE FALLS.

SATURDAY'S DAILY.

A cage-tender named Wingenback was killed in No. 2 shaft of the Drum-Lummon mine Thursday night.

C. D. McClure of St. Louis, one of the principal stockholders of the Granite Mountain Co. is in the city.

Among the Great Falls visitors in Helena are T. E. Collins, George Jones, and Sam MacMurray.—Journal.

W. P. Clough, the vice-president of the Great Northern railway, passed through here yesterday on his way to the coast.

O. G. Cooper and E. E. Leech of Choteau arrived from Benton last evening by a freight train. They had been in attendance at court, but hope to attend the next term in Teton county.

Mr. Scott Wetzel is rapidly recovering from his late illness, and it is not now expected that he will lose his hand, as the circulation is daily increasing. But the Benton old-timer has had a close call.

Judge Hoffman's child is somewhat easier and hopes are entertained that the little fellow will survive the sickness. Two of his boys are, however, down with tonsillitis, but it is hoped they will pull through in a day or two.

Married, at Fort Benton, Montana, February 11, 1891, by Justice B. L. Powers, Mr. Arthur O'Neil of Great Falls and Miss Etie Brown of Fort Worth, Texas. The happy couple arrived on last evening's train, secured a license and were soon united in marriage.—River Press.

Dan English and F. M. McKisson arrived at Demersville from the Great Northern logging camp last week, work having been suspended for the present. One pine tree cut at that camp scaled 9,100 feet of lumber. One fir log cut in the same locality measured forty-nine inches in diameter. They have 2,000,000 feet of lumber at their camp on the Flathead and 4,000,000 at the Stillwater camp. The lumber is to be used only for domestic purposes.—River Press.

The Helena Electric Railway company has issued first mortgage bonds in the sum of \$300,000 to the Old Colony Trust company, of Boston, Mass. The bonds are dated January 1, 1891, and are of \$1,000 each, bearing 6 per cent interest semi-annually to run for twenty years. The necessary indenture was filed in the office of Secretary of state Rotwitz yesterday afternoon. The money raised by the sale of bonds is to be used in operating and improving the road and in building any extensions and branch lines as may be deemed desirable or necessary.—Helena Journal.

It has been suggested while our legislature is in session it would be well to draw their attention to the fact that there is no record of either births or deaths in this supposedly civilized state. To record marriages and neglect the births and deaths in our communities is certainly a glaring inconsistency. One officer could attend to all these affairs without difficulty. Men are dying every day. Who are they? Who can tell what properties, heirships, etc., may be involved in their deaths? Children are being born—who can tell in years to come what may be

the outcome of such births? Records should be kept and the sooner the better for the good of the whole state.

SUNDAY'S DAILY.

John Lopley came down from Helena yesterday.

Miss Carry Patch of Truly, is visiting in the city.

Miss Rose Kirk of Boulder, is a guest at the Park.

The Hon. Paris Gibson returned from Helena yesterday.

F. C. Burns, a Helena architect, is in the city and will probably locate here.

C. D. McClure, Col. Thomas Hart, and E. G. Maclay will go to Nelhart today.

C. W. Cass, general superintendent of the Great Northern, and wife are in the city.

O. S. Warden, managing editor of the Leader, returned yesterday from an extended visit east.

Judge Benton has wound up the court business of Choteau county for this term and got back to the city yesterday.

Mrs. H. P. Rolfe and daughter Pauline, returned from the east yesterday. They were met at Helena by Judge Rolfe.

Washington Muzzy and John Johnson proved up before the clerk of the district court on their pre-emption claims yesterday.

Miss Ingalls entertained the young ladies of the H. O. O. club yesterday afternoon at the home of Mrs. Ernest Ringwald. As usual the young folks spent a most agreeable afternoon.

Judge Benton discharged the juries this afternoon. Business was practically finished for the term at 3 p. m., but the judge adjourned until a later hour to allow the clerk to make up minutes and complete his work. Court therefore will stand adjourned this evening for the term.—River Press, 13th.

Susan O'Briner yesterday filed suit for damages against Duncan M. Gillis for defamation of character. The damages are set down at \$5,000. This is the outgrowth of the case that was tried before Judge Race the other day. The feud began over the quarreling of children, which the parents took up and which is carried to the courts for settlement.

"For fun and hospitality Sun River takes the cake," remarked a merry masquerader in the TRIBUNE office yesterday, who had but a few hours previous returned from the masquerade ball at Murry hall, Sun River. He reports a good supper at the Largent house, a good time, and good music, furnished by Frank Ervin. There were between twenty-five and thirty couples present.

Mr. Thomas (Red) Whaley, the petty thief who went aboard of a Great Northern train at Havre and stole a fur overcoat from Mr. Gleason, Pete Seims' brother-in-law, got a just sentence today—one year in the state prison. His crime was declared to be burglary, just the same as if he had broken into a house to accomplish his purpose. This is good law and we hope every petty thief who enters a train or a building will get the same dose.—River Press.

THE CASH SYSTEM PAYS.

Such is the Verdict of Murphy, Maclay & Co. of this City.

On Jan. 1, Murphy, Maclay & Co. adopted the strict cash system and have had now an experience of just a month and a half under the new regime. Interviewed yesterday on the subject Mr. Maclay said they are more than pleased with the results and are fully convinced now that it is the correct method of doing business, being in the interest of both the merchant and his customers. Selling for cash only the merchant can offer his goods at the lowest possible margin and the buyer receives a decided benefit in the transaction. Murphy, Maclay & Co. report that their business during January past, on the cash basis, was 100 per cent greater than for the corresponding month of last year and it is needless to say they see no possible objection to the new system. Under no consideration could they be induced to go back to the credit system and many of their customers who are enabled to buy cheap goods for cash are just as solicitous that they should not do so.

Electric Companies Combine.

PITTSBURG, Feb. 13.—The authority of one of the most prominent brokers here is given for the statement that the Thompson-Houston and Westinghouse companies have combined and will hereafter be run under the Edison management. Ever since the Westinghouse electric broke below 20 and landed in the neighborhood of 6, enormous purchases of common stock have been made for eastern people. These purchases were for Boston and New York people, in Thompson-Houston interest, and the above mentioned has been one of the heaviest purchasers. Official announcement of the change in management will be made next Monday.

Paper Mill Explosion.

GOSHEN, Ind., Feb. 13.—The combination pulp and straw mill at Elkhart, exploded late Thursday night with terrific force, demolishing the large brick mills and utterly ruining the plant. Schuyler Neswander was blown 300 feet and torn to pieces. George Hickman was crushed from his hips down and will die. Foreman Flemming and Assistant Wilson were also badly hurt.

The Great Strike.

SCOTTDALE, Pa., Feb. 13.—A big mass meeting of cokers and miners was held here last night. This morning 600 employees of W. J. Rainey quit work at the Paull and Fort Hill works and joined the strikers' ranks. It is expected the men at Moyer works will join the movement tonight. Deputy sheriffs and Pinkerton guards are protecting Rainey's works from threatened raids.

Base Ball Racket.

CHICAGO, Feb. 13.—The baseball board of control tonight decided to elect Allen Thurman to the presidency. Young was made secretary and treasurer. The board then proceeded to audit submitted lists of reserved players by the clubs of the different associations. The task was not completed tonight.

THE NEW BACH-CORY BLOCK.

A Handsome Pressed Brick and Stone Building Nearly Ready for Occupancy.

THE NEW HOME OF THE RAINBOW CLUB

The Cascade Steam Laundry Start Up Their New Machinery Tomorrow.

The Finest Laundry West of St. Paul and the Second of Its Kind in Existence.

It is with commendable pride that a habitant of Great Falls points to the new and imposing block of Bach, Cory & Co. It impresses one with a feeling of massiveness and stability characteristic of the sterling qualities that have succeeded in building up this monument of business energy and pluck. A TRIBUNE representative made a hasty inspection of the building yesterday and found painters and carpenters busy as bees putting on the finishing touches. The main stairway and elevator are not yet put in, but with the present force it will not take many days to complete it. The cage for the elevator is here and all the other appliances for it are on hand ready to be put in position. The elevator will be worked by means of hydraulic water pressure, which is the safest and most expeditious means of communication. Besides the passenger elevator there is one for freight which runs only to the store-room of the company on the second floor.

In the basement are located the boilers for steam-heating and also an immense storeroom for goods, etc.

On the first floor and fronting on Central avenue will be the immense store of the firm, the main room being 30x98 feet. The Northwestern National bank will also be on this floor, occupying the corner of the building on Central avenue and Park drive. On the second floor are eleven large rooms cut up into suites and suitable for office purposes. A large store room for Bach, Cory & Co., is also here, and takes up about half the space on the floor.

On the third floor are sixteen rooms arranged so that they may be used for offices or as bedrooms. They are large, airy, have good ventilation and plenty of light.

The fourth floor is almost taken up by the Rainbow club and has been especially laid out and planned for their convenience and comfort. Their apartments are not yet finished, but when completed will be marvels of ease and luxuriousness. They have an assembly room, large cafe, billiard room, parlor, committee room, kitchen, etc., in all, seven rooms. These are fitted up with gas and electricity, electric bells, and all the modern conveniences. The rooms are finished in heavy oak, oil polished and have a substantial appearance. When furnished the club will have a home second to none in the northwest.

Each floor is provided with a fire-plug and seventy-five feet of hose to be used in case of fire. On the different floors are located sinks, closets, etc., and right here we must express our surprise and admiration at the thoroughness of the plumbing work. We doubt if there is another building in Great Falls which can equal it in sanitary conditions. W. G. Rowen did the work and we are glad of an opportunity to give him this just mead of praise.

William Roberts superintended the building, and Rubottom & Gilchrist are doing the painting and finishing. D. F. McDavitt is the architect.

The building throughout is finished in hard wood oil polished, and in a few days will amply repay a visit of inspection.

THE CASCADE STEAM LAUNDRY.

The Best Equipped Laundry West of St. Paul.

A model institution and the second of its kind in existence, the other being the Henlepin laundry of Minneapolis, is the Cascade steam, or, more properly speaking, the Cascade Electric Laundry. In order to keep up with its growing business the proprietors, Messrs. Jensen & Johnson, have been obliged to add an additional building of 22x100 feet to keep up with the march of progress made by our city within the last twelve months. New boilers, new engines, new appliances have necessarily followed until now Great Falls can boast of the second electric laundry in existence. The electricity is generated on the premises. In order to do so it became necessary to put in new boilers and a 25 horse automatic engine. This furnishes the motive power for the machinery and also for a 140 light dynamo of 16-candle power. This dynamo supplies the electricity for lighting the building and for heating the machinery used for ironing purposes. It is the electric heating appliances that we especially desire to call the attention of our readers. This is the latest known application of electricity to labor-saving devices. There are two shirt-bosom ironers, one shirt-body ironer, and eight sad-irons heated by this process. Mr. Thiel the electrician who is

putting in the works after seeing how perfectly the sad-irons worked remarked to a TRIBUNE representative that he would certainly put in one for his own wife. All the ironer has to do is to turn the switch and in three minutes the iron is ready to be used and the beauty of it is the top part never gets hot. The wire conducting the electricity to the iron is kept out of the way by means of a steel spring which allows perfect freedom in the use of it. This ought to be seen by every good house wife to be appreciated.

But to return to the new building. In the basement are located the boiler and engine, the electric plant, two Cambridge washers, two centrifugal extractors, a shirt starcher, a collar and cuff starcher, a big 400 gallon hot water tank, a 10-rack dry room and the marking department.

On the first floor is the largest make of mangle which is used for ironing sheets, pillow cases, table linens etc., two bosom ironers, the eight sad irons are on this floor, and the two shirt ironers, beside an office.

The second floor is fitted up for roomers.

The new machinery works to perfection and will be put into active operation tomorrow. The Cascade laundry furnishes employment to between 16 and 17 hands.

This is certainly a model institution and one in which the public are invited to inspect.

Note the Change.

13 pounds of granulated sugar for \$1. 15 pounds of brown sugar for \$1. White Lilly flour per half sack, \$1.35 at Murphy Maclay & Co.
