REPUBLICAN NATIONAL TICKET.

For President,
BENJAMIN HARRISON
Of Indiana.

For Vice-President,
LEVI P. MORTON
Of New York.

FOREIGN INTEREST IN THE ELECTION.

The English newspapers are delighted over the passage of the Mills bill in the house. The London Times says it will be worth a hundred million dollars to England each year if it becomes a law.

The Manchester Guardian eulogizes Cleveland and the Democratic party, and says we believe in free trade and we are undoubtedly rejoiced at the prospect of any step which may tend toward that result. These papers but echo the feeling in England, which, more than any other country, is interested in American free trade and the accompanying ruin of American industries. She has pursued the same policy with every country which, by treaty or otherwise, she could get into her hands. The Chinese empire, Spain, Portugal and Turkey have all felt her blighting influence upon their industries. Free trade England has crushed the life out of Ireland and the Indian empire. Her grasping hands are stretched out towards the United States. By the ruin of American industries England will reap a bountiful benefit; and to this end she floods the United States with her agents and will use British money freely in the coming elections.

Cleveland has proved a supple tool in her hands, and with all his despotism and control of patronage he has favored the great Democratic party to repudiate the principles taught by Andrew Jackson and other great leaders and to bow down before the God of free trade. But it is in vain. Before this, the Democratic party has gone back upon its principles and worshipped at the shrine of greenbacks and other false gods, and every time it has received a terrible defeat. Already the alarm is being sounded in the homes of the people of the United States. Every day witnesses defections from the Democratic ranks and accessions to the Republicans. Truth is mighty. She may suffer defeat, she may be "crushed to the earth," but she "will rise again." The fallacies and falsehoods of free trade will be exposed and the sound principles of protection will be maintained.

THE "LEADER"

The Great Falls LEADER has been turned into a stock company and will be incorporated. Among the stockholders are Robert Vaughn, J. F. McClelland, Charles M. Webster, L. G. Phelps, Frank W. Webster, H. P. Rolfe, F. B. Wilcox, H. O. Chown, A. E. Dickerman, S. S. Hawkins, C. P. Downing, J. H. Fairfield and J. H. McKnight. They are all leading Republicans and prominent business men of Cascade county, and the estimated wealth of nearly all of the above gentlemen is from ten to a hundred thousand dollars each. With such solid men interested in the LEADER, we expect a continuation of the success which thus far has attended its efforts, and with the arrival of our press and material soon to be here, we are confident of meeting the expectations of our patrons.

THE CROPS.

Reports from the crops are very encouraging. Nebraska promises the largest corn crop on record. In Minnesota and Dakota the wheat yield will be considerably larger than last year. The hay crop throughout the northwest is very heavy and of a first-class quality.

In Montana the crop of hay has been great, and mowers and rakes are still at work on the bench lands near Great Falls cutting and raking upon almost every inch of the ground. A large supply of hay will be put up in this vicinity. But it will all be in demand. Ranchmen are bringing in loads of potatoes, radishes, turnips and onions, for which they find a ready sale. They say the potatoes are unusually fine this year, and they feel happy to have a good market near at hand.

There is no small amount of discussion over the president's veto of the right of way to a railroad through the Indian territory. It is claimed that the same principle is involved as in the St. P. M. & M. R. R. through the Blackfoot reservation. This it will be remembered, was at first vetoed, and afterwards President Cleveland experienced a change of heart and favored the bill, all of which goes to show that J. J. Hill has a persuasive way about him which moves even presidents.

The extract from the Indiana Farmer by one of our editorial visitors of a few weeks ago, is only one of the many kind things said of Great Falls by the visiting editors. J. J. Hill never made a shrewder move than when he sent the agricultural editors to Great Falls and handsomely cared for their comfort. Every agricultural paper in the country is giving Great Falls and Northern Montana a handsome send-off.

There is no uncertainty as to the position Mr. Harrison will take on the admission of the territories. He talks plainly of the wrong done the inhabitants by their disfranchisement, and says of South Dakota: "It has more people, more miles of railway, more postoffices, more churches, more banks, more wealth than any territory ever possessed when it was admitted to the union."

A Democratic friend says the territorial conventions should not be held until the middle of October, and the county conventions a week earlier. There is much good sense in this remark. When the campaign opens business is at a standstill, and nothing can be done till the election. The shorter the campaign the better for the territory.

All the principal London papers are in favor of Cleveland and free trade. Like the fox which had his tail cut off, England wants the United States to join her.

The citizens of Butte and mining superintendents will give John Maguire a benefit at the race track August 4th. It is supposed \$10,000 will be realized.

The Syracuse Standard says "already enough votes have changed from Cleveland to Harrison to give New York's electoral vote to the latter."

The St. Paul Globe says that Kante Nelson will become an attorney of the St. Paul, Minneapolis & Manitoba railroad at a \$15,000 yearly salary.

The senate has inserted a clause for \$75,000 in the sundry civil appropriation bill for constructing public buildings at Helena, Mont.

H. W. Moore, the eloper, was a friend of the former editor of the Independent, which may account for his transactions.

Hereafter the district court for Cascade county will sit on the fourth Monday in November and third Monday in May.

The Helena people are getting thirsty waiting for the moving of the Woolston water works.

TERRITORIAL ITEMS.

Gathered from Our Exchanges.

Other Interesting News.

No people in the United States are more patriotic than the Montanians.—Inter Mountain.

Miss Mollie is the sister of Mr. Mollie, editor of the Helena Record, and shows her mental superiority over her Democratic brother in her sensible views on politics.—Helena Herald.

There is more real newspaper enterprise and push here in the Territories than in the States.—Butte Miner.

A prominent female member of the Mormon church received a revelation

from heaven last Sunday at Butte City. A communication between heaven and Butte City is not calculated to help the reputation of the latter place to any considerable extent.—Stevensville N. W. Tribune.

The Manitoba trains are running into Butte. Who can tell when they will steam into the city of Missoula?—Missoula.

The Montana Central railway company has opened a quarry of brown stone six miles from Great Falls, on the Sand Coulee branch. This stone has been put to several analytical and practical tests, which have proven most satisfactory, and it is considered equal to any building stone in the United States. They have put into effect a rate of \$2 per ton on this stone from the quarry to Helena, which will make it almost as cheap as brick for building purposes, and it is acknowledged to make equally as durable a building and far more ornamental.—Telegram to Pioneer Press.

The Dakota editors are to follow the great gang of Iowa in an excursion to the National Park. They are announced to start on Sept. 3d.

Work at Sand Coulee

About 50 or 60 men are now engaged in grading for the boilers and compressing machinery and for the track, coal chutes, scales, etc. Operations at these mines will eventually be carried on in an extensive manner. All the machinery known to modern coal mining will be used. Ere long the working force will be greatly augmented. Four rooms are now opened. In three or four weeks the miners will be at work in the mines. After a while it is intended to put on a larger force and take out thousands of tons daily. Surely this will be an immense industry. The coal is supposed to be of superior quality, and it will be taken out at a moderate expense. There is a vein of from 10 to 12 feet of solid coal, which is considered extraordinary. It is impossible to conceive a better natural facility for coal mining than that at Sand Coulee. It is no easy matter to form an approximate conception of the great importance of these mines. They will furnish employment for thousands and heat for tens of thousands.

Church Workers.

The Episcopalians are pushing forward their chapel and the Methodists are getting ready to build. They have circulated the subscription paper freely with good results. The Universalists are also in the field, and have many members in Great Falls. Dr. Tuttle, of Minneapolis, a noted clergyman, has promised to organize their church, and they will soon have the first Universalist church in the territory. Their subscription lists seem to have plenty of twenty-fives and fifties as well as lower numbers, and it is building is an assured fact. The Presbyterians are out in force with a subscription to build a parsonage. This caused grumbling among some, who say the Presbyterians are always begging and should now stand back and give the others a chance. However this may be, the building of churches, together with schools, goes far towards making the growth of the town. Let them come.

A \$10,000 Benefit.

At a meeting of the representative business men of Butte, held Thursday evening, it was decided to begin arrangements for a benefit on a large scale to be tendered to Manager John Maguire. The date is set for Saturday, August 4th, and the race track at Butte has been secured for the occasion. There will be horse racing, boxing, gymnastics and athletic sports, besides probably a theatrical and musical entertainment. Committees have been appointed and are going to work in a business like manner. It is expected that \$10,000 will be raised by the benefit which, it is understood, Mr. Maguire will devote to the building of a new opera house. The citizens generally have taken hold of the project and intend to make it a roasting success. We hope it will justify their fondest anticipations.—Herald.

Montana Leads the Van.

The advance sheets of the forthcoming report of Dr. J. P. Kintail, director of the mint, are out and in them is contained the statistical statement of the production of precious metals in the U. S. during 1897. The report places the amount at over \$86,000,000 and credits Montana with the production of over \$25,000,000. This places our territory for the first time at the head of the mineral producing states and territories. She produced more than any other state or territory last year and her quota amounted to nearly a fourth of the entire production of the U. S. Colorado and California have slipped back to second and third place and Montana leads the van.

The Northern Pacific Earnings.

The gross earnings of the Northern Pacific for the fiscal year just up \$15,923,610. This is a gain of \$3,026,170 over the previous year, and probably the largest gross increase reported by any company in the country this year. The maximum fixed charges are about \$600,000 a month, which includes everything, and they are not likely to increase much for the present, and that only for interest upon such mortgage bonds as may be issued to provide new equipment. The company has still on hand, available for this purpose, \$2,132,700.—Tranchant.

Montana Beef at Chicago.

Advices from Chicago as to the range cattle market is decidedly satisfactory, says the Yellowstone Journal. A second lot of the Murphy cattle sold for \$5 per 100 pounds, and netted the seller in the neighborhood of \$2 per head. A lot of Stoddard & Howard cattle on the same market brought \$4.85. The great scarcity of corn-fed cattle in the Chicago market is the main cause of these prices being realized, and as the corn-fed supply cannot in any way be augmented, it is more than probable that Montana beef will rule high during the whole shipping season.

The Way to Run a Paper.

"Why don't you run a paper like that?" a grocer said to a reporter this morning, throwing out a Chicago daily. "For the same reason you don't run a grocery like that," the reporter replied, turning to an old Chicago house showing a twelve-story building. The grocerman looked at the picture a moment and said: "I never looked at it that way before."

GREAT FALLS.

Bound to be a Big City—So Says the Indiana Farmer.

Great Falls is reaching nearly fifty miles farther west, situated on the south bank of the Missouri river. This is one of the most promising young cities we have seen in many a day. The natural situation is as beautiful as it could be. The rapids in the river and the great falls give this place limitless water power; here is fine bituminous coal in great abundance, lumber for building at about the same prices as in Chicago; near gold, silver, copper, lead and iron ores and mines; surrounded by excellent agricultural lands, and the finest grazing district. This is bound to make a city of no mean proportions. A great deal of capital is already located here. A smelting establishment costing \$2,000,000, for the precious metal is nearly completed by New York capitalists. In this vicinity I saw as the wheat and oat fields as anywhere on the trip, down in February. From here we are in full sight of the Rocky mountains, snow capped, some sixty-five miles distant, yet not seeming to the vision more than ten miles, so clear is the atmosphere. Health is excellent in this region. A physician said to me that but for his outside transactions he could make no money here.—Indiana Farmer.
