The timber culture contest of Sarah A. Maurer vs. Edwin D. Woods has been decided in favor of the contestant, Mrs. Maurer. The testimony in this case was taken in the district clerk's office and sent to the United States land office at Helena for decision.

The handsome new dwelling of Mr. T. E. Collins, in West Great Falls, is progressing rapidly. The second story is now being built and if the weather permits the outside walls will be finished by Saturday night.

The contractors on the new opera house evidently mean business. Ground was broken yesterday and if Jupiter Pluvius will only hide himself for a while the excavating will soon be done.

Yesterday the stone cutters once more began work on the Tod building.

Last evening between 8 and 9 o'clock, W. H. Black, of the fire department was

quite seriously injured. He was driving one of the fire wagons. A sudden stop was made near the corner of Second avenue south and Fourth street, and Mr. Black sprang to the ground...

Fair Settlers.

A party of four young ladies and two gentlemen arrived from Helena and the Falls on Wednesday's coach and made selections of 320 acres of land each near this place. The party consisted of the Misses Emily T. Leslie, Kathryn Johnston, Amanda T. Maupin, and Sherwood Wheaton and K. M. Leslie of Helena and Miss Fannie E. Cockrill of Great Falls. The two Leslies are a son and daughter of ex-Gov. Leslie, Miss Maupin is a sister of Mrs. Gov. Leslie, Miss Cockrill is a sister of William Cockrill, clerk of the district court at Great Falls, and Miss Johnston is a daughter of Col. Johnston, who is well known in this section as a political speaker of some repute. Mr. Wheaton is deputy clerk and recorder for Lewis and Clarke county. The ladies dined at Uncle Jessie Taylor's today while the two young men were fishing in Spring creek. The party left for home this afternoon well pleased with their visit.—Montanian.

Engineer McIntyre Exonerated.

Says the Montanian: Engineer Bouscaren returned from his examination of the Crown Butte Canal last Wednesday evening. He reports the estimates and classification made on that work by Engineer McIntyre as being correct, completely exonerating him (McIntyre) from the charge that he had been dropping the contemplated suit to recover some thousand dollars which they claimed McIntyre swindled them out of by overestimates.

A Novel Industry.

A novel industry is liable to be developed in Chouteau county in connection with her wool growing business if many such wonderful finds are made as fell to the good fortune of Levi Stubblefield, a sheepshearer of Milton, Oregon. Stubblefield was shearing for Jno. F. Patterson a short time ago, and found embedded in the wool on the back of a sheep he was shearing a sparkling native Montana diamond. The shining stone attracted Stubblefield's attention immediately, owing to its intense brilliancy. He secured it, and wrapping it carefully in paper, deposited it in his pocket book. Last evening he came into Fort Benton and had the stone examined and tested when it was discovered beyond a doubt that it was a genuine diamond in the rough, about half the size of a large marrowfat pea. Stubblefield leaves for home tomorrow morning, and takes his remarkable find with him. He proposes to have it cut and mounted. If Chouteau county sheep begin to produce diamonds as well as wool her flockmasters will be able to wear gems, sure enough.

Wants to Know the Fish Laws.

BLACK EAGLE FALLS, July 1, 1891. EDITOR TRIBUNE: Will you allow me through your columns to draw the attention of the proper authorities to the illegal fishing carried on here by drop-nets. There are no less than nine of these now in full blast day and night and their catch varies daily from fifty to 100 pounds of fish each. Where is our fish and game warden? Some two years ago, if my memory serves me right, there was put into the river at Broadwater bay a carload of mixed small fish or fry, and I, as well as all lovers of the gentle craft, would like to know what has become of them. Are they still in Broadwater bay or Sun river, or are they dropping down the stream to be netted out by Egyptians as this place just reminds one of the Nile fellahin all day long plying their bob-nets.

I send up to our esteemed friend and naturalist, John Sinclair, three fish taken out of a box wherein there has been a great many being whitefish, some catfish, and lots like the sample. What are they?

Trout as large as eight inches are being caught, and if allowed to grow would soon prove a source of pleasure to all disciples of Isaac Walton who might come down any evening, now that we have cars running until half past ten p.m., and bring their lances and a few casts of flies and try to allure the speckled and silvery beauties from their cool abodes. Just fancy the mesh of the nets used which will not allow such small fish to escape through as this sample. All I can say is if the nets are not stopped at once, fish in the vicinity of Great Falls will soon become extinct, as did the buffalo. I think there is a statute in the Montana laws on the subject of fishing above the Great Falls, and should be glad if our late game and fish warden, Mr. Taylor, would give me a few pointers as to how to act. Yours truly, JOHN ABRAMS.

ITEMS FROM GLENDIVE.

The Glendive Independent present the following interesting items to its readers. The one relating to the large transportation of cattle will be of especial interest to Montana readers:

Dr. Corcoran, of Miles City, prescribes the following cure for dogs poisoned with strychnine, which he says he never saw fail when used in time: At once give some tartar emetic on the back of tongue to produce vomiting, then have physician inject hypodermically from 20 to 40 grains of hydrate of chloral from time to time to prevent spasms. Give at the same time a large dose of castor oil.

It is reported there are 100,000 cattle on the trail from the Pan Handle, with 100,000 more to follow, all bound for Montana. As these cattle come from a reservation, they will be plastered with a tax certificate.

The receipts of wool at the warehouse footed up yesterday at noon to 150,000 lbs. Of this amount 60,000 pounds have been shipped to various consignees. The wool is all clean, of an exceptional fine quality and should the balance of the season's clip equal the beginning, Dawson county will stand A. No. 1 in the market. The bad roads have held back the clips and owners are awaiting clear weather.

The best Corsets in the world at Joe Conrad's.

THE CONTRACT PRACTICALLY LET.

The Building of the Great Smelter to be Pushed Rapidly Toward Completion.

For some time past representatives of various eastern manufacturers have been in the city figuring on the work of the Boston and Montana smelter. It appears to be practically awarded last night. It has been apparent since yesterday morning that the Berlin Bridge company of East Berlin, Mass., had the inside track. When their representative, Mr. S. W. Bowles, was seen late last evening he said that while the contract had not been signed it probably would be in a short time as nothing now remained save the adjusting of a few details. The exact figures are not given out, but the cost of the building will be between \$50,000 and \$60,000.

Those represented and bidding were the Schiller Bridge company of Pittsburgh, Wrighter & Conley of Pittsburgh, represented by Mr. Seavers, the Gillette-Herzog Mfg. Co. of Minneapolis by Mr. Gillette, the Berlin Bridge company of East Berlin, Mass., by S. W. Bowles and the Pennsylvania Steel company of Steelton, Pa. by F. C. Arentz. All these gentlemen, except Messrs. Arentz and Bowles left the city yesterday.

The smelter building is to be built entirely of steel, its dimensions being 230 by 155 feet, and will require about 700 tons of this material. It is to be terraced into the sides of the hill and will be, in effect, several buildings, under a single continuous roof. The building will be pushed toward completion as rapidly as possible, and will, in all probability, be finished by October 1st. Very little of the machinery is yet to be purchased. Three Bruckner furnaces will be procured shortly and then little remains.

AROUND ABOUT THE STATE.

Not Doing Very Well.

Subscriptions to the artesian well fund are still coming in slowly—but too slowly. The lists should be closed and the work started at once.—Helena Independent.

Gold and Precious Stones.

The Montana Sapphire company are satisfied that they have struck it, and struck it rich. A number of the stockholders are Billings capitalists and they have been displaying some fine specimens of gems taken from their claims.—Billings Gazette.

A Blow at the N. P.

The Great Northern service is quite as good as that of the Northern Pacific. From Great Falls to Butte it was built by a Montana man. It passed through the richest mineral section of the Rocky mountains without trying to steal a foot of mining ground and paid for its right of way.—Butte Inter Mountain.

Montana Fair Commission.

Gov. Toole has issued a call for a meeting of the board of World's fair managers for Montana in Helena on August 3. Some active steps will be taken at that time to make further arrangements for the proper representation of the interests of the greatest mining state in the union at Chicago in 1893. Commissioner L. H. Hershfield, who returned from Chicago Saturday morning, called on the governor yesterday. The governor has announced the following appointments on the board: Stephen DeWolf, of Butte, vice Geoffroy Lavelle, resigned; Conrad Kohr, of Deer Lodge, vice Wm. L. Hughes, resigned; A. R. Joy, of Livingston, vice J. C. Vilas, resigned.—Helena Independent.

More Water Power.

Articles of incorporation of the Livingston Water Power company were filed with County Clerk Deutsch Monday. The incorporators are J. C. Vilas, George T. Chambers, E. A. Krieger, George A. Gordon, Isaac Orschel, J. D. Finn and A. J. Campbell. The capital stock of the company is \$250,000, divided into 2,500 shares of \$100 each. The operations of the company will be carried on in Livingston, where the principal place of business of said company is situated.—Livingston Enterprise.

A Striking Editorial.

One gentleman (?) came to town a few days since and expressed his intentions of wiping up the earth with our delicate France. Well, we are not very large and probably would not make much of a grease-spot on the face of old mother earth, but there are no strings on the gentleman (?) and he can find us busily engaged at our humble occupation any time he may wish to call and try his process of mopping.—Western News.

A Sweeping Charge.

A man is in Helena with a proposition to start a broom factory. The proposition will receive careful consideration—nothing else.—Missoula Gazette.

Lawn Tennis Match.

The lawn tennis match between the Lethbridge and Great Falls clubs is one of the attractions of the Fourth of July celebration at the Falls. The players who will represent Lethbridge on the Great Falls courts are Messrs. J. D. Higginbotham, E. R. Goodwin, and W. G. Cleveland, with a fourth not yet chosen. The above are all skilled players and will no doubt do honor to the town which they represent.—Lethbridge News.

To the Public.

As I have concluded to retire from the jewelry business, I will offer my entire stock of Gold and Silver Watches, Diamonds, Rich Jewelry, Silverware, Clocks, etc., at cost for cash only or will trade for city property. H. RINGWALD.

Buy your fireworks at Frank Ervin's. He has everything you want!

For a troublesome cough there is nothing better than Chamberlain's Cough Remedy. It strengthens the pulmonary organs, allays any irritation and effectually cures the cough. It is especially valuable for the cough which so often follows an attack of the grip. For sale by Lapeyre Bros. Silverware, Clocks, etc., etc., at cost at Ringwald's.

THE MINING WORLD.

Work in Neihart—Pleased With the "Tribune" Write-Up.

The Moulton now has reached a depth of 95 feet on the three compartment shaft and is still sinking. The excavation is now in progress for the location of their new power house which will contain a new engine, hoist and air compressors, and after its erection the drills will run by power. The company now employs thirty-five men on the works.

The extract taken from the Great Falls Tribune relating to our camp and published on the first page of this issue, is fairly representative of our camp. It might be said in favor of the production that it is not a paid ad, and doesn't contain a paid advertisement, but that it is written to state the facilities and resources of Neihart, without aiming to convey a prejudicial opinion.

The Ingersoll Co. fired up their engine yesterday for the first time. The boiler is a forty horse power, the largest one ever brought into camp. Before a week has passed the air compressor and power drill will probably be running and the Ingersoll will then be worked by a system never before used in camp. It is the intention of the company to cross-cut to the Moulton lead and the success of this move will yield great wealth to the company.

The I. X. L. on Snow Creek has a shaft 140 feet deep and still sinking. Irvin B. Hopkins is one of the principal owners. The ore is taken from a lead from 3 to 5 feet wide and consists principally of sulphurets and brittle silver. Assays range from 120 to 200 oz. in silver. From crevices in the lead a soft brown matter is taken which tests native gold. From one small part of the matter Mr. Hopkins washed gold dust worth \$1.40. About 50 tons of ore is on the dump which has been removed in the development. The I. X. L. bids fair to be a great ore producer.

Hoover Creek is a camp bound to come to the front. Over fifty claims are already located, and some of them have showings which predict in forcible terms the stability of the camp. Sam Dorr and Walter Bisson have three or four finely developed prospects. Matthew Dunn and H. G. Kienzle, of Great Falls, also have very promising prospects. J. A. Benoit and John Thompson claim the B. T. J. S. and the Raven, the first two having prominent projecting ledges, and the Raven is undeveloped further than the discovery of one wall. Keep your eye on Hoover creek.

Mr. Wisemiller, the superintendent of the Sweepstakes Mining company, has arrived at the camp and will take charge at once. He is an experienced mining expert in that class of mines and has a wide range of experience from long service at superintending mines in and around Leadville. The force of men will be much increased and development work will be pushed with great rapidity. Indications are that a great lead will be uncovered, and in case of success in this the character of the ore proves conclusively that the mine will pay big dividends to the owners. The ore of the Sweepstakes is free smelting.

The Queen is destined to be one of the best mines in the state. The main tunnel of this mine runs through a continuous ore body 750 feet long, which averages three to four feet wide and assays about forty ounces. At some points the lead is seven feet wide in paying ore, and some of the ore carries 170 ounces. This is one of the great ore bodies in the state and when further developed the mine will run its own concentrator and reduction works. The Queen is no prospect hole, but is mined with a view to early working in the future. Every fifty feet of the main tunnel has an upraise and a two compartment chute to make the steps easy to work. Mr. C. L. Parker is its superintendent and Mr. Curin is foreman.

COMING TO MONTANA.

The Pillsbury Syndicate Will Build Big Mills at Great Falls.

The Minneapolis Tribune of a late date says: "The milling business men of Minneapolis remember the visit of Sidney T. Klein, one of the London members of the board of directors of the Pillsbury-Washburn Milling company. Mr. Klein was in Minneapolis some days, and it was to him that the publication of some of the particulars in regard to the new mill dam are due. It will also be remembered that Mr. Klein, C. A. Pillsbury, Superintendent Chase and others, including a number of ladies went on what was called a short pleasure trip to Montana. It has now leaked out that Mr. Pillsbury and Mr. Klein went to Great Falls, Mont., to look over the water power there with the idea of building a large mill there to operate in conjunction with the flour mills in this city. While the company proposes to develop the Minneapolis water power to its fullest capacity, it recognizes the immense advantage which will accrue in the future to the grain industry which has a footing on the upper waters of the Missouri.

Parrot Mining Company.

The annual meeting of the Parrot Mining company was held in Butte Tuesday last. The reports of the officers showed the company to be in excellent condition, both as to the mine and financially. A dividend of \$18,000, payable July 1, was declared, and then, much to the surprise of the stockholders, another dividend of \$180,000 was ordered divided among them. The reports showed that after the payment of these two dividends there yet remained a surplus of \$200,000 as the result of the year's operations, the total surplus and accrued profits being \$800,000. The location of the proposed refining works for the company was discussed, but beyond the fact that it was the opinion that they should be situated where water power was obtainable, no definite action was taken.

[Great Falls must be the place where else can such water power, as well as cheap fuel, etc., be found?]

Frank Farral was elected president and S. T. Hauser vice-president. The old board of trustees, consisting of Messrs. Holter, Hauser, Farral, Widgeon and Terrell was re-elected. It is property such as the Parrot that attracts outside investments in Montana mines. The story of the mine, from its first discovery to date, is illustrative of what pluck and faith in a mine will do.—Independent.

AT THE RACE TRACK.

Extensive Preparations Going Forward for the Races on the Fourth as Well as for the Fall Meeting.

A Tribune reporter visited the fair grounds yesterday and found a large force of men employed getting everything in readiness for the races on the Fourth. Fifteen carpenters were at work on the grand stand and will have it so far advanced by the Fourth that it will seat 500 people; when completed it will seat fully 1,000 persons. Pool rooms, restaurants and other buildings are under way and all will be completed before the workmen leave the ground. Stable room for 130 horses will be provided before the August meeting and at present some 40 stalls are finished and for the most part occupied. The following among other horses are now on the ground and will take part in the races on the Fourth:

Commodore, by Prospect, owned by Capt. Couch.

Ely, by Prospect, owned by J. L. Henry.

Freedom, by Maxim, owned by Don Willard.

Captain Couch, by Prospect, owned by Robt. Vaughn.

Belle Oaks, by Red Oak, owned by W. H. Black.

Bruno, by Gen. Knox, owned by Julius Horst.

Lady Flash, by Red Oak, owned by D. H. Churchill.

Red Oak, by Fieldmont, owned by D. H. Churchill.

Bay horse, unknown.

Brown horse, unknown.

Chestnut horse, unknown.

George, by Great Western, owned by W. H. Black.

Chief, by Choteau Chief, owned by Robert Vaughn.

Ned, by Prospect, owned by Captain Couch.

Harrier, by Glen Elm, owned by W. H. Black.

White Elm, by Glen Elm, owned by W. H. Black.

Chestnut, by Red Boy.

The track is in splendid shape and is pronounced by horsemen one of the best in the state. In fact, all the appointments and arrangements are perfect and the North Montana Fair association has a course and grounds as attractive as any in the northwest.

The races on the fourth promise to be very interesting as some splendid animals are on the grounds and will be entered. It should be understood that these races will be held under the management of the Fair association, who guarantee that there shall be no jobbery or unfair practices. Arrangements will be made to run a train from the depot to the fair grounds.

Annual Meeting.

Notice is hereby given that the annual meeting of the Neihart Gold, Silver Lead, Mining & Reduction company will be held at the law office of Donovan & Lyter in this city on July 14th, 1891, at 2 o'clock p.m., for the purpose of electing officers for the ensuing year and the transaction of all other business that shall properly come before the meeting.

M. M. LYTER, Acting Secretary.

Great Falls, June 21st.

New styles of Prints, Ginghams, etc., at Joe Conrad's.

"German Syrup" Here is something from Mr. Frank A. Hale, proprietor of the De Witt House, Lewistown, and the Tontine Hotel, Brunswick, Me. Hotel men meet the world as it comes and goes, and are not slow in sizing people and things up for what they are worth. He says that he has lost a father and several brothers and sisters from Pulmonary Consumption, and is himself frequently troubled with colds, and he Hereditary often coughs enough to make him sick at Consumption his stomach. Whenever he has taken a cold of this kind he uses Boschee's German Syrup, and it cures him every time. Here is a man who knows the full danger of lung troubles, and would therefore be most particular as to the medicine he used. What is his opinion? Listen! "I use nothing but Boschee's German Syrup, and have advised, I presume, more than a hundred different persons to take it. They agree with me that it is the best cough syrup in the market."

ROYAL BAKING POWDER Absolutely Pure. A cream of tartar baking powder. Highest of all in leavening strength.—U. S. Government Report, Aug. 17, 1889.
