

TONOPAH Links With MANHATTAN

Citizens Hold Enthusiastic Meeting Last Night to Devise Ways and Means to Further Interests of All Camps in This Section.

Action Spells Success

"Manhattan for the Money!" Will Be the Slogan-Committee Appointed Which Will Report on Wednesday Night a System of Finance.

MANHATTAN FOR THE MONEY!
That's the slogan for the new boom movement for Manhattan, and it is a motto that works both ways. Manhattan is out just now to raise money that she may herald her resources to the world for the purpose of raising more money for the development of those resources. And Tonopah is right behind the camp to help her in every way that is possible, with energy, with boosting, with money, and with the dissemination of the news and the truth of the camp, until the name of Manhattan becomes a household word.

port for the mines. He thought that Los Angeles offered the most inviting field. Nathan Crocker said that Tonopah had always been Manhattan's best friend, and he cited the instance of where there was raised in Tonopah in two hours, money enough to fix the road to Manhattan. What was required was unity of action. Tonopah should work for Manhattan and Manhattan should in return work for Tonopah. Arthur Raycraft said that he had put all his money in Manhattan, all that he had, and all that he could borrow, and if anybody could show

him where he could borrow any more he would put that in, too. "One thing we must look out for," said Mr. Raycraft, "and that is our rival on the north. Austin is looking with eager eyes for the trade of Manhattan. The people of Manhattan are more than friendly to us, but we must do something for the camp more than talk. What is good for Manhattan is good for Tonopah, for our interests are identical." W. W. Booth declared that the only way to boost Manhattan was on its merits, and to tell the truth about it. "We are constantly receiving wires and correspondence about Manhattan," said he, "and we have received stories that do not chime with conditions as we know them to exist. There is no good to come from sending out stories of \$700 shipping ore, or ore that goes thousands of dollars to the ton, when that ore is never shipped. We may be keeping lots of ore to be milled, but not that kind of ore. We send that to the smelters. The truth is good enough for

The meeting of the Tonopah Manhattan Promotion Committee at the Mizpah Club last night was a howling success. The committee will meet again on next Wednesday night, when permanent organization will be effected, and when there will be submitted a plan of promotion and the method of financing the plan. There was a committee appointed for this purpose. Meanwhile the committee will be abroad securing money. There was displayed at the meeting that kind of enthusiasm and harmony of action which spells success for the movement. Everybody had something to say for the good of the cause, and expressed himself as willing to do his very best, no matter where he was placed. There were good words, too, for the baby camp of Round Mountain, the biggest feeling camp on earth—Round Mountain, the producer.

GREETINGS From Citizens of Round Mountain

(Special to the Bonanza.)
ROUND MOUNTAIN, Oct. 12.—The citizens of Round Mountain send greetings to the Bonanza, and grateful remembrances for the manner in which that paper handled the opening day of the hydraulic system. The account was accurate, and contained all the news. The reception of the issue containing the story was like the receipt of mail from home after being shut off from the world for six months. Bully for Billy Booth, and bully for the Bonanza.
HENRY BARTLETT,
For the Citizens of Round Mountain.

Manhattan. I think that Round Mountain should be included in this proposition. She is the baby camp of them all, but she is already producing, and is a camp of which we can say good things with pride to the camp and to ourselves." E. B. Cushman said that one of the causes for the slowness of the camp was that it had gone forth to the world as a high grade shipping proposition. It took time to demonstrate that it was a high grade milling camp. He said that he and his associates had gone into the mill building proposition with their eyes open. They had sent a carload of ore to Denver, where it was carefully tested by F. L. Bosqui, and Mr. Bosqui had given them the pleasing assurance that the ore was free milling. R. P. Dunlap said that Manhattan had been proven, and that with the completion of the mills it would become a manufacturing industry, for all that there would be to it would be the turning out the bullion. He believed with Mr. Booth that the scope of the committee should embrace Round Mountain. He was not very enthusiastic on Los Angeles, for he was at the meeting of the new board, and he was forced to the conclusion that Nevada was doing all the buying and all the selling. At the banquet every local speaker had a whole lot to say about the City of Angels, but nothing at all about Nevada, except to suggest that the people from Nevada buy some of those remote properties between Mt. Lowe and the sea. Mr. Mudgett spoke more kindly of the City of Angels, and said that he had better luck in financing the treasury of a company in which he was interested. "But," said he, "the first thing that we should do is to talk about finances. We have got to have a working fund for advertising purposes, and I am ready to subscribe my share now. In Mr. Frisbie's report he fixes the dues at fifty cents, but we are not going to get far on that kind of a proposition." Chairman Branson gave a little talk on the power of the press, and stated that the kind of circulation the newspapers could give was the very best. And that the best place to put such kind of advertising was in the local papers, for the reason that the outside papers looking for the news of mining camps, clipped generously. While the local papers, he said, might not have the biggest circulation in the world, that circulation was widely increased from the fact of the exchanges using its columns. It being understood that Messrs. Branson and Balliet were going to Manhattan tomorrow night, they were instructed to get all the information possible from the Manhattan committee. C. H. McIntosh moved that a committee be appointed to gather all the data about the mines of Tonopah and Manhattan, the same to be put in pamphlet form. He said that if the committee were to put its approval on any property, it must know all about the property. If stock were bought in a property which was a

HARRIMAN'S VIGOROUS DENIAL

EMPEROR IS IN BAD CONDITION

(Associated Press.)
VIENNA, Oct. 12.—The condition of Emperor Francis Joseph took a turn for the worse at noon today, and at a late hour tonight symptoms of inflammation of the lungs had increased. Taken as a whole the day cannot be said to have been one of progress, although the physicians who examined his majesty at 1 o'clock declared that the fever had abated and the condition of the patient was unchanged. At 11 o'clock his majesty was quiet and fell asleep. His heart action is good and he is able to keep sufficient nourishment. The physicians hope that a turn for the better will soon occur, yet as long as fever symptoms and inflammation continue they dare not predict a favorable outcome.

[By Associated Press.]
NEW YORK, Oct. 12.—The uneasy feeling which has been gathering in the stock market during the week eventuated in a sharp spasm of liquidation today which gave a demoralized tone to the trading. The publication of an alleged order issued by E. H. Harriman for cutting down expenses in all departments of railroad systems under his control, owing to the stringency of the money market, was the sole factor. Mr. Harriman's denial of having issued this order and his assertion that the sustained pressure of traffic on railroad lines concerned would preclude the cutting down of the operating forces, has but little influence in correcting the demoralized tone of the market. A favorable bank statement had but slight effect in the same direction and the closing tone was much unsettled and irregular and at material declines from last night's figures and at low prices for the year. Bonds were weak. The total sales had a par value of \$1,242,000. United States 2's registered have declined one-half, the coupons one-quarter, and 4's one-quarter per cent of call during the week.

MAYOR TAYLOR ANNOUNCES POLICY

(Associated Press.)
SAN FRANCISCO, Oct. 12.—The campaign of Mayor Taylor and District Attorney Langdon for re-election was formally opened tonight at Dreamland rink, the occasion being the first mass meeting under the auspices of the Democratic party and the Good Government League. The large auditorium was packed to overflowing and much enthusiasm was displayed. Mayor Taylor, Mr. Langdon and other candidates addressed the large gathering and an announcement of their policy was received with rounds of cheers. Mayor Taylor in his address declared that if re-elected he would continue to do all in his power to assist in the work of rebuilding San Francisco and adding to her prosperity.

COSTLY FIRE IN SAN JOSE

(By Associated Press.)
SAN JOSE, Cal., Oct. 12.—One of the most costly fires that has visited this city in some years occurred last night, when the big Arcade dry goods store and contents in South First street were completely destroyed. The stock was valued at \$135,000, the building at \$35,000, and these losses, together with others suffered by the occupants of the second story of the building, will bring the total to \$200,000.

CHICAGO WINS THE WORLD'S CHAMPIONSHIP

[By Associated Press.]
DETROIT, Oct. 12.—The Chicago National League baseball club this afternoon, at Bennett Park, won the world's championship, defeating the Detroit American league team by a score of 2 to 0. It was the fourth successive victory for the Chicago team in as many days. Taking advantage of every slip made by the local players and running bases cleverly, they scored two runs in the first two innings, while the Detroit team did not succeed in getting one man over the home plate. The rooters who had followed Chicago from their home city, swarmed down to the diamond when the ninth inning closed and showered them with congratulations. Then several hundred of them formed in line and marched down Michigan avenue, headed by a band, cheering and singing in celebration of their victory. It was a disappointment for the locals in more ways than one. The weather was raw and cold, entirely unfit for baseball; the temperature was below 50 degrees and a raw wind swept across the field throughout the game. The sun broke through the clouds only once and then but for a few minutes. The official count of the attendance was 7370. Mullin and Brown both pitched well, but the Chicago man received stronger support from his team mates. Brown was also steadier than Mullin, giving but one base on balls to Mullin's three, one of which developed into a run in the first inning. There was missing in the play of the Detroit team again this afternoon the dash and vim which carried them to the top of the American league and won the pennant for them. The local team had a man on third base but twice during the game and each time Brown held the batters safely. In an effort to check the base stealing of the Chicagos, Manager Jennings sent in Catcher Archer to receive Mullin, but the Chicago men succeeded in stealing four bases from him, the stolen bases figuring materially in the scoring of both their runs.

TURN JAPS OVER TO THE POLICE

(Associated Press.)
SAN FRANCISCO, Oct. 12.—Two Japanese members of the crew of the Japanese steamer Kean Maru, which arrived late last night from the Orient, made an attempt to escape from the vessel early this morning. They found two Italian fishermen, who landed the would-be deserters at the fishermen's wharf and turned them over to the harbor police. They were later given to the Federal authorities.

Twenty-two Drown When Vessel Sinks

SAULT STE. MARIE, Mich., Oct. 12.—The steel steamer Cypress, with a cargo of ore, was wrecked last night on Lake Superior off Deer Park, and all of the crew of twenty-two, excepting the second mate, lost their lives. He was washed ashore near Deer Park, lashed to a life raft, and was barely alive. He is in a critical condition and thus far has been able to tell only that the steamer was the Cypress and that he was the only survivor. No details will be received until the second mate revives sufficiently from his terrible experience to talk.

Strike Rich Streak On Manhattan Lease

(Special to the Bonanza.)
MANHATTAN, Oct. 12.—Cram's Lillie lease on the Union Extension is sacking seven hundred dollar ore from a twenty-inch streak on the hanging wall of a six-foot vein, at a depth of seventy feet. The opinion of mining men is that this lease alone is sufficient to make a camp. The Rose-Nash lease on the same lead is hoisting nothing but ore of a high grade milling to shipping.
